

# VENTURA PORT DISTRICT BOARD OF PORT COMMISSIONERS

Jim Friedman, Chairman Everard Ashworth, Vice Chairman Bruce E. Smith, Commissioner Gregory Carson, Commissioner Nikos Valance, Commissioner

Oscar Peña, General Manager Christopher Chan, Legal Counsel Jessica Rauch, Clerk of the Board

#### PORT COMMISSION AGENDA REGULAR MEETING OCTOBER 28, 2015 AT 7:00PM VENTURA PORT DISTRICT OFFICE 1603 ANCHORS WAY DRIVE, VENTURA, CA

A Closed Session of the Board will be held at <u>5:30PM</u> at the Four Points by Sheraton Hotel – <u>Captain's Room</u>, 1050 Schooner Drive, Ventura, CA, to discuss the items on the Attachment to Agenda-Closed Session Conference with Legal Counsel.

The Board will convene in <u>Open Session</u> at the Port District Office located at 1603 Anchors Way Drive for its Regular Meeting at <u>7:00PM.</u>

# ADMINISTRATIVE AGENDA:

CALL TO ORDER: By Vice Chair, Everard Ashworth.

PLEDGE OF ALLEGIANCE: By Vice Chair, Everard Ashworth.

**ROLL CALL:** By the Clerk of the Board.

# **ADOPTION OF AGENDA (5 minutes)**

Consider and approve, by majority vote, minor revisions to agenda items and/or attachments and any item added to, or removed/continued from the Port Commission's agenda. Administrative Reports relating to this agenda and materials related to an item on this agenda submitted after distribution of the agenda packet are available for public review at the Port District's office located at 1603 Anchors Way Drive, Ventura, CA during business hours as well as on the District's website - <u>www.venturaharbor.com</u> (Public Notices). Each item on the agenda shall be deemed to include action by an appropriate motion, resolution or ordinance to take action on any item.

# **APPROVAL OF MINUTES**

The Minutes of the October 14, 2015 regular meeting will be considered for approval.

# **PUBLIC COMMUNICATIONS (3 minutes)**

The Public Communications period is set aside to allow public testimony on items not on today's agenda. Each person may address the Commission for up to three minutes or at the discretion of the Chair.

# **CLOSED SESSION REPORT (3 minutes)**

Closed Sessions are not open to the public pursuant to the Brown Act. Any reportable actions taken by the Commission during Closed Session will be announced at this time.

# **BOARD COMMUNICATIONS (5 minutes)**

Port Commissioner's may present brief reports on port issues, such as seminars, meetings and literature that would be of interest to the public and/or Commission, as a whole. Port Commissioner's must provide a brief summary and disclose any contacts or meetings he or she may have had with any Port District Tenants.

# **DEPARTMENTAL STAFF REPORTS (10 minutes)**

Ventura Port District Staff will give the Commission reports on their Department.

# **GENERAL MANAGER REPORT (5 minutes)**

The General Manager of the Ventura Port District will report on items of general interest to the Port Commission and members of the public.

# LEGAL COUNSEL REPORT (5 minutes)

# **CONSENT AGENDA:** (5 minutes)

Matters appearing on the Consent Calendar are expected to be non-controversial and will be acted upon by the Board at one time, without discussion, unless a member of the Board or the public requests an opportunity to address any given item. Approval by the Board of Consent Items means that the recommendation is approved along with the terms set forth in the applicable staff reports.

#### **A)** Approval of Financial Statements and Checks for the month of July and August 2015 Recommended Action: Resolution No. 3287.

Recommended Action: Resolution No. 3287.

That the Board of Port Commissioners adopt Resolution No. 3287 accepting and approving the Financial Statements, Payroll and Regular Checks for expenses in July and August 2015.

# STANDARD AGENDA: (30 minutes)

## 1) Annual Reserve Policy Review

Recommended Action: Motion.

That the Board of Port Commissioners accept the current Ventura Port District Reserve Policy, dated August 28, 2013 (Resolution No. 3225).

#### 2) Status of Proposed Ventura Harbor Marina and Yacht Yard Expansion

Recommended Action: Informational.

That the Board of Port Commissioners receive a report on the status of the Final Initial Study -Mitigated Negative Declaration for the Ventura Harbor Marina and Yacht Yard Expansion dated October 2015, as well as the status of subsequent plan submittals to the Ventura Port District pursuant to the Ground Lease with Ventura Harbor Marine Associates, LLC, including, without limitation, "schematic plans" subject to the "Ventura Harbor Minimum Entrance Channel Plan" prepared by Noble Consultants, Inc.

# **REQUEST FOR FUTURE AGENDA ITEMS**

## ADJOURNMENT

This agenda was posted on Friday, October 23, 2015 at 5:00 p.m. at the Port District Office and on the Internet - www.venturaharbor.com (Port Commission).

In compliance with the Americans with Disabilities Act, if you need special assistance to participate in this meeting, please contact the Ventura Port District at (805) 642-8538. Notification 48 hours before the meeting will enable the District to make reasonable arrangements to ensure accessibility. (28 CFR 35.102.35.104 ADA Title II)

# ATTACHMENT TO PORT COMMISSION AGENDA CLOSED SESSION CONFERENCE WITH LEGAL COUNSEL

# WEDNESDAY, OCTOBER 28, 2015

# 1. Conference with Real Property Negotiators - Per Government Code Section 54956.8:

- a) Property:**1567 Spinnaker Drive #100**Negotiating Parties:Oscar Pena, Brian Pendleton, Chris ChanUnder Negotiation:Ventura Village Carousel New Lease

- 2. Conference with Legal Counsel Anticipated Litigation per Government Code Section 54956.9(d)(2): Claim of Bonnie Beck
- 3. Conference with Legal Counsel Anticipated Litigation per Government Code Section 54956.9(d)(2): One case.
- 4. Conference with Legal Counsel Anticipated Litigation per Government Code Section 54956.9(d)(4): One case.

# OCTOBER 28, 2015 BOARD OF PORT COMMISSIONERS

APPROVAL OF THE OCTOBER 14, 2015 MINUTES

The Regular Meeting of the Ventura Board of Port Commissioners was called to order by Chairman Jim Friedman at 11:05AM at the Ventura Port District Office located 1603 Anchors Way Drive, Ventura, CA 93001.

#### **Commissioners Present:**

Everard Ashworth, Vice Chair Jim Friedman, Chair Bruce E. Smith Nikos Valance

#### **Commissioners Absent:**

Gregory L. Carson

#### Port District Staff:

Oscar Peña, General Manager Brian Pendleton, Business Operations Manager John Higgins, Harbormaster Joe Gonzalez, Facilities Manager Jennifer Talt-Lundin, Marketing Manager Frank Locklear, Marina Manager Gloria Adkins, Accounting Manager Richard Parsons, Consultant Robbie Armstrong-Dunham, Management Assistant Jessica Rauch, Clerk of the Board

#### Legal Counsel:

Timothy Gosney

## <u>AGENDA</u>

**CALL TO ORDER:** By Chair, Jim Friedman at 11:05AM.

PLEDGE OF ALLEGIANCE: By Commissioner Friedman.

ROLL CALL: Commissioner Carson was absent.

ADOPTION OF AGENDA

ACTON: Commissioner Valance moved, seconded by Commissioner Smith and carried by a vote of 4-0 to adopt the October 14, 2015 agenda.

#### **APPROVAL OF MINUTES**

The Minutes of September 23, 2015 regular meeting were considered as follows:

ACTION: Commissioner Ashworth moved, seconded by Commissioner Smith and carried by a vote of 3-0-1 (Ashworth abstained) to approve the minutes of the September 23, 2015 regular meeting.

**PUBLIC COMMUNICATIONS:** Sam Sadove found another crane fabricator that is faster and cheaper that the Ventura Port District should consider using.

**CLOSED SESSION REPORT:** Mr. Gosney stated that the Board met in closed session; discussed and reviewed all items except Item 1d) Ventura Village Carousel New Lease on the closed session agenda. Staff was given instructions as to how to proceed as appropriate and there was no action taken that is reportable under The Brown Act.

**BOARD COMMUNICATIONS:** Commissioner Friedman reported to the Commission and public the incident that occurred over the weekend involving Commissioner Carson.

STAFF COMMUNICATIONS: None.

LEGAL COUNSEL REPORT: None.

# CONSENT AGENDA:

## A) Approval of New Retail Lease Agreement for Hats Unlimited, Inc.

Recommended Action: Motion

That the Board of Port Commissioners approve by motion a new Retail lease agreement between the Ventura Port District dba Ventura Harbor Village and Hats Unlimited, Inc. dba as Hats Unlimited for the premises located at 1567 Spinnaker Drive #101 consisting of a total of 1,146 square feet for a four (4) year term with a five (5) year option to extend.

ACTION: Commissioner Ashworth moved, seconded by Commissioner Valance and carried by a vote of 4-0 to approve a new Retail lease agreement between the Ventura Port District dba Ventura Harbor Village and Hats Unlimited, Inc. dba as Hats Unlimited for the premises located at 1567 Spinnaker Drive #101 consisting of a total of 1,146 square feet for a four (4) year term with a five (5) year option to extend.

#### **B)** Acceptance of \$13,000 Surrendered & Abandoned Vessel Exchange Grant Recommended Action: Resolution No. 3286.

That the Board of Port Commissioners adopt Resolution No. 3286, accepting a \$13,000 Surrendered & Abandoned Vessel Exchange (SAVE Contract# C15S0622) offered by the California Division of Boating and Waterways.

ACTION: Commissioner Ashworth moved, seconded by Commissioner Smith and carried by a vote of 4-0 to adopt Resolution No. 3286, accepting a \$13,000 Surrendered & Abandoned Vessel Exchange (SAVE Contract# C15S0622) offered by the California Division of Boating and Waterways.

## C) Approval of Out of Town Travel Requests

Recommended Action: Motion

That the Board of Port Commissioners approve by motion the Out of Town Travel Request for Marketing Manager, Jennifer Talt Lundin.

ACTION: Commissioner Smith moved, seconded by Commissioner Valance and carried by a vote of 4-0 to approve the Out of Town Travel Request for Marketing Manager, Jennifer Talt Lundin.

# STANDARD AGENDA:

# 1) Acceptance of \$94,810 Shellfish Grant

Recommended Action: Motion.

That the Board of Port Commissioners authorize the General Manager to sign the *Cost Reimbursement Research Subaward Agreement* for \$94,810, which reflects the terms and conditions of the grant agreement for year one.

ACTION: Commissioner Ashworth moved, seconded by Commissioner Smith and carried by a vote of 4-0 to authorize the General Manager to sign the Cost Reimbursement Research Subaward Agreement for \$94,810, which reflects the terms and conditions of the grant agreement for year one.

## 2) Approval of Professional Services Agreement with Dudek

Recommended Action: Motion.

That the Board of Port Commissioners approve the Professional Services Agreement with *Dudek* in the amount of \$65,350.00 to provide consultant services for the Permitting Strategy for the Ventura Shellfish Enterprise Program (VSE) subject to final approval of the form of agreement by District staff and legal counsel.

ACTION: Commissioner Ashworth moved, seconded by Commissioner Smith and carried by a vote of 4-0 to approve the Professional Services Agreement with Dudek in the amount of \$65,350.00 to provide consultant services for the Permitting Strategy for the Ventura Shellfish Enterprise Program (VSE) subject to final approval of the form of agreement by District staff and legal counsel.

# 3) Approval of Professional Services Agreement with Plauché & Carr, LLP

Recommended Action: Motion.

That the Board of Port Commissioners approve the Professional Services Agreement with *Plauché & Carr, LLP* in the amount of \$5,000 to provide legal services for the Ventura Shellfish Enterprise Program (VSE) subject to final approval of the form of agreement by District staff and legal counsel.

ACTION: Commissioner Ashworth moved, seconded by Commissioner Smith and carried by a vote of 4-0 to approve the Professional Services Agreement with Plauché & Carr, LLP in the amount of \$5,000 to provide legal services for the Ventura Shellfish Enterprise Program (VSE) subject to final approval of the form of agreement by District staff and legal counsel.

# 4) Approval of Professional Services Agreement with Scott Lindell

Recommended Action: Motion.

That the Board of Port Commissioners approve the Professional Services Agreement with Scott Lindell, Fisheries and Marine Biologist, in the amount of \$9,960.00 to provide consultant services for the Ventura Shellfish Enterprise Program (VSE) subject to final approval of the form of agreement by District staff and legal counsel.

ACTION: Commissioner Ashworth moved, seconded by Commissioner Smith and carried by a vote of 4-0 to approve the Professional Services Agreement with Scott Lindell, Fisheries and Marine Biologist, in the amount of \$9,960.00 to provide consultant services for the Ventura Shellfish

# Enterprise Program (VSE) subject to final approval of the form of agreement by District staff and legal counsel.

## 5) Status of Sondermann Ring Partners Public Long Dock

Recommended Action: Informational.

That the Board of Port Commissioners receive a report on the status of public long dock relocation for the Sondermann Ring Partners project.

# ACTION: Michael Sondermann reported on the status of public long dock relocation for the Sondermann Ring Partners project.

Public Comment: Bill Crew had no negative feedback and thought this was the right solution. Chuck Ormson said it was an acceptable location, but this was the first time he has seen the new location. Janet Lawson agreed with Bill Crew and expressed that this is all about safety.

## 6) Ventura Port District 2015 – 2016 Departmental Objectives

Recommended Action: Informational.

That the Board of Port Commissioners review the 2015 – 2016 objectives to confirm they are in alignment with the Board's Mission Statement and Goals.

# ACTION: The Commission had the following comments on the objectives:

- More detail on how objectives will be accomplished.
- Stick to goals that are measurable and time based.
- Would like the goals and objectives to be presented during budget time.
- Ordinance 44 to be a top priority.

**REQUEST FOR FUTURE AGENDA ITEMS:** Commissioner Ashworth asked if the Harbormaster could give the Commission a safety update. Commissioner Smith asked if the procurement policies can be brought forward for review and to have staff review the new materials from Mr. Sadove and report back to the Commission. Commissioner Valance asked to see the competitive bids, how the bids were solicited, etc. on the jib crane project.

**ADJOURNMENT:** The meeting was adjourned at 12:50PM.

Secretary

# OCTOBER 28, 2015 BOARD OF PORT COMMISSIONERS DEPARTMENTAL STAFF REPORTS

DREDGING FACILITIES HARBORMASTER MARINA MARKETING PROPERTY MANAGEMENT TREASURER (QUARTERLY)

## **RWP DREDGING MANAGEMENT**

Richard W. Parsons 2271 Los Encinos Road Ojai, California 93023 Phone/Fax (805) 649-9759

October 28, 2015

Board of Port Commissioners Ventura Port District 1603 Anchors Way Drive Ventura, CA 93001

#### Subject: September/October 2015 Dredging Activities and Special Projects Report

The Dredging Program Manager's activities for the September to mid-October 2015 period are reviewed below:

#### FY2016 Federal Dredging Appropriations

In late September the U.S. Congress approved a Continuing Resolution (CR) that will fund the operations of the Federal Government through December 11, 2015. The CR allows the Army Corps of Engineers to proceed with preparations for the February/March 2016 maintenance dredging of the Ventura Harbor Entrance Channel area at the \$4.83 million level requested by the Administration. However, at some point prior to the December 11 expiration of the CR, Congress will need to resolve the appropriations issues for the balance of FY16 or operations of the federal government, including the dredging of Ventura Harbor could be impaired.

There is also the expectation that the ultimate resolution of the FY16 appropriations process will include additional operations and maintenance (O&M) funds with which the Corps of Engineers is to develop a "work plan" for the accomplishment of additional O&M work. In order to improve the odds that Ventura Harbor will be able to secure work plan funds, I visited in Washington, D.C. with the staff of Congresswoman Brownley and Senator Feinstein on October 19, 2015.

#### FY2016 Army Corps of Engineers Maintenance Dredging

The L.A. District of the Corps of Engineers has now completed the preparation of the contract documents for the next three year federal maintenance dredging of the Ventura Harbor entrance area and has initiated the competitive bidding process. A contract should be awarded this December.

#### Inner Harbor Sediment Sampling

In September Fugro Pelagos completed their processing of the inner harbor bathymetric survey data. Applied Environmental Technologies (AET) and I then utilized that data to prepare a sediment Sampling and Analysis Plan (SAP). The SAP was submitted to U.S. Army Corps of Engineers, the U.S. Environmental Protection Agency, and the Los Angeles Regional Water Quality Control Board on October 19, 2015 and will be considered by the Dredged Material Management Team (DMMT) in Los Angeles on October 28, 2015.

#### Beach Profiling

Fugro Pelagos performed the annual profiling of the beaches north and south of the harbor entrance in the period between October 14 and 21, 2015 as required by the District's dredging permit from the California Coastal Commission. The cost of the profiling effort was \$17,926.

#### Harbor Village Dock Replacement Program

With the Coastal Commission's August 21, 2015 acceptance of the District's application to replace Docks C, D, G and H at Harbor Village it is my hope that this matter will be addressed by the Commission by the end of the year.

#### Harbor Village Accessibility Improvements

The Harbor Village Accessibility Improvement contract with J&T Engineering and Construction has essentially been completed. The contractor has done an excellent job and worked very cooperatively with us to minimize disruption of the Village tenants. Final quantity adjustments are still being worked out and the total project cost is expected to be about \$310,000.

#### Reroofing of Buildings 1449 and 1559

While the recent threat of rain has interfered with Letner Roofing's effort on building 1559, the work is proceeding very nicely. The contractor is working primarily at night (1AM to 10AM) to avoid disruption of Village operations.

#### Fish Pier Derrick Crane

The fish pier derrick crane was reinstalled on October 21, 2015. With the placement of a sluing bearing atop the mast of the crane, it is now working quite well.

#### Ventura Harbor Boatyard Travelift Pier Repair

For informational purposes I want the Port Commission to know that I will be assisting Ventura Harbor Boatyard in securing the necessary regulatory approvals to repair their recently damaged facilities (see the attached letter of October 6, 2015 with General Manager's approval).

Respectfully submitted,

Richard Parson Dredging and Special Projects Consultant

Richard W. Parsons 2271 Los Encinos Road Ojai, CA 93023 Phone/Fax (805) 649-9759

October 6, 2015

Oscar Peña General Manager Ventura Port District 1603 Anchors Way Drive Ventura, CA 93001

Dear Oscar,

Ventura Harbor Boatyard has asked that I assist them in securing the necessary regulatory entitlements for the repair or replacement of portions of "A" dock and the north finger of their 30 ton travelift pier which were heavily damaged in a recent vessel accident. As a consequence I would like to enter into a contractual arrangement with the Boatyard to accomplish these tasks.

Before I can do so, however, I must first secure the Port District's consent pursuant to section 7.2 of the "Agreement for Dredging and Project Management Services" between the District and myself.

I do not believe that this contemplated effort on behalf of the Boatyard poses any conflict with my efforts on behalf of the District and certainly it is in the District's interest to have the Boatyard's facilities restored.

I look forward to your response.

Yours Truly,

Richard Parsons

RWP:rad

DEPARTMENTAL STAFF REPORT

| TO:      | Board of Port Commissioners         |
|----------|-------------------------------------|
| FROM:    | Joe A. Gonzalez, Facilities Manager |
| SUBJECT: | Facilities Report                   |

## I. Maintenance

- 1) Ventura Port District's ventilation system for the Shop and locker room area was serviced.
- 2) Harbor Patrol's water temperature gauge was serviced.
- 3) Ventura Port District's emergency outboard and generator was serviced.
- 4) Ventura Port District's Dry Storage electronic gate system was serviced.
- 5) Two flush meters were replaced in 1691 public restrooms.
- 6) Three access panels for the emergency water shut off valves were replaced at 1691.
- 7) Monthly fire extinguisher inspection at all Ventura Port District locations.
- 8) One access panel for the emergency water shut off valve was replaced at 1591.
- 9) Minor tenant improvement was performed in 1567 Suite 207 and 208.
- 10) Installed "Businesses open during construction" signage throughout Ventura Harbor Village.
- 11) Installed new vinyl window in 1583 Suite 212.
- 12) Repaired broken water line underneath Harbor Patrol's long dock.
- 13) Minor repairs were performed on two dryers at 1691 facility.
- 14) Minor repairs were performed on the public bench adjacent to E-Dock.
- 15) One minor repair was performed on one of the launch ramp public restroom's door.
- 16) Approximately 15' of cast iron pipe was replaced from building 1591 drain pipe system.
- 17) Main fire hydrant at Ventura Harbor Village was serviced due to leaking valve.
- 18) Repaired leak in the drinking fountain located at 1583 building.
- 19) Re-adjusted the water pressure on the drinking fountain at 1591 building.
- 20) Six parking lot lights bulbs were replaced at the Ventura Harbor Village parking lot.
- 21) Two parking lot light bulbs were replaced at the Surfers Knoll lot.
- 22) Two parking lot light bulbs were replaced at the Harbor Cove lot.
- 23) Six vehicles were serviced.
- 24) Harbor Patrols Boats B-1, B-19 were serviced.

## II. Landscaping

- 1) Three low voltage lighting bulbs were replaced at 1567 planters.
- 2) One low voltage lighting bulb was replaced at 1591 planter.
- 3) Two low voltage lighting bulbs were replaced at 1575 planters.
- 4) Four low voltage lighting bulbs were replaced at 1559 planters.
- 5) Performed monthly sprinkler testing for any water waste.
- 6) New plants were installed throughout the Village.

## III. Marina

- 1) Monthly service was performed on Fish Pier Hoist # 1.
- 2) Monthly gangway inspections on the entire Marina were performed.
- 3) Performed the fire hose cabinet and fire extinguisher inspections on all Marina docks.
- 4) Safety inspection was performed in the oil waste station.
- 5) Electrical cover on G-Dock pedestal # 18 and 20 were replaced.
- 6) Electrical cover on D-Dock pedestal # 5 and # 26 were replaced.
- 7) Facial boards were replaced on E and D-Docks.
- 8) New cleat was installed in H-Dock # 4.
- 9) New LED lights were installed on H-Dock Gangway.
- 10) New section of LED lighting was replaced on I-Dock Gangway.
- 11) E-Dock pedestal # 16 was re-fastened due to being struck by a vessel.

# IV. Marketing

1) Assisted the Marketing Department by setting up tables, banners, reserving parking stalls, etc. for 31 events from September 4 through September 27.

# V. Construction Projects

- 1) 1691 Elevator Modernization
  - a. ThyssenKrupp has order parts; modernization of the elevator will start immediately upon parts arrival.

DEPARTMENTAL STAFF REPORT

#### I. Harbor Ordinance 44

While this is one of the more important goals for this department, I feel compelled to do my due diligence prior to moving forward with any changes to the Ordinance. I have developed an SMART outline for which I will follow that essentially starts from scratch and ends in a revised or new Ordinance towards the last quarter if not sooner. (Attachment 1)

#### **II. Extended Summer**

Lifeguarding coverage officially ended on Labor Day, but the weather, surf, and crowds continued. Harbor Patrol has adapted and have met unique challenges head on. For the first time in Harbor Patrol history, staff has been assigned to the beach, specifically to ensure the safety of the public. A notable day was on Saturday, October 10, where Harbor Patrol Officers performed numerous swimming rescues from the beach. At the conclusion of the day, over 22 persons were rescued, and numerous more were prevented by public contacts. Harbor Patrol Officer Brad Chisholm rescued 44 victims this summer and Harbor Patrol Officer Timmy Burrows rescued 26 victims. Staff had several thousand preventative contacts throughout the summer.

#### III. Human Powered Vessels

Harbors across the nation have experienced tremendous population growth in human powered vessels. While it is always positive to see new populations enjoying water sports the impact on the local community has been stressed. Most notably is the concern of the safety of these boaters when exposed to busy harbors and larger vessels that cannot maneuver quickly. The Harbor Patrol has started to create an educational outreach program to help these new boaters safely transition into our local harbors daily activities. The main focus will be on visual maps along with suggested "Rules of the Road" for these human powered craft. Before we debut this new program, we plan to do some public outreach with the community and other boating safety groups to ensure we have addressed all the needs of the community. (Attachment 2)

#### IV. Harbor Entrance Shoaling & new USCG Buoy 4A

There has been a growing sandbar off the South Jetty. The sandbar has now started to encroach on what would be the navigable waters. To ensure the safety of the boaters, the Harbor Patrol has worked with the US Coast Guard and deployed a new navigational buoy, 4A, adjacent to the South Jetty. The Harbor Patrol has begun an aggressive public outreach to educate boaters of this change. Copies of the most current soundings have been distributed to all the Marinas and made available for the commercial fleet. The Buoy is highlighted in the attached soundings (Attachment 3).

#### V. Notable Rescue by Staff

The Harbor Patrol performs numerous notable rescues throughout the year and would like to start highlighting some of these. This month's notable rescue was on the evening of October 11. The Ventura Harbor Patrol received a call from the US Coast Guard who reported a disabled vessel in distress near the surf line somewhere South of Ventura Harbor. The US Coast Guard had no vessels to assist and requested we respond immediately, but warned us the vessel had no marine radio, GPS, or navigational lights, which further complicated the situation. Our Officers departed the harbor in the dark in search of the reported disabled 27' vessel with four passengers and two dogs aboard. While searching, they determined the vessel was outside our typical boundaries, but utilized sound judgment, and continued South due to the urgency. Our Officers finally located the disabled vessel just off Embassy Suites in Oxnard. The vessel was dangerously close to the waves and only had a small anchor attached to the stern of the vessel. Our Officers skillfully maneuvered in the dark into the dangerous conditions and was able to get a line on the vessel and tow them to safer waters. This rescue demonstrated our staff's exceptional skillset in what would be best described as extremely hazardous conditions. The action taken that night by Officers Jon Freeman and Bobby Crane directly preserved the lives of the four persons aboard the vessel, as well as, prevented a pollution event.

#### VI. California Harbormaster & Port Captains Conference

I attended the CHAPCC Conference the first week of October. This conference was incredibly valuable in my new position as Harbormaster. I was able to develop personal and professional relationships with the leaders in this industry. The training consisted of many relevant topics and included question and answer time so that the group could collectively share their experiences in their respective Harbors. The conference also included vendors and professionals in the marine industry. I took away knowledge, skills, contacts, and resources that I will be able to draw upon during my daily duties as the Harbormaster.

# MEMORANDUM

DATE:October 17, 2015TO:Board of Port CommissionersFROM:Harbormaster John HigginsSUBJECT:Ordinance 44 Strategic Plan

The Port District has started a complete review of our relationship with the City of Ventura, Ordinance 44, and the Harbor Patrols Enforcements Options. As we begin this process we feel it would be best served to the Port District to take a methodical approach to studying and evaluating each of the components listed above as each compliments the other.

To ensure success in the review it seemed responsible and logical to try to first look at our current relationship with the City and its resources that may be available to us. The focus of future talks with the City will be to try to formally revisit our relationship as a special district within the City. During this process we would hope to identify any opportunities to utilize City Resources and share authority to enforce each other's Codes. In reviewing a 1978 memo from then Police Chief McLean there is a clear statement that the City Police Department can enforce all our ordinances under California Penal Code 830.1(a). This same document references the Harbor Patrols territorial boundaries include the entire City of San Buenaventura but only mentions that the enforcement of Harbor Ordinances within this area would depend upon the subject matter of the Ordinance. It would be mutually beneficial to clarify this concept and clearly define if we could enforce the Cities Civil and Municipal Code.

In large Ventura Harbors Ordinance 44 is a sound document and is effectively utilized in the management of the Harbors properties and activities. The ordinances penalty system is built upon the Infraction which is a public offense, but arguable not a crime, and is not punishable by imprisonment. Any person convicted of an infraction may only be punished by a fine. Currently, the Court system does not pursue collections of unpaid fines so at times there may be people who may continue to violate the ordinance since there is really no penalty enforced. The City on the other hand utilizes both a Civil and Municipal Code that includes Infractions and Misdemeanor's. A misdemeanor is considered a crime and is punishable with both a fine and a potential for jail. Including our ability to utilize these options without a doubt would result in a higher level of compliance. Failure to pay the Cities Civil Code results in either being sent to Collections, in a property owner/business a Tax Assessment, and under the Municipal Code the misdemeanors would result in a warrant for their arrest.

The Harbor Patrols authority to enforce laws and ordinances is granted under the Harbors and Navigation Code 663.5, the California Penal Code 830.33(b), and by direction of the General Manager. The primary mission is to ensure boating safety & education. The Harbor Patrol is very diverse in its duties and has had great success in the performing these services with limited claims to the District. The Enforcement direction given by the General Manager is to enforce the Ventura Harbor Ordinance, boating law, and specific sections of other codes that relate to their primary duties. The Harbor Patrol is not trained, equipped or sufficiently staffed to other criminal acts that occur within the District. The

Ventura Police Department is responsible for handling those calls. The goal moving forward will be to increase interactions and training with the Ventura Police Department. It is our hope that by strengthening our relationship and clearly defining our roles that we can be more efficient in the enforcement of laws and ordinances within the harbor.

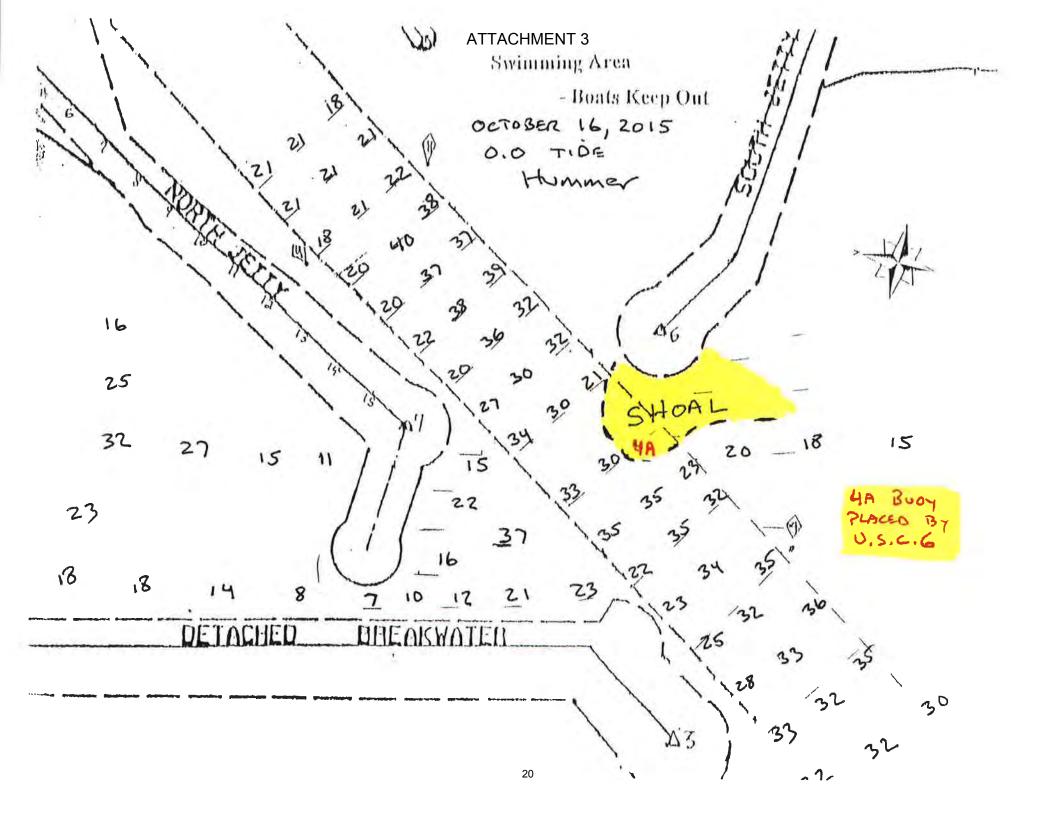

In conclusion, the multi part approach to reviewing Ordinance 44 will be an ongoing endeavor with a completion goal to be within the fourth quarter. At strategic points we will bring in different resources to assist us. With stronger relationships and formalized agreements established with the City Departments we can ensure this Ordinance is equally relevant to the City Departments. The goal of the end product will be a sound document that will allow for the complete management of our Harbors issues and concerns.

#### Elements of Plan:

Meet with City Manager to discuss the Port Districts Relationship with the City. Enter in to a clear agreement on what relationships can be improved upon Meet with Port District Staff to develop goals and needs for an Ordinance Revision Create a working group to obtain other California Harbor Ordinances for examples Work with Legal Team to develop sound Ordinances and Policies to address the needs of the Community Start the Ordinance Submittal Process Train with local Police and Code Enforcement moving forward

# VENTURA PORT DISTRICT

DEPARTMENTAL STAFF REPORT

| TO:      | Board of Port Commissioners    |
|----------|--------------------------------|
| FROM:    | Frank Locklear, Marina Manager |
| SUBJECT: | Marina Report                  |

## I. Fish Pier Jib Crane

The new one ton fish pier derrick crane has not been placed back into operation.

The original #1 fish crane is operational and remains in use on the fish pier. This crane has been in active use during September offloading Prawns, Sea Urchins, Sea Cucumber and crab.

## II. Market Squid Offloading

In September, all three companies, Del Mar, Ventura Packers and DeLuca Seafoods (formally State Fish Seafoods) engaged in squid offloading activities in Ventura Harbor.

Total squid offloading activity for the month was 4,194,003 pounds. This converts to 2,097.0 short tons. This is considered to be light total squid production, but not uncommon for the month of September. Ventura remains the number one landing for squid during this period.

DeLuca Seafoods is completing the installation of a semi-automated delivery system for adding ice to the squid totes during the offloading process. Currently, this process is completed by men physically adding ice with shovels during the offloading process. Completion of this process will increase the speed of production at the offloading station. Del Mar and Ventura Packers have the semi-automated ice process in use.

## III. Ventura Harbor Village Marina Occupancy

September slip occupancy exceeded 90% during the month of September. Transient seine squid vessels continue to arrive in the harbor. Some of the transient vessels have been temporarily accommodated in the Ventura slips of tenants that lease alternate slips in San Pedro and at other locations.

## VENTURA PORT DISTRICT DEPARTMENTAL STAFF REPORT

# **OCTOBER 28, 2015**

# **BOARD OF PORT COMMISSIONERS**

# **CONSENT AGENDA ITEM A**

**APPROVAL OF FINANCIAL STATEMENTS AND CHECKS** 

# **VENTURA PORT DISTRICT**

BOARD COMMUNICATION

Meeting Date: October 28, 2015

TO:Board of Port CommissionersFROM:Gloria Adkins, Accounting ManagerSUBJECT:Approval of Financial Statements and Checks

## **RECOMMENDATION:**

That the Board of Port Commissioners adopt Resolution No. 3287 to:

- a) Accept the following financial statements: July 2015 and August 2015; and
- b) Review the payroll and regular checks for July 2015 and August 2015

#### SUMMARY:

Attached for the Board's review are the financial statements for the fiscal periods ending July 31, 2015 and August 31, 2015 and the regular accounts payable checks for the months of July and August 2015.

#### BACKGROUND:

The July and August financial statements represent the first two months of the current fiscal year. Supplementary Notes ("Notes") included with the financial statements reflect the budget-to-actual variances for both months in the one report. The Notes have been placed directly behind the Statement of Income and Expenses report for the month of August (Attachment 3).

#### **Disbursements**

The accounts payable check registers for July and August 2015 are located after all the financial statement documents as Attachments 4 and 5, respectively. The registers include a brief description of the purpose for each check. Directly behind the check registers, you will find details of the charges made through the District's Chase Bank credit cards for July and August 2015 as Attachments 6 and 7, respectively.

I have explained some of the major accounts payable check expenditures below. (Regular payments such as monthly service contracts, utilities, legal services, etc. are not shown below as they are recurring each month.):

July 2015 -

- LA PartyWorks Inc. was paid \$14,784 on 7/2/15 as a deposit on the pirate production group hired to perform and stroll through the Village during Pirate Days.
- Thermal Alliance was paid \$9,390 on 7/2/15 to purchase and install an HVAC system for Wild Local Seafood as part of his tenant improvements.
- Kristen Beinke was paid \$6,500 on 7/9/15 for two and half days of photo shoots with professional models for photographs throughout the Village to be used for promotional purposes on the website and literature.
- Department of Parks and Recreation was paid \$204,616 and \$89,716 on 7/16/15 for the annual debt service payments for the two Division of Boating and Waterways loans.
- Downtown Ventura Partners was paid \$11,400 on 7/16/15 for Big Belly ads and for advertising as per the Trolley Partnership agreement for July – December 2015.
- Horizons Communications Tech Inc was paid \$9,832.33 on 7/16/15 as a progress payment on the Village fiber optic WiFi project.

 Downtown Ventura Partners was paid \$12,000 on 7/30/15 for July – Dec 2015 as per the Trolley Partnership agreement.

August 2015 -

- Andres Fernandez was paid \$15,000 on 8/5/15 for tenant improvements as per his tenant lease agreement for The 805.
- Wild Local Seafood was paid \$20,000 on 8/21/15 for tenant improvements as per his tenant lease agreement.
- California JPIA was paid \$7,627 on 8/27/15 for the annual All Risk Property Insurance premium.
- RRM Design Group was paid \$10,142 on 8/27/15 for services pertaining to the Village accessibility planning assistance.

#### Payroll Disbursements

The District has 26 bi-weekly pay periods per year; ten months of the year will have two regular payroll periods and two months will have three regular pay periods. The payrolls of \$130,353 for July 2015 and \$128,387 for August 2015, both reflect two regular pay periods.

#### FISCAL IMPACT:

The Statement of Income and Expenses financial reports reflect a decrease in the 'Change in Net Position' for the periods ending 7/31/2015 and 8/31/2015 of \$397,578 and \$286,796, respectively. This decrease in financial position is directly related to the funds being paid out for the annual debt service payments in July. The 'Change in Net Position' will cumulatively improve as normal operations continue each month.

## ATTACHMENTS:

Attachment 1 – Resolution No. 3287

Attachment 2 – Statement of Income Expenses – Period Ended July 30, 2015

Attachment 3 – Statement of Income Expenses – Period Ended August 31, 2015

Attachment 4 – Accounts Payable Check Register for July 2015

Attachment 5 – Accounts Payable Check Register for August 2015

Attachment 6 – Chase Credit Card Charges July 2015

Attachment 7 – Chase Credit Card Charges August 2015

# **RESOLUTION NO. 3287**

# RESOLUTION OF THE BOARD OF PORT COMMISSIONERS OF THE VENTURA PORT DISTRICT CONSENTING TO THE ACCEPTANCE OF THE FINANCIAL STATEMENT AND APPROVAL OF CHECKS

**BE IT RESOLVED** by the Board of Port Commissioners of the Ventura Port District, that:

- A. The Financial Statements for July and August 2015;
- B. The following Checks are hereby reviewed:
  - 1) Payroll Checks #8955-8969 and direct deposits inclusive in the amount of \$130,353 for July 2015 salaries and \$128,387 for August 2015 salaries.
  - 2) Regular Checks #42279-42660 in the amount of \$597,484 for July 2015 expenditures and \$203,783 for August 2015 expenditures.

**PASSED, APPROVED, AND ADOPTED** at a Regular Meeting of the Board of Port Commissioners of the Ventura Port District held on October 28, 2015, Resolution No. 3287 was adopted by the following vote:

AYES: NOES: Abstain: Absent:

Attest:

Chairman

Secretary

# Supplementary Notes to the Statement of Income and Expense for the period ending August 31, 2015 – Budget to Actual Analysis.

Please note, it is very early in the fiscal year to start analyzing why we are/are not in line with the monthly budgeted figures.

#### **Operating Income:**

**Parcel Lease Income** – (exceeds budget \$8,112) This category reflects the cumulative balance for master tenants. The month of July exceeded the budget by \$7,284. This is primarily due to Ventura Isle Marina's sales being a little higher than anticipated.

Harbor Village Lease Income – (exceeds budget \$44) The category is right in line with the budget at this time.

**Commercial Fishing** – (exceeds budget \$3,071) Commercial Fishing revenue is in line with the budget at this time. However, our Marina Manager has informed us that there has been little to no squid offloading for the past several weeks. Historically, we budget for offloading activity from August through November. We will begin to see a variance for this category in the upcoming months reflecting the non-activity.

#### **Operating Expenses:**

Personnel Expenses – (under budget \$27,850) Most of the personnel categories are under budget.

- Salaries and wages and under budget for July and August by \$20,822. This is primarily due to the contingencies included in the budgeted wages. The contingencies are spread out equally over all the pay periods.
- The other personnel expenses are over budget \$7,179. This variance is spread out over all the categories in this section and is not unreasonable.

**Bidg Maint** – (under budget \$37,749) This category is under budget at this time primarily due to all of staff's resources focusing on the many tenant improvements and accessibility improvements that are going on in the Village at this time.

**Marketing and Promotions** – (under budget \$11,250) Marketing's monthly expenditures can vary greatly from the monthly budget distribution based on many factors. One such example is the printing of brochures and event cards. Each printing can be upwards of \$2,000. Supply and demand varies and does not always correspond with monthly budget distribution.

Utilities - (under budget \$11,005) This category consists of water, electricity, gas and trash expenses.

- Water is under budget by \$5,660.
- Electricity is under budget by \$2,615.
- Gas is under budget by \$640, and
- Trash is under budget by \$2,090 to date.

It is anticipated the water usage will increase beyond budget on the next reading due to the increased number off commercial fishing vessels occupying slips at the Village while waiting for the squid to become active.

# **BOARD OF PORT COMMISSIONERS**

# **STANDARD AGENDA ITEM No. 1**

**ANNUAL RESERVE POLICY REVIEW** 

# **VENTURA PORT DISTRICT**

BOARD COMMUNICATION

Meeting Date: October 28, 2015

| TO:      | Board of Port Commissioners  |
|----------|------------------------------|
| FROM:    | Oscar Peña, General Manager  |
| SUBJECT: | Annual Reserve Policy Review |

#### **RECOMMENDATION:**

That the Board of Port Commissioners accept the current Ventura Port District Reserve Policy, dated August 28, 2013 (Resolution No. 3225).

#### SUMMARY:

The last time the Reserve Policy was brought before the Board for review was August 28, 2013. Legal Counsel and staff have reviewed the current policy and have determined that no changes are necessary at this time.

#### BACKGROUND:

The prudent management of the District requires that reserve funds be established and maintained to fund scheduled and unscheduled expenses. It is good practice to review the Reserve Policy annually.

In Resolution No. 3225, the Board revised the policy so that the Unrestricted Reserve balance would be equal to 40% of the operating budget to ensure service continuity. Any unrestricted reserve funds in excess of such minimum reserve are to be moved to the Capital Improvement Reserve Fund at the end of each fiscal year.

At this time the District has two reserve funds that are mandated; the Dredging Reserve and the Fisheries Complex Reserve. The Dredging Reserve is mandated by a lawsuit judgment and the Fisheries Complex Reserve is mandated by the language in a tenant lease.

#### FISCAL IMPACT:

None

#### **ATTACHMENTS:**

Attachment 1 - Resolution No. 3225 Reserve Policy dated August 28, 2013

#### **RESOLUTION NO. 3225**

#### RESOLUTION OF THE BOARD OF PORT COMMISSIONERS OF VENTURA PORT DISTRICT ADOPTING A RESERVE POLICY

WHEREAS, the Ventura Port District ("District") manages and operates a commercial and recreational boat harbor in the City of San Buenaventura, for the benefit of the city residents and the public generally; and

WHEREAS, the District maintains funds in unrestricted and restricted accounts for such purposes as capital improvements, debt service and emergency and disaster response; and

WHEREAS, the prudent management of the District requires that reserve funds be established and maintained to fund scheduled and unscheduled expenses, and to identify the amount of funds specifically dedicated for each purpose and to provide periodic review of the reserve funding levels to ensure such levels are and will be adequate to meet the projected needs of the District; and

WHEREAS, the Board of Port Commissioners has previously determined that it is in the best interest of the District to establish dedicated and restricted reserve funds for various purposes and to implement a formal policy regarding the level of funding and use of such reserve fund; and

WHEREAS, the Board of Port Commissioners adopted Resolution No.3190 on June 27, 2012, establishing the Ventura Port District Reserve Policy; and

WHEREAS, the Board of Port Commissioners has determined that it is in the best interest of the District to revise the District's Reserve Policy in the following manner: (i) all unexpended Unrestricted Reserve funds in excess of the minimum reserve amount will be transferred to the Capital Improvement Reserve Fund; and (ii) to allow for the balance of the Capital Improvement Reserve Fund to appreciate if necessary.

NOW THEREFORE, THE BOARD OF PORT COMMISSIONERS OF VENTURA PORT DISTRICT IS HEREBY RESOLVED, that the District's Reserve Policy adopted by Resolution No. 3190 on June 272012 be deleted in its entirety and replaced as follows:

- 1 -

#### VENTURA PORT DISTRICT RESERVE POLICY

1) The District will maintain sufficient revenues to meet its operating expenses, debt service, depreciation expenses, and prescribed reserves.

2) The District will hold cash and/or investments in reserve as authorized by the District's Investment Policy, and in accordance with state and federal laws.

3) The District reserves should be examined and adjusted each year based on the operating surplus or deficit at the conclusion of each fiscal year, according to reserve fund prioritization.

4) The District will maintain a reserve of cash and/or investments for both unrestricted and restricted purposes as follows:

Unrestricted Reserve: Unrestricted reserve funds are to be used to ensure the continued orderly operation of Ventura Harbor. Such funds are primarily to be used for operations and maintenance within the Harbor and are intended to provide a mechanism for the District to immediately undertake unanticipated operation and maintenance activities and to manage cash-flow fluctuations, including emergency repairs. A minimum reserve equal to 40% of the operating budget will be maintained to ensure service continuity. Any unrestricted reserve funds in excess of such minimum reserve amount that is not expended as of the last day of the then-current fiscal year will be moved to the Capital Improvement Reserve Fund.

The District Accounting Manager should invest unrestricted reserve funds in liquid money market accounts such as LAIF, so that the funds are immediately available for District use.

- Restricted Reserves: Restricted reserve funds are to be set in the following amounts and used for the specific purposes for which the restricted reserve funds are created. At the present time, the District maintains the following restricted reserve funds:
  - **Capital Improvement Reserve Fund**: The Capital Improvement Reserve Fund is intended to establish available cash assets to fund capital expenditures to support the future capital needs of the District in accordance with the District's Capital Improvement Plan. The level of funding in this reserve fund for the next fiscal year should be established based on the projected need to pay for planned and unplanned capital improvements for such fiscal year. In establishing the level of funding based on the projected need to pay for planned and

- 2 -

Resolution No. 3225

unplanned capital improvements for any given fiscal year, the District may, but shall not be obligated to, take into account unexpended reserve funds from year-to-year and accumulations thereon including, but not limited to, any unrestricted reserve funds transferred to the Capital Improvement Reserve Fund. The minimum balance maintained should be at least equal to the asset depreciation for the preceding fiscal year.

**Dredging Reserve Fund:** The funds in the Dredging Reserve Fund are required to be maintained at a minimum level of \$3,000,000 in order to comply with a judgment entered against the District in 1979. Funds in the Dredging Reserve Fund are to be used solely and only to pay the cost of dredging and related activities to maintain appropriate water depths in the channels into and within the Harbor, and specifically in the Stub Channel providing water access to Ventura Keys.

**Fisheries Complex Reserve Fund:** Funds deposited in the Fisheries Complex Reserve Fund are intended to provide funding to upgrade and improve the District's commercial fishing pier. The District has a policy of requiring tenants involved in commercial fishing operations to contribute toward the cost of improving the commercial fishing pier when they renew their leases. All payments received from such commercial fishing tenants are deposited in the Fisheries Complex Reserve Fund and will be used to pay the cost of improving and upgrading the pier when it becomes necessary to do so.

The Accounting Manager of the District shall invest funds held in these restricted reserve funds in secure accounts such as LAIF and invested in accordance with the District's investment policy.

5) At least annually the Board should review all reserve accounts and make a determination regarding the continuing need for and purposes of the reserve funds, the appropriate levels of accumulation and the conditions precedent to utilization of the reserve funds.

6) When additional reserve funds are to be established, they should be established by Board resolution, which should include:

- (a) A statement of the purpose for which the reserve is created;
- (b) To the extent possible, specification of minimum and maximum parameters for the accumulation of the monies in the reserve fund; and

- 3 -

#### Resolution No. 3225

(c) Specification of the conditions under which reserve funds shall be expended or transferred, consistent with Board directives.

7) This Ventura Port District Reserve Policy shall become effective on the date of its adoption and District staff is hereby directed to take all actions necessary to implement this Policy and to maintain the designated reserve funds.

PASSED AND ADOPTED at a regular meeting of the Board of Port Commissioners of the Ventura Port District held on August 28, 2013

Chairman

ATTEST:

STATE OF CALIFORNIA)COUNTY OF VENTURA)CITY OF SAN BUENAVENTURA)

I, Everard Ashworth, Secretary of the Ventura Port District, a public corporation, do hereby certify that the above and foregoing Resolution No. 3225 was duly passed and adopted by the Board of Port Commissioners of said District at a regular meeting thereof held on the 28<sup>th</sup> day of August 2013, by the following vote:

AYES:Commissioners Ashworth, Bravo, Friedman, Smith and Chairman CarsonNOES:None

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of said District this 28<sup>th</sup> day of August 2013.

Secretary

(Seal)

Resolution No. 3225

# **OCTOBER 28 2015**

# **BOARD OF PORT COMMISSIONERS**

# **STANDARD AGENDA ITEM NO. 2**

**PROPOSED VENTURA HARBOR MARINA** 

AND YACHT YARD EXPANSION

## **VENTURA PORT DISTRICT**

STANDARD AGENDA ITEM 2

BOARD COMMUNICATION

Meeting Date: October 28, 2015

TO:Board of Port CommissionersFROM:Brian Pendleton, Business Operations ManagerSUBJECT:Status of Proposed Ventura Harbor Marina and Yacht Yard Expansion

#### **RECOMMENDATION:**

That the Board of Port Commissioners receive a report on the status of the Final Initial Study -Mitigated Negative Declaration for the Ventura Harbor Marina and Yacht Yard Expansion dated October 2015, as well as the status of subsequent plan submittals to the Ventura Port District pursuant to the Ground Lease with Ventura Harbor Marine Associates, LLC, including, without limitation, "schematic plans" subject to the "Ventura Harbor Minimum Entrance Channel Plan" prepared by Noble Consultants, Inc.

#### SUMMARY:

Pursuant to the California Environmental Quality Act (CEQA), an Initial Study - Mitigated Negative Declaration (IS-MND) for the Ventura Harbor Marina and Yacht Yard Expansion was prepared with the assistance of Rincon Consultants, Inc. (Attachment 1). The Port District is the Lead Agency and, therefore, must consider approval of the Final IS–MND.

#### BACKGROUND:

The proposed project involves expansion and improvements of the existing Ventura Harbor Marina and Yacht Yard (VHMYY) to increase the number of boat slips from 40 to 80 (40 new boat slips). The proposed expansion involves removing the existing dock structure, concrete ramps, a portion of the existing pier, and fuel docks; construction of an expanded dock structure; relocation of the fuel dock; onshore parking improvements; and other related facility improvements. Figure 3 shows the proposed structures to be removed. Figure 4 shows the proposed new site plan, and figures 5, 6 and 7 show the current and possible future parking lot layouts, depending upon final parking requirements for the project as determined by the City of Ventura. Based on preliminary communications between the City and Port District regarding parking stall requirements for boat slips, the applicant prepared Figure 7 which includes a greater number of parking stalls at 123 versus Figure 6 at 111 (Figures can be found in the IS-MND). The City will make a formal determination of parking requirements as part of their approval of the landside improvements. The expanded dock would extend further into the main channel of Ventura Harbor as compared to the existing dock, but would be consistent with the channel limit as prepared by Noble Consultants, Inc. "Ventura Harbor Minimum Entrance Channel Plan" (Attachment 2).

The DRAFT IS-MND was circulated for a 30-day public review period that began on August 7, 2015. The Port District received seven comment letters on the Draft IS-MND. The letters and responses to the letters are part of the FINAL IS–MND contained in Appendix E. Additionally Harbormaster John Higgins has requested the project include some form of lateral markers for boats departing and returning to the harbor to ensure safe navigation. Mr. Sam Sadove, Manager for Ventura Harbor Marine Associates LLC has agreed to work with Mr. Higgins and Port District staff to reach a mutually agreeable solution.

Ventura Harbor Marine Associates; LLC (Lessee) will need to seek project approvals from other regulatory bodies including but not limited to the California Coastal Commission, U.S. Army Corps of Engineers, Los Angeles Regional Water Quality Control Board and the City of Ventura

(landside improvements). Lessee will be required to submit subsequent "preliminary plans" and "working drawings" to the Port District for approval pursuant to the Ground Lease.

FISCAL IMPACTS:

None

### 8. Description of Project:

The proposed project involves expansion and improvements of the existing Ventura Harbor Marina and Yacht Yard (VHMYY) to increase the number of boat slips from 40 to 80 (40 new boat slips). The proposed expansion involves removing the existing dock structure, concrete ramps, a portion of the existing pier, and fuel docks; construction of an expanded dock structure; relocation of the fuel dock; onshore parking improvements; and other related facility improvements. Figure 3 shows the proposed structures to be removed, Figure 4 shows the proposed new site plan, and figures 5, 6, and 7 show the current and possible future parking lot layouts. The expanded dock would extend further into the main channel of Ventura Harbor as compared to the existing dock, but would be consistent with the channel limit considered by the Ventura Port District Commission in June 2014 (see Figure 8).

The fuel dock would also be improved. Improvements to the fuel dock would include:

- Improvements to feeder lines and new digital fuel pumps, which would provide a higher pump capacity
- Extended hose length on retractable rollers to enable docked commercial boats in that section of the dock to be fueled at their slips
- Spill resistant nozzles built to current code requirements
- Easy access kill switches
- New gauges and a stable, new docking area

Other proposed improvements would include:

- Develop an Americans with Disabilities Act (ADA) compliant ramp on the promenade walkway which would span the distance of the marina and connect to adjacent public walkways.
- Provide new restroom/shower facilities in addition to existing facilities. The new facilities would be located in the parking lot in the northwest corner of the project site, near the new ADA ramp. Currently, the project site has facilities with two toilets and showers. The proposed project would involve adding another facility with two toilets and two showers and a facility with two toilets and one shower.
- Increase the number of bait receivers from three fixed units to five new units. Three of the five new units would be free-standing and designed to be relocated when needed. Two would be semi free-standing.
- Provide transient dockage in excess of 60 feet on the western walkway.
- Expand private boater slips, including some doublewide slips to potentially provide dockage for multi-hull vessels.
- Overhaul and expand the haul and launch facilities for boaters. Improvements include filling holes in the cement pier to improve safety and extending the pier by 10 feet in order to hoist larger boats.
- Increase capacity for larger and transient boat electrical power hookups to provide 100 AMP connections.
- Raise piling heights an additional five feet over the existing height for better potential tsunami protection (from 12 feet above mean lower low water [MMLW] to 17 feet above MMLW).
- Install keyless card system for docks and the facilities to provide better safety and security.
- Reconfigure and re-pave the existing parking lot adjacent to the marina to accommodate an additional 5-17 parking spaces. This would bring overall onsite parking to 111-123 spaces. This component of the project would require removal of several mature palm trees and other landscape elements.
- Upgrade existing on-site storm drain inlets with sand filters to reduce trash and debris from entering harbor water.
- Upgrade an existing three-inch diameter water pipe on the dock to six inches to comply with current Code requirements.

Material to be removed as part of the demolition would include approximately:

- 20,320 cubic feet of cement
- 20,320 cubic feet of wood
- 83 wood pilings
- 20 12" x 12' beams
- 40 4" x 20' cross beams

The Ventura Harbor Marina and Yacht Yard currently has 120 day sail/dry storage slips. The number of slips would not change with the proposed project. The proposed project may generate a minor increase in boating activity as the number of slips would increase. However, the amount of increase cannot be predicted at this time. The number of boats fueled at the

existing fuel dock can range from about 2 to 6 Monday through Thursday and 15 to 30 on weekends. Use of the fuel pumps may incrementally increase with the proposed project due to the increase the number of boat slips. However, the amount of increase cannot be predicted at this time and would be minimal relative to the overall number of boats that use the fuel pumps (there are currently about 1,500 total boat slips in Ventura Harbor so the 40 new slips would represent an overall increase of less than 3%). In addition, the relocation of the fuel dock would allow some commercial boats to be fueled in their slips which would decrease activity to and from the fuel pumps. Relocation of the fuel dock would also allow easier navigation to the dock as prevailing winds would help guide boats to the dock.

Construction of the new dock would occur in two phases. Phase 1 would involve replacing the east side of the dock structure. During this phase, boats would be moved to the other side of the docks. During Phase 2, the opposite would occur: the west side of the docks would be replaced and boats would be docked on the east side. Each phase of construction would take 4-6 months. Parking lot repaving and improvements would occur between phases 1 and 2 and is expected to take approximately four days. Visitors to the site during this time would be able to park in Port District parking areas during this time. Shuttle bus service may from parking areas to the site may be provided if there is demand for such a service.

The existing marina currently has seven residents who live on four docked boats (residents who live at the marina are called "liveaboards"). With the increase in the number of boat slips as a result of the proposed project, the number of liveaboards could increase. However, the exact number of future liveaboard residents with the proposed project is unknown at this time. In addition, the number of liveaboard residents is controlled by the marina operator. The number of allowed liveaboards is based on the number of available restroom facilities. Each toilet/shower can serve about five liveaboards (California Division of Boating and Waterways, 2005). Currently, the marina has two toilets and two showers; therefore, up to ten liveaboards are allowed. The proposed project would add up to four additional toilets and three additional showers; therefore, based on the three new showers, the number of liveaboards could increase by 15. For the purposes of this analysis, it is assumed that the proposed project could accommodate an additional 15 residents.

## 9. Surrounding Land Uses and Setting:

The project site is located in the northern portion of the Ventura Harbor in the City of Ventura. The Ventura Harbor is a 274-acre multiple use recreational and commercial fishing small craft harbor owned by the Ventura Port District (the "District"). The District's current property holdings include approximately 152 acres of land and 122 acres of water area. Construction was completed and the Harbor commenced operations in 1963 (Ventura Port District website, accessed February 2015).

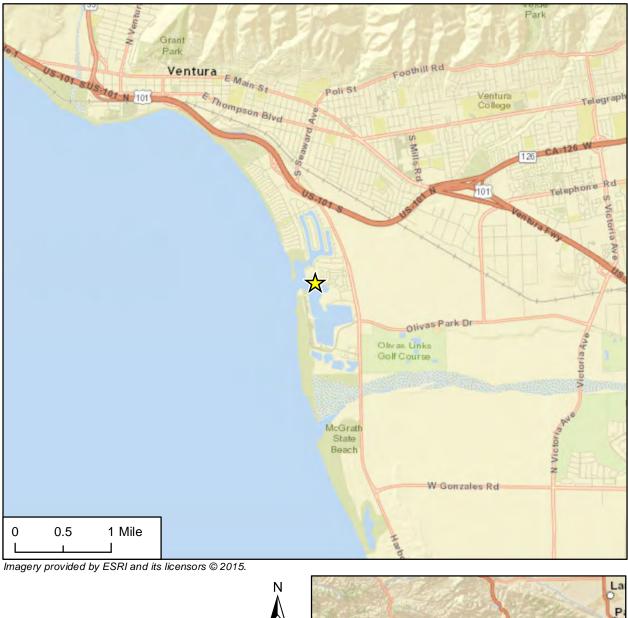

To the south of the project site are additional facilities and marinas within the Ventura Harbor. To the north across Anchors Way Drive are residential uses (Ventura Marina Mobile Home Park). Directly to the west of the project site is the Harbortown Point timeshare complex, which is a community of time share residences. Directly to the east of the project site are public boat launch ramps and an open field pending construction. The project site (Parcel 20 of the Ventura Harbor) includes a restaurant (Rhumb Line – The Sunset Restaurant), a yacht yard, a small building that houses a sportfishing charter group, a real estate office and a fuel dock/convenience store. Figure 9 shows photos of the project site.

### 10. Other Public Agencies Whose Approval is Required:

The Ventura Port District would have approval authority over the proposed marina expansion. The following other public agencies approval would be required:

- California Coastal Commission (approval of a Coastal Development Permit)
- U.S. Army Corps of Engineers (permit under Section 10 of the U.S, Rivers and Harbors Act of 1899)
- Los Angeles Regional Water Quality Control Board (Clean Water Act Section 401 Certification)
- City of Ventura (landside improvements)

# ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is "Potentially Significant" or "Potentially Significant Unless Mitigation Incorporated" as indicated by the checklist on the following pages.

| Aesthetics                  | Agriculture and Forest<br>Resources | Air Quality                           |
|-----------------------------|-------------------------------------|---------------------------------------|
| Biological Resources        | Cultural Resources                  | Geology/Soils                         |
| Greenhouse Gas<br>Emissions | Hazards & Hazardous<br>Materials    | Hydrology/Water<br>Quality            |
| Land Use/Planning           | Mineral Resources                   | Noise                                 |
| Population/Housing          | Public Services                     | Recreation                            |
| Transportation/Traffic      | Utilities/Service Systems           | Mandatory Findings of<br>Significance |

# DETERMINATION

On the basis of this initial evaluation:

- I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- □ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- □ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potential significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

| a) | Have a substantial adverse effect on a scenic vista?   |                                      |  |                                    | •            |
| b) | Substantially damage scenic resources,<br>including, but not limited to, trees, rock<br>outcroppings, and historic buildings within<br>a state scenic highway? |                                      |  |                                    |              |
| c) | Substantially degrade the existing visual character or quality of the site and its surroundings?   |                                      |  | •                                  |              |
| d) | Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?   |                                      |  | •                                  |              |

#### *a)* Would the project have a substantial adverse effect on a scenic vista?

Existing views on and around the project site are of the foothills to the east and Ventura Harbor and the Channel Islands in the distance to the west. Views of the Pacific Ocean beyond Ventura Harbor from the project site and from areas north and east of the project site are also limited due to existing development and to the break wall that protects the entrance to the harbor.

The proposed project involves expansion of an existing marina and associated facilities. The proposed project would replace existing dock structures with new expanded docks with additional boat slips. Piling heights would be raised an additional five feet (from 12 feet above MLLW to 17 feet above MLLW) over the existing height for better potential tsunami protection. However, the new docks would not block views of the harbor, the Pacific Ocean, or the foothills to the east and the increased height of the structures would not affect scenic vistas.

### NO IMPACT

# *b)* Would the project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

The project site is an existing marina and parking lot. The expanded dock would cover more of the water surface at the marina, but would not affect or block views of any designated scenic resources. The proposed project would involve repaving the parking and removing existing landscape trees and vegetation; however, all trees and vegetation are nonnative and none have

been designated as scenic resources. The project site does not contain any rock outcroppings or historic buildings.

# NO IMPACT

# *c)* Would the project substantially degrade the existing visual character or quality of the site and its surroundings?

The visual character of the project site is that of a typical marina. The project site includes a parking area and structures adjacent to the water line as well as ramps/walkways to the docks and boat slips in the water. The proposed project would involve replacement and expansion of the dock facilities and repaving of the parking lot. The expanded dock facilities would extend further into the water than the existing facilities and would accommodate larger boats and a larger number of boats. Therefore, surrounding uses would see an expanded dock area, additional docked boats, and larger boats. However, these changes would not substantially degrade the visual character of the site and its surroundings. In general, replacement of aging docks and related facilities with new facilities would be expected to enhance the visual character of the marina.

## LESS THAN SIGNIFICANT IMPACT

# *d)* Would the project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

Existing sources of light on the project site includes lighting for the existing restaurant, offices, and restroom facilities and safety-related lighting on the docks. Dock lighting is currently unshielded. Additionally, the adjacent development surrounding the project site generates nighttime light around the project site. The proposed project would involve replacing and expanding the dock structure. Therefore, the proposed project may involve additional lighting in the form of safety lighting on the docks. In addition, the increase of up to 15 liveaboards may incrementally increase lighting from the docks. However, the project site is surrounded on all sites by development with lighting and the proposed project would not substantially increase light levels such that nighttime views would be affected. In addition, new lighting would be low-watt lighting and would be shielded and pointed down towards the docks. Therefore, the proposed project may reduce light spillover.

Existing sources of glare on the project site include cars in the parking areas, light-colored exteriors of docked boats, and building windows. There are no extraordinary glare sources on the project site. The proposed project would involve adding boat slips on the project site. Therefore, additional boats may be present, which may incrementally increase glare. However, this change relative to existing conditions would not be substantial.

Per Section 24.415.20 of the Ventura Municipal Code plans for parking areas containing ten or more spaces must be considered and approved pursuant to the City's design review process prior to construction.

# II. AGRICULTURE AND FOREST RESOURCES

-- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment Project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. -- Would the project:

- a) Convert Prime Farmland, Unique Farmland, Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?
- b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?
- c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?
- Result in the loss of forest land or conversion of forest land to non-forest use?
- e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?

*a)* Would the project convert Prime Farmland, Unique Farmland, Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

The project site is not in agricultural use and is not designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Department of Conservation, 2012).

## NO IMPACT

b) Would the project conflict with existing zoning for agricultural use, or a Williamson Act contract?

The project site is zoned Harbor Commercial (HC) and is not zoned for agricultural use (City of Ventura Zoning District Map, January 2015). In addition, the project site is not under Williamson Act contract. The proposed project would not conflict with existing zoning for agricultural use or a Williamson Act contract (2005 Ventura County General Plan Final EIR, August 2005).

# NO IMPACT

*c)* Would the project conflict with existing zoning for, or cause rezoning of, forest land (as defined in *Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?* 

The project size is zoned Harbor Commercial (HC) and is not zoned as forest land or timberland (City of Ventura Zoning District Map, January 2015). The proposed project would not conflict with or cause rezoning of land zoned as forest land, timberland, or timberland production.

## NO IMPACT

d) Would the project result in the loss of forest land or conversion of forest land to non-forest use?

The project site is located within the Ventura Harbor and is not forest land.

## NO IMPACT

*e)* Would the project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?

The project site is zoned Harbor Commercial (HC) is located within the Ventura Harbor, and is not in agricultural production or adjacent to any land in agricultural production (City of Ventura Zoning District Map, January 2015).

## NO IMPACT

|      |  | Potentially<br>Significant<br>Impact | Potentially<br>Significant<br>Unless<br>Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No<br>Impact |

| III. | AIR QUALITY  |                                      |  |                                    |              |
|      | Would the project:   |                                      |  |                                    |              |
| a)   | Conflict with or obstruct implementation of the applicable air quality plan?   |                                      |  | -                                  |              |
| b)   | Violate any air quality standard or<br>contribute substantially to an existing or<br>projected air quality violation?  |                                      |  | -                                  |              |
| C)   | Result in a cumulatively considerable net<br>increase of any criteria pollutant for which<br>the project region is non-attainment under<br>an applicable federal or state ambient air<br>quality standard (including releasing<br>emissions which exceed quantitative<br>thresholds for ozone precursors)? |                                      |  | -                                  |              |
| d)   | Expose sensitive receptors to substantial pollutant concentrations?  |                                      |  |                                    |              |
| e)   | Create objectionable odors affecting a substantial number of people?   |                                      |  |                                    |              |

#### *a)* Would the project conflict with or obstruct implementation of the applicable air quality plan?

Federal and state ambient air quality standards for certain criteria pollutants have been established to protect human health. The project site is located within the South Central Coast Air Basin (SCCAB), which includes all of Ventura County, and is within the jurisdiction of the Ventura County Air Pollution Control District (VCAPCD). Ventura County is designated under the federal and state standards as nonattainment for 8-hour ozone and as nonattainment for the state 1-hour ozone standard (VCAPCD, 2007). The VCAPCD's Air Quality Management Plan, adopted in 2007, includes the County's strategy for attaining ozone standards.

Vehicle use, energy consumption, and associated air pollutant emissions are directly related to population growth. A project may be inconsistent with the AQMP if it would generate population exceeding the forecasts used in the development of the AQMP. The proposed project would involve adding up to 40 boat slips and could house up to an additional 15 people. Therefore, the proposed project may increase the population of the City by 15 people. As discussed in Section XIII, *Population and Housing*, such an increase in population is within regional and local growth projections. Therefore, it would be consistent with the population forecasts contained in the AQMP. Vehicle use, energy consumption, and associated air pollution emissions within the City would be comparable to existing conditions.

## LESS THAN SIGNIFICANT IMPACT

*b)* Would the project violate any air quality standard or contribute substantially to an existing or projected air quality violation?

Air pollutant emissions associated with the proposed project were estimated using the California Emissions Estimator Model (CalEEMod) (version 2013.2.2). The CalEEMod results for the proposed project can be found in Appendix A.

### Construction Impacts

Construction activities associated with the proposed project would involve repaving of the existing Rhumb Line restaurant parking lot, construction of additional restroom facilities, removal of the existing dock structures, and construction of new expanded dock structures Construction activities would generate fugitive dust particles, ozone precursors, and diesel exhaust that could result in an increase in criteria pollutants and could also contribute to the existing Ventura County nonattainment status for ozone. Table 1 summarizes the maximum daily emissions generated by construction activities.

| Pollutants                              | ROG | NOx  | со   | SO <sub>2</sub> | <b>PM</b> 10 | PM <sub>2.5</sub> |
|---|-----|------|------|-----------------|--------------|-------------------|
| Maximum Daily Emissions<br>(pounds/day) | 2.8 | 24.7 | 17.1 | 0.03            | 1.8          | 1.5               |

| Table 1                     |           |
|-----------------------------|-----------|
| <b>Project Construction</b> | Emissions |

Source: CalEEMod version 2013.2.2, summer emissions, Table 2.1 – "Overall Construction (Maximum Daily Emission)" See Appendix A for full results.

The VCAPCD has not adopted quantitative thresholds of significance for construction emissions since such emissions are temporary. Rather, the VCAPCD recommends implementation of emission and dust control requirements for all construction projects with ROG or NO<sub>X</sub> emissions over 25 pounds per day (VCAPCD, 2003). Since construction-related emissions of ROG and NOX would be below 25 pounds per day, no mitigation would be required.

## **Operational Impacts**

Air pollution emissions associated with operation of the proposed project include emissions associated with electricity and natural gas use (energy emissions), consumer products, landscaping equipment, and from vehicles traveling to and from the project site (mobile emissions). Operational emissions were calculated in CalEEMod based on the number of vehicle trips generated as a result of the project and the potential for additional on-site liveaboard residents. As shown in Table 2, operation of the proposed project would not generate emissions exceeding VCAPCD thresholds.

The increased number of slips may also generate a minor increase in boating activity in the harbor, which could incrementally increase emissions associated with such activity. However, emissions would be sporadic and would not be expected to approach VCAPCD daily thresholds.

|                                | ROG | NOx |
|--------------------------------|-----|-----|
| Emissions (pounds/day)         | 1.0 | 0.6 |
| VCAPCD Thresholds (pounds/day) | 25  | 25  |
| Exceed VCAPCD Thresholds?      | No  | No  |

Table 2Operational Emissions

Sources: Ventura County APCD Air Quality Assessment Guidelines, 2003; CalEEMod 2013.2.2. Table 2.2 "Overall Operational." See Appendix A for modeling results.

### LESS THAN SIGNIFICANT IMPACT

c) Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?

As discussed under parts (a) and (b), the proposed project would be consistent with the VCAPCD's Air Quality Management Plan and would not exceed VCAPCD emissions thresholds. Therefore, the proposed project would not result in a cumulatively considerable net increase of nay criteria pollutant for which the region is in non-attainment.

### LESS THAN SIGNIFICANT IMPACT

### d) Would the project expose sensitive receptors to substantial pollutant concentrations?

Certain population groups are considered particularly sensitive to air pollution. Sensitive receptors consist of land uses that are more likely to be used by these population groups. Sensitive receptors include schools, hospitals, and daycare centers. Residential areas can also be considered sensitive uses as they may include children and the elderly. The sensitive receptors closest to the project site are the residential uses approximately 150 feet northeast of the project site and the timeshare facility approximately 100 feet northwest of the project site. As discussed in parts b-c, the project would not generate emissions exceeding any VCAPCD significance thresholds; therefore, it would not expose sensitive receptors to substantial pollutant concentrations.

### LESS THAN SIGNIFICANT IMPACT

### e) Would the project create objectionable odors affecting a substantial number of people?

The proposed project would involve expanding the existing marina and repaving the parking lot. The existing uses currently may generate some odors from the fuel pumps and from idling boats. Odors would be comparable to a gas station where fuel pumps and idling vehicles are located and would be similar to those associated with the existing marina. Marinas, yacht yards, and fuel pumps are not identified in Table 6-3 of the 2003 Ventura County Air Quality Assessment Guidelines, which identifies land uses that may generate significant levels of odors. The fuel pump could generate diesel odors, but would not be expected to increase odors as compared to the existing pump and would not be located in proximity to any odor-sensitive uses. Therefore, the proposed project would not generate objectionable odors affecting a substantial number of people.

### LESS THAN SIGNIFICANT IMPACT

# **Methodology**

This biological resources assessment consisted of a review of relevant literature followed by a field reconnaissance survey. The literature review included information on sensitive resource occurrences from the California Department of Fish and Wildlife (CDFW) California Natural Diversity Data Base (CNDDB), Biogeographic Information and Observation System (BIOS – http://www.dfg.ca.gov/biogeodata/bios/), and U.S. Fish and Wildlife Service (USFWS) Critical Habitat Portal (http://criticalhabitat.fws.gov). The Ventura Harbor Public Launch Ramp Replacement Biological Resources Assessment (Rincon Consultants, February 2012), and the Essential Fish Habitat (EFH) Evaluation (Compliance Biology, February 2012), Ventura Port District Maintenance and Repair of Rock Revetment Special Condition (2011) permit, Ventura Port District & Sondermann Ring Partners Special Condition Permit (2012). Aerial photographs were also examined.

The field reconnaissance survey documented existing site conditions and the potential presence of sensitive biological resources, including sensitive terrestrial and aquatic species, and habitat for nesting birds. The field biologist surveyed the project site on foot and recorded the biological resources present, such as plant and wildlife species. The field survey was conducted on 19 February 2015, between the hours of 1200 and 1300. The tide was at approximately +3 feet (http://tides.mobilegeographics.com/locations). Weather conditions during the survey included an average temperature of 70 degrees Fahrenheit, with winds of 0-8 kilometers per hour (0-5 miles per hour) and partly cloudy skies.

The potential presence of sensitive species is based on a literature review and field survey designed to assess habitat suitability only. The findings and opinions conveyed in this report are based on this methodology. Please note that definitive surveys to confirm the presence or absence of special-status species were not performed. Definitive surveys for sensitive plant and wildlife species generally require specific survey protocols and extensive field survey, and are conducted only at certain times of the year.

A literature search was first performed to ensure all of the latest Magnuson-Stevens Fishery Conservation and Management Act (MSA), and EFH data were referenced. These included the National Marine Fisheries Service (NMFS) and National Oceanic and Atmospheric Administration (NOAA) websites, including the NOAA Essential Fish Habitat Mapper v2.0. All pertinent documents, maps and amendments were reviewed. The Essential Fish Habitat Mapper is an on-line program designed to provide very general information relative to the locations of EFH for the three FMPs, as well as general information relative to the locations of important EFH habitat elements.

## **Existing Site Conditions**

The site is located in an urban setting, and as such contains very little terrestrial vegetation. Algae species exist on the ramp pilings, along the riprap, and attached to the boarding float pilings. Ornamental vegetation such as palm trees, hedges and iceplant (*Carpobrotus* sp.) are present in the parking lot and along paved areas. Mexican fan palm trees (*Washingtonia filifera*) line the edges of the parking lots.

The boat slips and ramps, and landside ornamental vegetation provide feeding and perching habitat for avian wildlife, waterfowl and intertidal invertebrates. Current conditions include

nighttime lighting and a high level of nighttime human activity on the project site. No amphibian or reptile species were observed or detected. Species observed within or adjacent to the project site during the field survey included pied-billed grebe (*Podiceps grisegena*), doublecrested cormorant (*Phalacrocorax auritus*), California gull (*Larus californicus*), western gull (*Larus occidentalis*), and striped shore crab (*Pachygrapsus crassipes*). No fish were observed during the survey. Existing site conditions are similar to those described for the Ventura Harbor Village Revetment Repair Project, Essential Fish Habitat Evaluation prepared by Rincon. The unvegetated substrate in this area consists almost entirely of sand and silt (Essential Fish Habitat Evaluation; Ventura Harbor Village Revetment Repair Project Rincon Consultants, Inc. 2012).

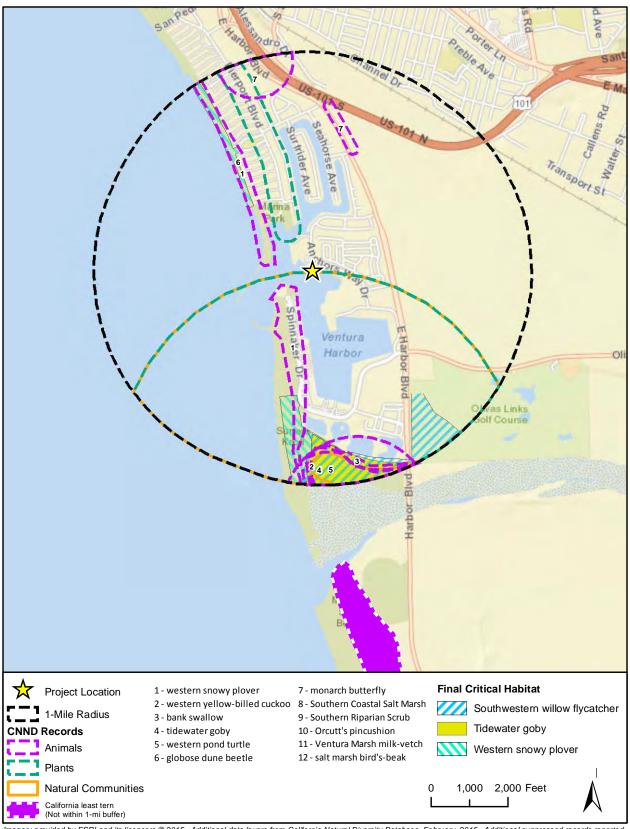

### Sensitive Biological Resources.

The CNDDB has records for 30 sensitive plant species, 10 sensitive plant communities, and 73 sensitive wildlife species within five miles of the project area (see Table 3). As most of these records occur well outside the Harbor area, Figure 10 includes only CNDDB records within one mile of the project site for relevance. Sensitive plant and wildlife species typically have very specific habitat requirements that do not occur within the activity area. Sensitive pelagic species known to occur within five miles of the harbor are brown pelican (*Pelecanus occidentalis*), storm-petrels (*Oceanodroma* sp.), greater shearwater (*Puffinus gravis*), and Cory's Shearwater (*Calonectris diomedea*). Petrels and shearwaters do not occur within the upland sections of the project site due to human activity and lack of suitable habitat. Brown pelicans have been observed roosting on docs and other structures within the harbor. Other sensitive avian species that could forage in the project area and vicinity include snowy egret, black-crowned night heron, terns, and Allen's hummingbird.

Pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (MSA), as amended by the Sustainable Fisheries Act of 1996 (Public Law 104-267), when a federally permitted action has a potential to adversely affect an area designated as EFH, an EFH Assessment is required pursuant to requirements set forth in Paragraph (6)(g) of Federal Register Vol. 62, No. 24/December 19, 1997. By definition, EFH is described as "...those waters and substrate necessary to fish for spawning, breeding, feeding, or growth to maturity" (MSA §3). EFH applies to any and all species managed under a federal Fishery Management Plan (FMP). In California there are three FMPs. These include groundfish, coastal pelagic species, and Pacific salmon. A review of the NOAA Essential Fish Habitat Mapper listed potential habitat for coastal pelagic species such as mackerel (*Scomber* sp.), Pacific sardine (*Sardinops sagax caerulea*), and anchovy (*Engraulis sp*.). No Habitat Areas of Particular Concern or EFH areas protected from fishing occur in the project vicinity

(http://www.habitat.noaa.gov/protection/efh/efhmapper/index.html, March 2015).

As the definition of EFH includes "waters and substrate," it was necessary to evaluate the water within the project reach as EFH. These waters are considered subtidal habitat, but do not satisfy the Magnuson-Stevens Act EFH definition as "those waterways and substrate necessary to fish for spawning, breeding, feeding, or growth to maturity." The sand/silt bottom, devoid of emergent and submergent vegetation cannot accurately be described as "necessary" to fish for spawning, breeding, feeding, or growth to maturity as there is no shelter for escape or brood protection from predators (Compliance Biology, February 2012). Suitable EFH in shallow water areas typically include kelp, eelgrass and/or other vegetation or structure suitable for cover.

Imagery provided by ESRI and its licensors © 2015. Additional data layers from California Natural Diversity Database, February, 2015. Additional suppressed records reported by the CNDDB known to occur or potentially occur within this search radius include: Monarch Butterfly. For more information please contact the Department of Fish and Wildlife. Imagery provided by ESRI and its licensors © 2014. Critical habitat data source: U.S. Fish and Wildlife Service, February 26, 2015. Final critical habitat acquired via the USFWS Critical Habitat Portal. It is only a general representation of the data and does not include all designated critical habitat. Contact USFWS for more specific data.

### Sensitive Plant Species

Surveys and assessments for the presence of eelgrass (Zostera sp.) and other essential fish habitat requirements in the Ventura Harbor were conducted in support of the Ventura Harbor Village Revetment Repair Project (Rincon Consultants) and the Ventura Harbor Public Launch Ramp Replacement Project (Compliance Biology, 2012) in 2011 and 2012. The findings of these surveys were negative and existing conditions within the proposed project are not expected to have changed since these evaluations. Therefore, eel grass is not expected to occur within the project area.

No sensitive plant species were observed within the project area. Based on the existing development and disturbances, the project site does not contain suitable habitat for sensitive plant species.

### Sensitive Plant Communities

No sensitive upland or terrestrial plant communities as defined by CNDDB are present on the project site. Based on the findings of prior surveys (Rincon Consultants, Inc. 2011; Compliance Biology 2012), no eelgrass (*Zostera* sp.) is expected to occur within the project site.

### Sensitive Wildlife Species

Landside developments adjacent to harbors can support breeding, roosting, foraging and feeding locations for a variety of migratory and oceanic wildlife. Although highly disturbed, the project site and surrounding area could provide low quality habitat for perching for waterfowl, migratory birds, or resting locations for marine mammals, as well as foraging habitat for sensitive species such as California least tern (described further below). There is no EFH for southern steelhead trout (*Oncoryhnchus mykiss*) or Pacific salmon within Ventura Harbor. Further, the EFH evaluation in the project vicinity (Rincon Consultants Inc. 2011; Compliance Biology, January 2012) found the project area lacked habitat for fish species of management concern within or near the project area.

<u>California least terns</u> (*Sterna antillarum browni*), a federally and state endangered species, usually form colonies on bare or sparsely vegetated sand or dried mudflats along coasts or rivers, but also on sandy or shell islands and gravel and sand pits with a dependable food supply (Thompson et al. 1997, U.S. Fish and Wildlife Service 1985). Human activity on beaches has forced this species from nesting on beaches to mud and sand flats back from the ocean, and other man-made structures such as airports and landfills (U.S. Fish and Wildlife Service, 1985). California least terns are colonial nesters and a migratory species, being present on local nesting grounds from approximately mid-April to the end of August (Rincon Consultants, October 2011). Nests are composed of shell fragments or pebbles lining small depressions in the sand or other substrate. The California least tern obtains most of its food (fish), from shallow estuaries, lagoons, and nearshore ocean waters. This species may occasionally forage in the open waters

of Ventura Harbor from its nesting colonies at the Santa Clara Rivermouth, but is not expected to nest or roost in the area due to the current level of disturbance at or near the Ventura Harbor Boat Launch Ramp.

While the western snowy plover can be found in winter in the vicinity of the project, the Pacific Coast population of western snowy plover (*Charadrius alexandrinus nivosus*), a federally threatened species, is defined as those individuals that nest adjacent to tidal waters of the Pacific Ocean, and includes all nesting birds on the mainland coast, peninsulas, offshore islands, adjacent bays, estuaries, and coastal rivers (Fish and Wildlife Service, 2012). Coastal populations are both migratory and non-migratory, and breed in this area generally between March and September (Rincon Consultants, September 2011). This species prefers to nest colonially with California least terns (in Southern California) above the high tide line on coastal beaches, sand spits, dune-backed beaches, sparsely-vegetated dunes, beaches at creek and river mouths, and salt pans at lagoons and estuaries (U.S. Fish and Wildlife Service 2007). Less common nesting habitats include bluff-backed beaches, dredged material disposal sites, salt pond levees, dry salt ponds, and river bars. In winter, western snowy plovers are found on many of the beaches used for nesting as well as on beaches where they do not nest, in man-made salt ponds, and on estuarine sand and mud flats (Ibid). No snowy plovers were observed during the site visit and are not expected to roost or nest in the area due to the level of disturbance and lack of suitable habitat. Snowy plovers have been documented to nest on beaches / dunes south of the harbor (e.g. McGrath State Beach); however, these areas are a substantial distance and from the project site and isolated from the site by harbor developments.

Heron species, including <u>black-crowned night-heron</u> (*Nycticorax nycticorax*), <u>great blue heron</u>, <u>great egret</u> (*Ardea alba*), and <u>snowy egret</u> (*Egretta thula*) are reported to have nested in Mexican fan palms, magnolia, melaleuca, Monterey cypress, and Monterey pine trees at the south end of Channel Islands Harbor (J.B. Froke 2003-2009). Channel Islands harbor (approximately seven miles south of the project) is the nearest harbor with similar development and activities to that of Ventura Harbor. Therefore, these species could also nest in trees or other suitable structures in the project site. Palm trees south of the project, but within Ventura Harbor have been known to support great blue heron (*Ardea Herodias*) nests. Mexican fan palm and other palms are found within the project parking lot; however, they are not expected to be used as rookeries by waterfowl because the number of trees is few, and no inactive nests were observed or waterfowl were observed in the palm trees, and no whitewash (fecal matter) was observed at the base or on the leaves of these palm trees during the field survey. Rookeries, or nesting colonies, of these species has been designated by CDFW to be a conservation priority (CDFG 2009).

Brown pelicans (*Pelecanus occidentalis californicus*) have been delisted from the federal (November 2009) and state endangered species list as a result of documented population increases throughout its range (U.S. Fish and Wildlife Service, 2012b). Brown pelicans can be found foraging in the open ocean for fish, or resting on the water or on a wharf, inaccessible rocks, mudflats, sandy beaches, or jetties (Zeiner 1990). They are diurnal, and require undisturbed islands adjacent to good marine fishing areas for nesting. They nest on the ground, but sometimes on bushes, on a small mound of sticks or debris. Nesting locations can be found on rocky or low brushy slopes of undisturbed islands (Zeiner 1990). This species was not seen during the site visit, but has been documented in the harbor area, and could rest on boats or docks. Brown pelicans may perch and feed in the vicinity of the project site. Nesting for the

Southern California Bight population occurs on West Anacapa Island, Santa Barbara Island, Coronados Islands, Islas Todos Santos, and Isla San Martín (USFWS, 2007).

With respect to the harbor waterways, all marine mammals are protected under the Marine Mammal Protection Act (MMPA), which prohibits, with certain exceptions, the "take" of marine mammals in U.S. waters and by U.S. citizens on the high seas. "Take" is defined under the MMPA as "harass, hunt, capture, kill or collect, or attempt to harass, hunt, capture, kill or collect." (Note that the definition of "take" differs for resources protected under the federal Endangered Species Act.) The MMPA is administered by the National Marine Fisheries Service. <u>Harbor seals (Phoca vitulina)</u> and coastal bottlenose dolphins (*Tursiops truncates*) are known to occur within Ventura Harbor. <u>California sea lions</u> (*Zalophus californianus*) are found in open water and nearshore waters while harbor seals are found more often close to land. Harbor seals and coastal bottlenose dolphins may swim into the project site, but are not expected to breed or rear in the project site. Sea lions are found in the harbor, but would not be adversely affected by project development with implementation of avoidance and minimization measures.

Both species of seals forage on fish mainly, but also opportunistically cephalopods and crustaceans (Zeiner 1990). Both species occur in groups or singly, although while in the water, harbor seals usually occur singly (Zeiner 1990). California sea lion males establish and defend territories, while harbor seals are non-territorial (Zeiner 1990). Harbor seals breed from March to June and California sea lions breed between May and August, while gestation period for both species is approximately 11 months (Zeiner 1990). Harbor seals and California sea lions haul out for various reasons, some related to breeding and some related to energy management. California sea lions tend to gather in places that have undergone human intervention (Riedman 1990). While seals may utilize docs and ramps in the harbor to rest, Ventura Harbor is not a known haul-out area for breeding (NOAA National Marine Fisheries Service, Southwest Regional Office, California Pinniped Rookeries & Haul-out Sites; database accessed January 2012; http://swr.nmfs.noaa.gov/psd/rookeryhaulouts/). Harbor seals and California sea lions primarily forage on fish.

## Critical Habitat

Within a 5-mile radius of the project site the CNDDB identified listed final critical habitat for southern California steelhead (*Oncorhynchus mykiss*), tidewater goby (*Eucyclogobius newberryi*), Ventura marsh milk-vetch (*Astragalus pycnostachyus* var. *lanosissimus*), southwestern willow flycatcher (*Empidonax traillii extimus*), and western snowy plover (*Charadrius alexandrinus nivosus*). No critical habitat is located within the project site and the species are not expected to occur within the vicinity of the project site due to the lack of suitable habitat.

As discussed above, no snowy plovers were observed during the site visit and are not expected to roost or nest in the area due to the level of disturbance and lack of California least terns and suitable habitat. The EFH Evaluation found the project area lacked habitat for fish species of management concern and no living fish were observed within or near the project site. Southern California steelhead are not expected within the vicinity of the project site.

# Nesting Birds

The federal Migratory Bird Treaty Act (MBTA) protects native birds and their nests. Palm trees and other ornamental vegetation and structures suitable for nesting of MBTA-protected species, including raptors such as red-tailed hawk (*Buteo jamaicensis*), and passerines (songbirds), occur

within the project area and are proposed for removal. Excluding the palm trees, the project site contains minimal vegetation for nesting. Native avian species such as Pied-billed grebe, double-crested cormorant, California gull, and western gull, are protected by the MBTA, and may forage in the parking lot, along the tide line on the boat ramp, however they are not expected to nest in the project area due to lack of suitable habitat.

#### Jurisdictional Drainages and Wetlands

No natural drainages or wetlands occur within the project area. The project site is located within the Ventura Harbor. The proposed project would not require any dredging. However, pile driving of new pilings may be considered fill, and additional permits would be required for the proposed activities. Section 404 of the Clean Water Act regulates navigable waters where fill material (discharge) is proposed below the ordinary high water mark and is administered by the USACE. The Act specifies, in Section 401, that states must certify that any activity subject to a permit issued by a federal agency, such as the USACE, meets all state water quality standards. In California, the state and regional water boards are responsible for certification of activities subject to USACE Section 404 permits. A RWQCB 401 Certification would therefore also be required for project implementation.

In addition, the harbor waterways are subject to USACE jurisdiction per Section 10 of the Rivers and Harbors Act.

#### Title 33 U.S.C. 401. Construction of bridges, causeways, dams or dikes generally; exemptions

Title 33 U.S.C. 403. The creation of any obstruction not affirmatively authorized by Congress, to the navigable capacity of any of the waters of the United States is hereby prohibited; and it shall not be lawful to build or commence the building of any wharf, pier, dolphin, boom, weir, breakwater, bulkhead, jetty, or other structures in any port, roadstead, haven, harbor, canal, navigable river, or other water of the United States, outside established harbor lines, or where no harbor lines have been established, except on plans recommended by the Chief of Engineers and authorized by the Secretary of War; and it shall not be lawful to excavate or fill, or in any manner to alter or modify the course, location, condition, or capacity of, any port, roadstead, haven, harbor, canal, lake, harbor of refuge, or enclosure within the limits of any breakwater, or of the channel of any navigable water of the United States, unless the work has been recommended by the Chief of Engineers and authorized by the Secretary of the United States, unless the work has been recommended by the Chief of Engineers and authorized by the Secretary of the United States, unless the work has been recommended by the Chief of Engineers and authorized by the Secretary of the United States, unless the work has been recommended by the Chief of Engineers and authorized by the Secretary of War prior to beginning the same.

Section 30233 of the Coastal Act states that the (a) The diking, filling, or dredging of open coastal waters, wetlands, estuaries, and lakes shall be permitted in accordance with other applicable provisions of this division, where there is no feasible less environmentally damaging alternative, and where feasible, mitigation measures have been provided to minimize adverse environmental effects.

#### Protected Trees

Trees with a single trunk girth of 90 inches or more, or with multiple trunks, two of which add up to 72 inches in girth, is protected by Ventura County Tree Ordinance as a Heritage Tree, except for certain types of trees (e.g., palm trees) unless they are 60 feet tall or 75 years old. The City of Ventura has no protected tree ordinance. No protected trees would be affected by the proposed activity.

## Other Regulated Areas

The project site is not located within a Habitat Conservation Plan (HCP) area or other sensitive biological area as indicated by the U.S. Fish and Wildlife Service Critical Habitat portal (<u>http://criticalhabitat.fws.gov/</u>) or the California Department of Fish and Wildlife Biogeographic Information and Observation System (<u>http://bios.dfg.ca.gov/</u>). The project is consistent with the City of San Buenaventura City Charter and Municipal Code (Volume I, 1999), the Ventura Harbor Ordinance 44 (adopted June 2004), and the City of Ventura General Plan (2005).

#### **Invasive Species**

*Caulerpa taxifolia* was discovered in San Diego County's Agua Hedionda Lagoon and in Huntington Harbor in 2000. Eradication of the Caulerpa infestations in both Agua Hedionda Lagoon and Huntington Harbour were announced 2006 (San Diego Regional Water Quality Control Board, 2015). A green alga native to tropical waters, it has been highly invasive in the Mediterranean Sea. This species has not been reported in southern California since and therefore is not expected to occur in the project site. A 2012 survey at the nearby boat ramp did not detect Caulerpa (Compliance Biology, Inc., February 18, 2012).

*a)* Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

The project site is an existing marina, yacht yard and parking lot. The proposed project would replace infrastructure, expanded the dock and existing number of slips which would cover more of the water surface at the marina, and potentially increase the amount and type of traffic within the marina. Because the turbidity and noise associated with the proposed project would be temporary the impacts to areas outside of the project limits would be considered less than significant. No threatened or endangered wildlife or plant species occur within the project vicinity and therefore none are expected to be impacted by this project. Potential impacts related to the proposed project could include disturbance to special status species and other wildlife moving through the marina during construction and long term use of the marina. This disturbance has the potential to impact nesting avian species, waterfowl, fish and harbor seals foraging in the area.

## POTENTIALLY SIGNIFICANT UNLESS MITIGATION INCORPORATED

#### **Mitigation Measures**

The following mitigation measures are required to reduce impacts to nesting avian species, waterfowl, fish and harbor seals foraging in the area, and eelgrass.

**BIO-1** Wildlife Clearance Survey. Docks and other structures provide resting and roosting habitat for special status species. A general wildlife clearance survey shall be conducted prior to demolition of structures to ensure any special status wildlife species have left the area. California brown pelicans or harbor seals could enter the project area. If California brown pelicans or harbor seals are observed, construction activates that could impact these

species shall be halted until the animals leave the area. If other special status species are observed during the clearance survey, a Port-approved biologist shall determine an appropriate avoidance buffer and will be present during construction activities to determine if construction activities are impacting the species. Minimization measures, including buffers, for non-nesting MBTA special status species will be implemented under the direction of a Port-approved biologist.

- BIO-2 Nesting Bird Survey. Palm trees, ornamental vegetation and structures suitable for nesting for MBTA-protected species, including raptors (such as barn owls), waterbirds, and songbirds occur within and adjacent to the project site. Direct and indirect impacts could occur to any nests, if present, from project activities. Therefore, if construction of the project begins during the bird-breeding season (February 15- September 15), a nesting bird survey of potentially suitable nesting habitat shall be conducted a maximum of seven days prior to the project start date by a Port-approved biologist (a person with a biology degree and/or established skills in bird recognition). If the project begins outside of the bird-breeding season and continues through the bird-breeding season, a survey shall be conducted a within seven days of February 15th. If a nest of a species afforded protection under the CFG Code or MBTA is found to be active, a Portapproved biologist shall determine an appropriate avoidance nondisturbance buffer that would be adequate to avoid take. The buffer zone area shall not be encroached into by construction work until such time as the biologist determines that nesting is complete and the young have fledged and are no longer dependent upon the nest site area.
- BIO-3 Pre-Construction Eelgrass and Caulerpa Survey, Avoidance, and Removal. Prior to removal of existing piles and docks, the applicant shall conduct an underwater survey to determine whether or not eelgrass and/or caulerpa is present. The results of the survey shall be submitted to the Port District prior to initiating any offshore activity. If eelgrass is found to be present within the area of disturbance, the applicant must develop a mitigation plan to achieve no net loss in eelgrass function. Potential mitigation options would be coordinated with the National Marine Fisheries Service (NMFS) and may include: (1) in-kind compensatory mitigation involving the creation, restoration, or enhancement of habitat to mitigate for adverse impacts to the same type of habitat (such mitigation would need to achieve a final mitigation ratio of 1.2:1 across all areas of the state, independent of starting mitigation ratios); (2) contribution to a mitigation bank or in-lieu-fee program established by NMFS or another agency; or (3) out-of-kind compensatory mitigation involving the creation, restoration, or enhancement of another habitat type. In most cases, out-ofkind mitigation is discouraged, because eelgrass is a rare, special-status habitat in California. There may be some scenarios, however, where out-ofkind mitigation for eelgrass impacts is ecologically desirable or when inkind mitigation is not feasible. If caulerpa is found to be present, it shall be

removed entirely in coordination with NMFS and/or CDFW prior to installation of new docks or piles.

No residual impacts would occur from mitigation measures BIO-1, BIO-2, or BIO-3.

*b)* Would the project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

No riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service.

#### NO IMPACT

c) Would the project have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

The project site is located within the Ventura Harbor. Potential impacts to the Harbor include water quality impacts from the discharge of materials, such as fuel and other hazardous materials, into the Harbor during construction and operation of the project.

The VHMYY currently has a Clean Marina Plan in place to manage facility operations (April 2014, see Appendix D). The Clean Marina Plan includes policies for marina management, an emergency action plan, and rules and regulations for marina users. Clean Marina Plan rules, regulations, and policies are related to: emergencies, spill response, petroleum containment, vessel cleaning and maintenance, underwater boat hull cleaning, facility operations, stormwater pollution prevention, as well as debris, sewage, solid waste, fish waste, hazardous waste, and liquid waste management. These existing policies and procedures would reduce potential water quality impacts to the Harbor from discharge of contaminants during project operation.

The proposed project would involve replacing the existing dock structures and relocation and improvement of the existing fuel dock. The upgrades to the fueling station are to meet current environmental regulations and standards and reduce discharge and emissions. Two stormwater drainage collection drains are located within the project site. Like many marinas, these drainage systems do not currently have any filtration devices between the marina and the water body. The proposed project would involve adding sand filters to the storm drain inlets in order to prevent trash and debris from entering the Harbor. Therefore, the proposed project would reduce impacts to water quality, and also impacts to aquatic species, by improving the existing storm drain system and the fueling facility. Continued implementation and enforcement of the Clean Marina Plan would also reduce impacts to Harbor water quality.

Although operational impacts to the Harbor would be reduced by the proposed storm drain system and fuel dock improvements under the proposed project, water quality impacts during construction of the proposed project are potentially significant.

## POTENTIALLY SIGNIFICANT UNLESS MITIGATION INCORPORATED

#### **Mitigation Measures**

The following mitigation measures are required to reduce impacts jurisdictional waters.

- **BIO-4 Construction Responsibilities and Debris Removal.** The applicant shall comply with the following construction-related requirements:
  - A. Any and all debris resulting from construction activities, wind and water erosion shall be removed from the site within twenty-four (24) hours of completion of construction and disposed of at an appropriate location.
  - B. A silt curtain utilized to control turbidity shall be installed prior to high turbidity generating activities.
  - C. Floating booms shall be used to contain debris discharged into coastal waters and any debris discharged shall be removed as soon as possible but no later than the end of each day.
  - D. Divers shall recover non-buoyant debris discharged into coastal waters as soon as possible after loss.
  - E. The applicant shall dispose of all construction debris resulting from the proposed project at an appropriate location outside the coastal zone. If the disposal site is located within the coastal zone, a separate coastal development permit shall be required before disposal can take place.
  - F. Reasonable and prudent measures shall be taken to prevent any discharge of fuel or oily waste from heavy machinery or construction equipment into coastal waters. The applicant and applicant's contractors shall have adequate equipment available to contain any such spill immediately. Reasonable and prudent measures may include, but not be limited to:
    - 1. Stop or control the release at the source.
    - 2. Use appropriate materials in spill kit to block the flow and prevent the release from discharging into the harbor.
      - a. Sweep dry spills -- do not wash or hose.
      - b. Absorb wet spills on concrete or asphalt.
      - c. Do not leave used absorbent (e.g., dry sweep) on the ground
      - d. Dig up wet spills on soil, including all exposed soils. Properly dispose of the soil.
  - G. All debris and trash shall be disposed of in the proper trash and recycling receptacles at the end of each construction day.
  - H. Any wood treatment used shall conform with the specifications of the American Wood Preservation Association for saltwater use. Wood treated with Creosote, CCA (Chromated Copper Arsenate), or ACA (Ammoniacal Copper Arsenate) is prohibited. No wood treated with ACZA (Ammoniacal Copper Zinc Arsenate) shall be used where it could come into direct contact with the water. All treated timber shall be free of chromium and arsenic.
  - I. The applicant shall use the least damaging method for the construction of pilings and dock structures and any other activity that will disturb benthic sediments. The applicant shall limit, to the

greatest extent practicable, the suspension of benthic sediments into the water column through BMPs such as the implementation of silt curtains, as described above.

**BIO-5 Conformance with the Requirements of the Resource Agencies**. The applicant shall comply with all permit requirements, and mitigation measures of the California Department of Fish and Wildlife, State Water Quality Control Board, Regional Water Quality Control Board, U.S. Army Corps of Engineers, and the U.S. Fish and Wildlife Service with respect to preservation and protection of water quality and marine environment. Any change in the approved project which may be required by the above-stated agencies shall be submitted to the Executive Director in order to determine if the proposed change shall require a permit amendment pursuant to the requirements of the Coastal Act and the California Code of Regulations.

No residual impacts would occur from mitigation measures BIO-4 and BIO-5.

*d)* Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

The proposed project is not changing the size or depth of the existing harbor. The marina is not a migratory corridor. Any impacts related to wildlife movement would be temporary in nature and are not expected to impact substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors. No native wildlife nursery sites exit onsite.

## NO IMPACT

*e)* Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

The project as proposed would not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.

#### NO IMPACT

*f)* Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? No NOAA Habitat Areas of Particular Concern or EFH areas protected from fishing occur in the project vicinity. The project as proposed would not conflict with any adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.

#### NO IMPACT

|    |  | Potentially<br>Significant<br>Impact | Potentially<br>Significant<br>Unless<br>Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No<br>Impact |
|----|--|--------------------------------------|--|------------------------------------|--------------|
| ν. | CULTURAL RESOURCES   |                                      |  |                                    |              |
|    | Would the project:   |                                      |  |                                    |              |
| a) | Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?      |                                      |  |                                    | •            |
| b) | Cause a substantial adverse change in the significance of an archaeological resource as defined in §15064.5? |                                      |  |                                    | •            |
| c) | Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?         |                                      |  |                                    | •            |
| d) | Disturb any human remains, including those interred outside of formal cemeteries?                            |                                      |  |                                    | •            |

*a)* Would the project cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?

The project site includes a restaurant, a yacht yard, a real estate office, a fuel dock/convenience store, and a dock structure. There are no historic resources within or adjacent to the project site (2005 Ventura County General Plan Final EIR, August 2005) and only the existing dock structure is proposed for demolition.

#### NO IMPACT

*b)* Would the project cause a substantial adverse change in the significance of an archaeological resource as defined in §15064.5?

The Oxnard Plain, on which the City lies, has a history of human habitation dating back thousands of years. Portions of Ventura County were occupied by early Native American cultures from about 3,500 years ago to approximately the First Century A.D. Chumash Native Americans settled in the area around 1500 A.D. Literature searches undertaken through the UCLA Institute of Archaeology between 1984 and 1986 revealed seven archaeological sites in the County (City of Oxnard, Thresholds Guidelines 143-144).

The project site would include improvements to an existing parking area and existing facilities and expansion of a marina to include approximately 40 additional boat slips. The proposed project would also involve repaving of an existing parking lot. The proposed project would not include any ground-disturbing activities that would impact archaeological resources. The project site is highly disturbed and within Ventura Harbor, an area consisting largely of fill

material associated with creation of the harbor. The project site does not contain any evidence of archaeological resources.

#### NO IMPACT

*c)* Would the project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

The proposed project is currently developed and does not contain any unique geologic features (Rincon Consultants, Inc. site visit, February 2015). The proposed project would not involve any ground-disturbing activities that would impact paleontological resources.

#### NO IMPACT

d) Would the project disturb any human remains, including those interred outside of formal cemeteries?

The project site is developed and does not contain any evidence of human remains. Projectrelated construction activity would mainly be conducted over the water and land modifications would be limited to re-paving of an existing parking lot and removal of landscaping. Nevertheless, adherence to Section 7050.5(b) of the California Health and Safety Code would protect any previously unidentified buried human remains. In accordance with these codified requirements, in the event that human bone or bone of unknown origin is found during construction, all work is required to stop in the vicinity of the find and the County Coroner must be contacted immediately. If the remains are determined to be Native American, the Coroner is required to notify the Native American Heritage Commission, who then notifies the person it believes to be the most likely descendent. The most likely descendant would work with the contractor to develop a program for re-internment of the human remains and any associated artifacts

#### NO IMPACT

|     | ii) Strong seismic ground shaking?  |                                      |  |                                    |              |
|     | <li>iii) Seismic-related ground failure,<br/>including liquefaction?</li>   |                                      |  | •                                  |              |
|     | iv) Landslides?   |                                      |  |                                    | -            |
| b)  | Result in substantial soil erosion or the loss of topsoil?  |                                      |  |                                    | •            |
| C)  | Be located on a geologic unit or soil that is<br>unstable as a result of the project, and<br>potentially result in on- or off-site<br>landslide, lateral spreading, subsidence,<br>liquefaction, or collapse? |                                      |  |                                    |              |
| d)  | Be located on expansive soil, as defined<br>in Table 1-B of the Uniform Building Code,<br>creating substantial risks to life or<br>property?  |                                      |  |                                    |              |
| e)  | Have soils incapable of adequately<br>supporting the use of septic tanks or<br>alternative wastewater disposal systems<br>where sewers are not available for the<br>disposal of wastewater?                   |                                      |  |                                    | •            |

*a.i)* Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?

No active or potentially active faults have been mapped across the project site, according to the Alquist-Priolo Earthquake Fault Zoning Map (Ventura Quadrangle, 1978).

## NO IMPACT

*a.ii)* Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving strong seismic ground shaking?

While no faults have been mapped across the project site, seismic events caused by active and potentially active faults in the region could result in seismic ground shaking on-site. The City of Ventura, along with all of Southern California and the Central Coast, is within Seismic Zone 4 and subject to seismic ground shaking from faults in the region. Therefore, a seismic hazard cannot be completely avoided. However, its effect can be minimized by implementing seismic requirements specified by the California Building Code (CBC), which includes design and

construction requirements related to fire and life safety and structural safety. The CBC applies to onshore structures such as restrooms, but not to floating docks. These non-permanent structures would be pre-fabricated and, since they float on the water, generally would not be subject to damage potential during a seismic event.

# LESS THAN SIGNIFICANT IMPACT

*a.iii)* Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving seismic-related ground failure, including liquefaction?

Liquefaction is a temporary, but substantial, loss of shear strength in granular solids, such as sand, silt, and gravel, usually occurring during or after a major earthquake. The project site is located within a potential liquefaction zone as identified on the State Hazards map, which indicates that a general potential for liquefaction exists throughout the entire area (California Geological Survey, Seismic Hazard Zones, Ventura Quadrangle, 2003). Liquefaction is a condition that occurs when unconsolidated, saturated soils change to a near-liquid state during groundshaking. The project primarily involves the construction of docks over the water, but onshore facilities would be required to comply with applicable provisions of the most recently adopted version of the CBC and applicable City building regulations.

## LESS THAN SIGNIFICANT IMPACT

*a.iv)* Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving landslides?

The project site is not located on or near a hillside. The project site is not designated as a zone of required investigation for earthquake-induced landslides (California Geological Survey, Seismic Hazard Zones, Ventura Quadrangle, 2003).

#### NO IMPACT

b) Would the project result in substantial soil erosion or the loss of topsoil?

Erosion is a composite of all processes by which earth or rock materials are loosened or dissolved and moved from place to place. Natural erosion activity depends on the steepness of slopes, amount and intensity of rainfall and soil types.

Construction activity would involve removal and replacement of existing dock structures and ramps, construction of additional restroom facilities, and repaying of the existing parking lot. The proposed project would require minimal ground-disturbing construction activity. As a result, the potential for substantial erosion to occur over the site during construction is low.

During operation, the existing rock revetment along the waterline protects the shore from erosion. The proposed project would not affect or alter the rock revetment.

## NO IMPACT

*c)* Would the project be located on a geologic unit or soil that is unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?

The proposed project involves replacement and expansion of dock structures in an existing marina and marina within the Ventura Harbor and other site improvements, as well as construction of restroom facilities and re-paving of an existing parking lot. These improvements would not result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse.

## NO IMPACT

*d)* Would the project be located on expansive soil, as defined in Table 1-B of the Uniform Building Code, creating substantial risks to life or property?

Expansive soils are generally clayey and swell when wetted and shrink when dried. According to Figure 4.6-5 of the 2005 Ventura General Plan Final EIR, the project site is located in a "low" expansive soil zone.

#### LESS THAN SIGNIFICANT IMPACT

*e)* Would the project have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

The project site is served by a sewer system and therefore septic systems are not proposed onsite.

#### NO IMPACT

| VII. | GREENHOUSE GAS EMISSIONS   |                                      |  |                                    |              |
|      | Would the project:   |                                      |  |                                    |              |
| a)   | Generate greenhouse gas emissions,<br>either directly or indirectly, that may have<br>a significant impact on the environment?           |                                      |  | -                                  |              |
| b)   | Conflict with any applicable plan, policy,<br>or regulation adopted for the purpose of<br>reducing the emissions of greenhouse<br>gases? |                                      |  |                                    |              |

Climate change is the observed increase in the average temperature of the Earth's atmosphere and oceans along with other substantial changes in climate (such as wind patterns, precipitation, and storms) over an extended period of time. Climate change is the result of numerous, cumulative sources of greenhouse gases (GHGs). GHGs contribute to the "greenhouse effect," which is a natural occurrence that helps regulate the temperature of the planet. The majority of radiation from the Sun hits the Earth's surface and warms it. The surface in turn radiates heat back towards the atmosphere, known as infrared radiation. Gases and clouds in the atmosphere trap and prevent some of this heat from escaping back into space and re-radiate it in all directions. This process is essential to supporting life on Earth because it warms the planet by approximately 60° Fahrenheit. Emissions from human activities since the beginning of the industrial revolution (approximately 250 years ago) are adding to the natural greenhouse effect by increasing the gases in the atmosphere that trap heat, thereby contributing to an average increase in the Earth's temperature.

GHGs occur from both human and non-human activities. Human activities that produce GHGs are the burning of fossil fuels (coal, oil and natural gas for heating and electricity, gasoline and diesel for transportation); methane from landfill wastes and raising livestock, deforestation activities; and some agricultural practices. Greenhouse gases produced by human activities include carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), nitrous oxide (N<sub>2</sub>O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF<sub>6</sub>). Since 1750, it is estimated that the concentrations of carbon dioxide, methane, and nitrous oxide in the atmosphere have increased over by 36%, 148%, and 18% respectively. Emissions of GHGs affect the atmosphere directly by changing its chemical composition while changes to the land surface indirectly affect the atmosphere. Potential impacts of global warming in California may include loss in snow pack, sea level rise, more extreme heat days per year, more high ozone days, more large forest fires, and more drought years (CEC, March 2009).

The adopted *CEQA Guidelines* provide regulatory guidance on the analysis and mitigation of GHG emissions in CEQA documents, while giving lead agencies the discretion to set quantitative or qualitative thresholds for the assessment and mitigation of GHGs and climate change impacts. Neither VCAPCD, the City of Ventura, nor the Ventura Port District have adopted GHG emissions thresholds, and no GHG emissions reduction plan with established GHG emissions reduction strategies has been adopted locally. The VCAPCD staff, though, has examined options for GHG thresholds for CEQA documents. Among the approaches discussed, VCAPCD prefers consistency with the South Coast AQMD (VCAPCD, 2011). The South Coast AQMD is considering a tiered approach with locally adopted GHG reduction plans followed by GHG threshold is 3,000 metric tons per year (SCAQMD, "Proposed Tier 3 Quantitative Thresholds – Option 1", September 2010).

This analysis is based on the methodologies recommended by the California Air Pollution Control Officers Association [CAPCOA] (January 2008) *CEQA and Climate Change* white paper. The analysis focuses on CO<sub>2</sub>, N<sub>2</sub>O, and CH<sub>4</sub> as these are the GHG emissions that onsite development would generate in the largest quantities. Fluorinated gases, such as HFCs, PFCs, and SF<sub>6</sub>, were also considered for the analysis. However, because the development potential would not involve industrial uses, the quantity of fluorinated gases would not be significant since fluorinated gases are primarily associated with industrial processes. Calculations were based on the methodologies discussed in the CAPCOA white paper (January 2008) and included the use of the California Climate Action Registry General Reporting Protocol (January 2009). Emissions associated with the proposed project were estimated using the California Emissions Estimator Model (CalEEMod) version 2013.2.2. Complete CalEEMod results and assumptions can be viewed in Appendix B. *a)* Would the project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Construction activities associated with the proposed project would generate temporary GHG emissions primarily due to the operation of construction equipment and truck trips. Operational emissions include emissions from energy use (electricity and natural gas production), area sources (consumer products and landscape maintenance), waste generation (emissions from waste decomposition at landfills), water sources (electricity to supply water to the project site), and mobile sources (vehicles traveling to and from the project site). Emissions were calculated in CalEEMod based on the increase in daily trips estimated in the project traffic study and assuming additional liveaboard residents. GHG emissions are estimated at 62 metric tons CO<sub>2</sub>Eper year, which is lower than the recommended 3,000 metric ton threshold.

#### LESS THAN SIGNIFICANT IMPACT

| Emission Source   | Annual Emissions (CO₂E)  |
|---|--|
| Construction <sup>1</sup>                                     | 1 metric ton   |
| Operation<br>Area<br>Energy<br>Solid Waste<br>Water<br>Mobile | <0.01 metric tons<br>6 metric tons<br>1 metric tons<br>1 metric tons<br>53 metric tons |
| Total   | 62 metric tons   |

 Table 4

 Annual Greenhouse Gas Emissions

Sources: See Appendix B for calculations and for GHG emission factor assumptions. <sup>1</sup> For the purpose of comparing construction emissions with annual emissions from operation of the proposed project, total construction emissions are amortized over a 30-year period (the assumed life of the project).

*b)* Would the project conflict with any applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Neither the VCAPCD, the Ventura Port District, nor the City of Ventura have an adopted Climate Action Plan or any other adopted plan, policy, or regulation adopted for the purpose of reducing GHG emissions.

Senate Bill 375, signed in August 2008, requires the inclusion of sustainable communities' strategies (SCS) in regional transportation plans (RTPs) for the purpose of reducing GHG emissions. In April 2012, the Southern California Association of Government (SCAG) adopted the 2012-2035 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). SCAG's RTP/SCS includes a commitment to reduce emissions from transportation sources by promoting compact and infill development to comply with SB 375. A goal of the SCS is to "promote the development of better places to live and work through measures that encourage more compact development, varied housing options, bike and pedestrian improvements, and

efficient transportation infrastructure." The proposed project involves expanding an existing marina. It would involve enhancement of existing facilities within an urbanized area. The proposed project would not conflict with the RTP/SCS.

Executive Order (EO) S-3-05 was issued by the Governor in June 2005. EO S-3-05 sets a GHG emission reduction target of 1990 levels by 2020. Assembly Bill 32, the "California Global Warming Solutions Act of 2006," was signed into law in the fall of 2006. This bill also requires achievement of a statewide GHG emissions limit equivalent to 1990 emissions by 2020 (essentially a 25% reduction below 2005 emission levels) and the adoption of rules and regulations to achieve the maximum technologically feasible and cost-effective GHG emissions reductions. In response to EO S-3-05, CalEPA created the Climate Action Team (CAT), which in March 2006, published the Climate Action Team Report (CAT Report) (CalEPA, 2006). The 2006 CAT Report identified a recommended list of strategies that the state could pursue to reduce GHG emissions. The strategies include a variety of techniques aimed at the reduction of passenger and light duty truck emissions, reduction of energy and water use and increased recycling. In addition, in 2008 the California Attorney General published The California Environmental Quality Act Addressing Global Warming Impacts at the Local Agency Level (Office of the California Attorney General, Global Warming Measures Updated May 21, 2008). This document provides information that may be helpful to local agencies in carrying out their duties under CEQA as they relate to global warming. Included in this document are various measures that may reduce the global warming related impacts of a project such as reducing water use and encouraging smart land use. The proposed project is located adjacent to existing roadways and near commercial and retail. The proposed project would not conflict with applicable CAT strategies or 2008 Attorney General Greenhouse Gas Reduction Measures.

According to *The Impacts of Sea-Level Rise on the California Coast,* prepared by the California Climate Change Center (CCCC) (May 2009), climate change has the potential to induce sea level rise in the coming century. The rising sea level increases the likelihood and risk of flooding. The proposed project includes increasing the piling height for the docks in order to reduce tsunami risk. Increasing the piling height would also serve to protect against potential future sea level rise and would extend the life of the dock structure.

The proposed project would not conflict with applicable plans, policies, or regulations adopted for the purpose of reducing the emissions of GHGs and would be consistent with the objectives of the RTP/SCS, AB 32, SB 97 and SB 375.

## LESS THAN SIGNIFICANT IMPACT

|     |  | Potentially<br>Significant<br>Impact | Potentially<br>Significant<br>Unless<br>Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No<br>Impact |
|-----|--|--------------------------------------|--|------------------------------------|--------------|
| VII | I. HAZARDS AND HAZARDOUS<br>MATERIALS  |                                      |  |                                    |              |
|     | Would the project:   |                                      |  |                                    |              |
| a)  | Create a significant hazard to the public or<br>the environment through the routine<br>transport, use, or disposal of hazardous<br>materials?  |                                      |  |                                    |              |
| b)  | Create a significant hazard to the public or<br>the environment through reasonably<br>foreseeable upset and accident conditions<br>involving the release of hazardous<br>materials into the environment?   |                                      |  |                                    |              |
| c)  | Emit hazardous emissions or handle<br>hazardous or acutely hazardous<br>materials, substances, or waste within ¼<br>mile of an existing or proposed school?  |                                      |  |                                    | •            |
| d)  | Be located on a site which is included on<br>a list of hazardous material sites compiled<br>pursuant to Government Code Section<br>65962.5 and, as a result, would it create a<br>significant hazard to the public or the<br>environment?                                    |                                      |  | -                                  |              |
| e)  | For a project located within an airport land<br>use plan or, where such a plan has not<br>been adopted, within two miles of a public<br>airport or public use airport, would the<br>project result in a safety hazard for people<br>residing or working in the project area? |                                      |  |                                    | •            |
| f)  | For a project within the vicinity of a private<br>airstrip, would the project result in a safety<br>hazard for people residing or working in<br>the project area?  |                                      |  |                                    | •            |
| g)  | Impair implementation of or physically<br>interfere with an adopted emergency<br>response plan or emergency evacuation<br>plan?  |                                      |  |                                    | •            |
| h)  | Expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?   |                                      |  |                                    | •            |

*a)* Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

The proposed project involves relocation of and improvements to an existing fuel dock. Transportation and storage of fuel would occur as part of project operations. However, these operations would be comparable to existing conditions. The number of boats fueled at the existing fuel dock can range from about 2 to 6 Monday through Thursday and 15 to30 on weekends. Use of the fuel pumps may increase with the proposed project as the proposed project would increase the number of boat slips. However, the amount of the increase cannot be predicted at this time.

The proposed new fuel dock would include various improvements that would reduce the potential for releases of hazardous materials. These include:

- *Improvements to feeder lines and new digital fuel pumps, which would provide a higher pump capacity*
- Extended hose length on retractable rollers to enable docked commercial boats in that section of the dock to be fueled at their slips
- Spill resistant nozzles built to current code requirements
- Easy access kill switches
- New gauges and a stable, new docking area

The facility would be required to meet City Code standards as well as applicable requirements of Title 23 of the California Code of Regulations. Compliance with State and City regulations regarding the transport and storage of fuels would reduce impacts to a less than significant level.

## LESS THAN SIGNIFICANT IMPACT

*b)* Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

The proposed project would involve transportation and storage of fuel as part of project operations. However, these operations would be comparable to existing conditions. In addition, as discussed in item a, the new fuel dock would include various improvements that would reduce the potential for an accidental release of fuel as compared to the existing fuel dock. The new facility would be required to meet current City Code standards as well as the California Building and Fire Codes. Compliance with City and State regulations regarding transport and storage of fuels and planning for foreseeable upset and accident conditions would reduce impacts to a less than significant level.

## LESS THAN SIGNIFICANT IMPACT

*c)* Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within ¼ mile of an existing or proposed school?

The closest school is Pierpont Elementary School, located approximately 0.6 miles northwest of the project site. The proposed project would not emit hazardous materials in the vicinity of an existing school.

# NO IMPACT

*d)* Would the project be located on a site which is included on a list of hazardous material sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

According to the Envirostor database maintained by the Department of Toxic Substances Control (<u>http://www.envirostor.dtsc.ca.gov/public/</u>), and GeoTracker database maintained by the State Water Resources Control Board (<u>http://geotracker.waterboards.ca.gov/</u>), the project site is not included in a list of hazardous material sites. The project site is not on any hazardous materials site compiled pursuant to Government Code Section 65962.5. There is one leaking underground storage tank within 1,000 feet of the project site located at 1404 Anchors Way Drive (Dave's Marine Fuel). However, this is listed as Completed-Case Closed, meaning that the site has been cleaned up and no hazards remain.

## LESS THAN SIGNIFICANT IMPACT

*e)* For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

The project site is located approximately six miles northwest of the Oxnard Airport. The site is not located within the Oxnard Airport land use plan (Airport Comprehensive Land Use Plan for Ventura County, 2000).

## NO IMPACT

*f)* For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?

The project site is not located within the vicinity of a private airstrip.

## NO IMPACT

*g)* Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

The proposed project would involve replacement and expansion of an existing marina and associated facilities on a developed project site. Harbor Boulevard near the project site is listed as an evacuation route in the Ventura County Operational Area Tsunami Evacuation Plan (August 2006). The proposed project would not add substantial traffic such that Harbor Boulevard would be congested and prevent emergency response (see Section XVI, *Transportation/Traffic*). The proposed project would be required to comply with applicable California Fire Code requirements regarding emergency access and Ventura Harbor Ordinance (Ventura Port District, Ordinance #44, adopted 2004, amended 2008) requirements regarding

emergency access. The proposed project would not interfere with any emergency response or evacuation plan.

## LESS THAN SIGNIFICANT IMPACT

*h)* Would the project expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

According to the 2005 Ventura General Plan Final EIR Figure 4.11-2, the project site is not located in a wildland fire hazard zone. The project site is in an urbanized area within the Ventura Harbor. Thus, the proposed project would not expose persons or structures to wildfire hazard risks.

#### NO IMPACT

|     | Would the project:   |                                      |  |                                    |              |
| e)  | Create or contribute runoff water which<br>would exceed the capacity of existing or<br>planned stormwater drainage systems or<br>provide substantial additional sources of<br>polluted runoff? |                                      |  | •                                  |              |
| f)  | Otherwise substantially degrade water<br>quality?  |                                      |  | •                                  |              |
| g)  | Place housing within a 100-year flood<br>hazard area as mapped on a federal<br>Flood Hazard Boundary or Flood<br>Insurance Rate Map or other flood hazard<br>delineation map?                  |                                      |  | •                                  |              |
| h)  | Place within a 100-year flood hazard area structures which would impede or redirect flood flows?   |                                      |  |                                    | -            |
| i)  | Expose people or structures to a significant risk of loss, injury, or death involving flooding, including flooding as a result of the failure of a levee or dam?                               |                                      |  |                                    |              |
| j)  | Result in inundation by seiche, tsunami, or mudflow?   |                                      |  | -                                  |              |

# a) Would the project violate any water quality standards or waste discharge requirements?

The proposed project would involve temporary disturbance of the waters within Ventura Harbor. Construction activities would create temporary increases in turbidity and associated reduction in water quality.

The proposed project is subject to various local, state, and federal regulations and permits regarding impacts to water resources. The Ventura County Watershed Protection District, the California Department of Water Resources, and the Los Angeles Regional Water Quality Control Board are the primary agencies responsible for the protection of watersheds, floodplains, water bodies, and water quality in the area. The federal government administers the National Pollutant Discharge Elimination System (NPDES) permit program, which regulates discharges into surface waters.

Section 10 of the Clean Water Act (33 U.S.C. 403) covers construction, excavation, or deposition of materials in, over, or under navigable water of the United States, or any work which would affect the course, location, condition or capacity of those waters. Actions requiring Section 10 permits include structures (e.g., piers, wharfs, breakwaters, bulkheads, jetties, weirs,

transmission lines) and work such as dredging or disposal of dredged material, or excavation, filling or other modifications to the navigable waters of the United States. The proposed project would require a Section 10 permit for construction activities. The Section 10 permit would require best management practices (BMPs) to reduce pollution and sedimentation from the project site into Ventura Harbor. Specific measures may include the following:

- No contamination by cement, concrete, asphalt, washings, paint, etc. is permitted. Hazardous materials shall not be placed where they may accidently spill or run off into the Harbor.
- No debris, soil, construction materials, concrete wash water, fluids, etc. shall be placed where they may be washed by rainfall or runoff into the Harbor.
- Harbor water may not used for any construction activity (e.g. dust control, concrete mix).
- Stationary equipment (motors, pumps, generators, welders) located adjacent to the Harbor must be positioned over drip pans (e.g. plastic with sand bags).
- Oil absorbent pads must be onsite at all times in case of a spill. Spills shall be cleaned up immediately.
- Equipment and vehicles should regularly checked and be properly maintained to prevent leaks.
- *Staging, storage, fueling, and maintenance of equipment/vehicles shall occur as far away as possible from the Harbor water.*
- Stockpiles must be covered during construction.

The primary regulatory agency relevant to the protection of water quality is the State Water Resources Control Board. The Board establishes requirements prescribing the quality of point sources of discharge and establishes water quality objectives. These objectives are established based on the designated beneficial uses (e.g., water supply, recreation, and habitat) for a particular surface water or groundwater. NPDES permits are issued pursuant to Water Code Chapter 5.5, which implements the Federal Clean Water Act. Prohibited discharges are established locally by the Los Angeles Regional Water Quality Control Board. The NPDES General Construction Permit would not apply to the proposed project because construction activities would disturb less than one acre of land surface and would not be part of a larger common plan of development or the sale of one or more acres of disturbed land surface (California General Construction Permit 2009-0009-DWQ as amended by 2010-0014-DWQ, Modified September 2011).

Because the project site is within the City of Ventura, the applicant would be required to comply with applicable Municipal Code requirements, such as Section 8.600.430(B), Best Management Practices, as shown below, during construction activities:

Notwithstanding the presence or absence of requirements promulgated pursuant to the foregoing subsection A., any person engaged in activities or operations, or owning facilities or property, which will or may result in pollutants entering the storm drain system, or watercourses will implement best management practices to the extent they are technologically and economically achievable to prevent and reduce such pollutants.

The proposed project would also include the upgrade of existing on-site storm drain inlets with sand filters to reduce the amount of debris and trash entering harbor water from the project site. The locations of the inlets would not change. In addition, as discussed in Section

IV, *Biological Resources*, the proposed project would be subject to a Clean Marina Plan (see Appendix D) which would ensure that the long-term water-borne berthing of boats at the marina would be managed in a manner that protects water quality. The Clean Marina Plan includes rules and policies regarding oil containment, spill response, parking lot cleaning, landscaping irrigation, storm drain cleaning, etc. Continued implementation and enforcement of the policies and rules contained in the Clean Marina Plan would reduce the potential for pollutants to enter the harbor and affect water quality.

With compliance with the regulations described above and enforcement of the existing Clean Marina Plan, impacts to water quality would be less than significant.

# LESS THAN SIGNIFICANT IMPACT

*b)* Would the project substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering or the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?

As described in Section XVII, *Utilities and Service Systems*, the proposed project would incrementally increase water demand. Water would be provided by the City of Ventura, which receives 47% of its water from groundwater sources (City of Ventura UWMP, 2011). However, the water demand associated with the proposed project would not be enough to substantially deplete groundwater supply, nor would the project interfere with groundwater recharge.

# LESS THAN SIGNIFICANT IMPACT

c) Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?

Within the project area, surface water is transported overland via sheet flow, which is directed to a system of catch basins and storm drains along Anchors Way Drive and within the surface parking to vegetated areas, or directly into the Harbor. Within the project site, stormwater is transported through the existing rock revetment or via sheet flow on the launch ramp into Ventura Harbor.

The proposed project involves expansion of docks, re-paving of a parking area, adding additional restroom facilities, and other improvements to an existing marina. The proposed project would not alter the course of a stream or river and would not substantially alter the existing drainage pattern of the site. Therefore, it would not result in substantial erosion or siltation on- or off-site.

## NO IMPACT

*d)* Would the project substantially alter the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?

The project site is currently developed. The proposed project would involve re-paving an existing parking area and removing some landscaping. This would involve replacing some pervious landscaping areas with impervious asphalt materials. However, the increase in impervious surfaces would be minimal and would not substantially alter the existing drainage pattern of the site. Therefore, the proposed project would not alter the existing drainage pattern of the site such that flooding on-or off-site would occur.

## NO IMPACT

*e)* Would the project create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?

Currently, stormwater runoff is transported overland via sheet flow, which is directed to a system of catch basins and storm drains along Anchors Way Drive, to vegetated areas off-site, or directly into the Harbor. The portion of the project site on land is almost entirely covered with impervious surfaces. The proposed project would involve re-paving of an existing parking lot and addition of restroom facilities on areas already covered with impervious surfaces. The proposed project would not substantially increase the amount of runoff from the project site. Therefore, the proposed project would not generate stormwater volumes exceeding the capacity of stormwater drainage systems or provide substantial additional sources of polluted runoff.

## LESS THAN SIGNIFICANT IMPACT

## f) Would the project otherwise substantially degrade water quality?

Sources of water pollution in Ventura Harbor may include: stormwater runoff from paved areas, which can contain hydrocarbons, sediments, pesticides, herbicides, toxic metals, and coliform bacteria; illegal waste dumping can introduce contaminants such as gasoline, pesticides, herbicides, and other harmful chemicals; sediment from the rock revetment along the shoreline of the Harbor; and fuel leaks from boats or fuel docks within and adjacent to the Harbor.

With adherence to applicable regulations and policies mentioned above under part (a) during construction and operation, the project would not substantially degrade water quality.

# LESS THAN SIGNIFICANT IMPACT

# g) Would the project place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?

The western half of the project site is located on the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) panel number 06111C0745E, dated January 20, 2010, and the eastern half of the project site is located on panel number 06111C0885E, dated January 20, 2010. According to maps, portions of the project site are located in Zone AE and the Special Flood Hazard Area subject to inundation by a 100-year flood. The project site does not contain any habitable structures and no habitable structures would be developed with the proposed project. The proposed project would involve replacement of docks and associated

improvements. The proposed project would add additional boat slips, which may increase the number of live aboard residents on-site. However, residents that live aboard docked boats would not be subject to flood hazards. In addition, the proposed project involves increasing the piling height by five feet in order to protect against damage associated with storms and sea level rise.

# LESS THAN SIGNIFICANT IMPACT

*h)* Would the project place within a 100-year flood hazard area structures which would impede or redirect flood flows?

The proposed project would involve replacing existing dock structures, relocating and improving a fuel dock, construction of additional restroom facilities, and re-paving of an existing parking lot. The proposed project would not involve any new structures which would impede or redirect flood flows.

## NO IMPACT

*i)* Would the project expose people or structures to a significant risk of loss, injury, or death involving flooding, including flooding as a result of the failure of a levee or dam?

The project site is within the potential dam inundation area for Bouquet Dam. The dam meets applicable safety requirements and is inspected by the Division of Dam Safety, California Department of Water Resources, twice per year to ensure they meet all safety requirements and that necessary maintenance is performed (2005 Ventura General Plan Final EIR, August 2005). The project site is not protected by any levees.

The proposed project does not involve any new habitable or other structures (other than restroom facilities) and would not expose additional people or structures to risk of loss, injury or death involving flooding as a result of the failure of a levee or dam.

## NO IMPACT

#### *j)* Would the project result in inundation by seiche, tsunami, or mudflow?

The project site is not subject to inundation by seiche or mudflow due to the topography and location of the project site. The project site is located within the Ventura Harbor adjacent to the shoreline of the Pacific Ocean and is subject to inundation by tsunami. According to the Tsunami Inundation Map for Emergency Planning, Ventura Quadrangle, most of the project site is located within the Tsunami Inundation Area (California Department of Conservation, 2009).

The proposed project would involve replacement and expansion of docks and associated facilities. As part of the improvements to the marina, piling heights would be raised an additional five feet over the existing height for better potential tsunami protection. Therefore, although the project site is subject to tsunami-related hazards, the proposed project would reduce hazards due to potential inundation by tsunami compared to existing conditions.

#### LESS THAN SIGNIFICANT IMPACT

| Х. | LAND USE AND PLANNING   |                                      |  |                                    |              |
|    | Would the project:  |                                      |  |                                    |              |
| a) | Physically divide an established<br>community?  |                                      |  |                                    |              |
| b) | Conflict with any applicable land use plan,<br>policy, or regulation of an agency with<br>jurisdiction over the project (including, but<br>not limited to the general plan, specific<br>plan, local coastal program, or zoning<br>ordinance) adopted for the purpose of<br>avoiding or mitigating an environmental<br>effect? |                                      |  | •                                  |              |
| c) | Conflict with an applicable habitat<br>conservation plan or natural community<br>conservation plan?   |                                      |  |                                    | -            |

a) Would the project physically divide an established community?

The project site is within Ventura Harbor. The proposed project involves improvements on an already developed site and does not include features that would physically divide an established community.

#### NO IMPACT

*b)* Would the project conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?

#### City of Ventura

The project site is zoned "Harbor Commercial" (HC), has a land use designation of "Commerce" and is within the Harbor Master Plan. The proposed project does not involve any change in land use. Rather, it involves improvements to and expansion of the existing marina. Therefore, the proposed project would be consistent with the applicable City of Ventura land use plans and policies.

#### California Coastal Act

The California Coastal Act of 1976 (Public Resources Code 30000 et. seq.) establishes policies guiding development and conservation along the California coast. Coastal Act policies fall into six general categories: (1) public access; (2) recreation; (3) marine environment; (4) land

resources; (5) development; and (6) industrial development. The Coastal Act requires local jurisdictions that are located (wholly or partly) in the coastal zone to prepare a Local Coastal Program (LCP) for the portion of the local jurisdiction that lies within the Coastal Zone. The LCP consists of a Land Use Plan (such as this General Plan) and an Implementation Plan (i.e., Zoning Regulations). The Coastal Commission must approve (i.e., "certify") a City's LCP in order to ensure that the LCP is consistent with, and achieves the objectives of, the Coastal Act. The project site is located within the coastal zone for the City of Ventura. The following analysis assesses the proposed project's consistency with applicable policies of the Coastal Act that were adopted for the purpose of avoiding or mitigating and environmental impact.

#### Public Access

Article 2 of the Coastal Act provides a number of policies designed to ensure the public's constitutionally endowed right of access to coastal resources. More specifically, Article 2 coastal access policies include, but are not limited to, the following: (1) access must be provided to coastal resources (Section 30210); (2) new development shall not interfere with existing public access to coastal resources (Section 30211); and (3) public access shall be provided in specific situations involving new development between the nearest public roadway and the shoreline (Section 30212).

The project site is located within Ventura Harbor and involves replacement and expansion of an existing marina to accommodate additional boat slips and associated facilities. The proposed project would not limit or interfere with public access to coastal resources or recreational activities or facilities. By providing additional boat slips, the proposed project would improve coastal access and opportunities for recreational boaters. The proposed project also involves repaving and reconfiguration of an existing parking lot to provide additional parking spaces and improving pedestrian access by improving walkways. The potential layouts of the reconfigured parking lot are shown on figures 6 and 7 (Figure 6 shows a total of 111 spaces and no relocation of the existing fence between the parking lot and dry storage area, while Figure 7 shows relocation of the fence to provide a total of 123 spaces). About 5-17 parking spaces would be added, bringing total onsite parking to between 111 and 123 spaces. According to the minium criteria for construction by lessees at Ventura Harbor, 0.75 parking spaces should be provided for each boat slip. The proposed project would provide 111-123 spaces, which more than meets the parking requirement for the proposed 80 boat slips. Per the Port District's 2008 agreement with the Department of Boating and Waterways, the project would not use parking spaces at the adjacent boat launching facility, which is to be used solely for purposes of the boat launching facility (State of California, 2008).

#### Recreation

Article 3 of the California Coastal Act includes a number of policies designed to protect and enhance coastal-related recreational activities and facilities. Article 3 includes, but is not limited to, policies regulating the following recreational activities and facilities: (1) coastal areas suited for water-oriented recreational activities that cannot readily be provided at inland water areas (Section 30220); (2) oceanfront land suitable for recreational use (Section 30221); (3) private lands suitable for visitor-serving commercial recreational facilities (Section 30222); and (4) facilities designed to enhance recreational boating use of coastal waters (Section 30224).

The proposed project would increase recreational opportunities by providing additional boat slips for recreational boaters.

#### Marine Environment

Article 4 of the Coastal Act is designed to maintain, enhance, and restore marine resources. More specifically, Article 4 includes, but is not limited to, policies intended to achieve the following: (1) maintenance of the biological productivity and quality of coastal waters, streams, wetlands, estuaries, and lakes (Section 30231) and (2) protection of commercial fishing and recreational boating facilities (Section 30234).

As discussed in Section IV, *Biological Resources*, the proposed project would not significantly affect biological productivity. As discussed in Section IX, *Hydrology and Water Quality*, the proposed project would not significantly affect the productivity and quality of coastal waters. The proposed project involves expansion of existing recreational boating facilities. Therefore, although the proposed project would temporarily disturb the coastal environment in and around the marina during demolition and construction, it would not degrade the marine environment in the long term.

#### Land Resources, Development, and Industrial Development

Article 5 of the Coastal Act applies to development and local regulatory actions that involve environmentally sensitive habitat (Section 30240), the maintenance or conversion of agricultural lands (Section 30241-30243), and archaeological or paleontological resources (Section 30244). Article 6 of the Coastal Act applies to new development in the Coastal Zone and Article 7 includes policies that apply to coastal-depended industrial development.

The proposed project would not involve environmentally sensitive habitat (see Section IV, *Biological Resources*), the conversion of agricultural land (see Section II, *Agriculture and Forest Resources*), or impacts to archaeological or paleontological resources (see Section V, *Cultural Resources*). The proposed project would not involve any new development or industrial development. These policies would not apply.

The proposed project would not conflict with Coastal Act policies regarding public access, recreation, or the marine environment. Other policies related to land development and industrial development would not apply. The proposed project would not conflict with Coastal Act policies or policies in the City of Ventura LCP.

## LESS THAN SIGNIFICANT IMPACT

*c)* Would the project conflict with an applicable habitat conservation plan or natural community conservation plan?

No habitat conservation plans or natural community plans apply to the proposed project (2005 Ventura General Plan Final EIR, August 2005). Therefore, the proposed project would not conflict with any habitat or natural community plans.

|    | MINERAL RESOURCES<br>Would the project:  |                                      |  |                                    |              |
| a) | Result in the loss of availability of a known<br>mineral resource that would be of value to<br>the region and the residents of the state?                                    |                                      |  |                                    | •            |
| b) | Result in the loss of availability of a locally<br>important mineral resource recovery site<br>delineated on a local general plan,<br>specific plan, or other land use plan? |                                      |  |                                    | •            |

*a)* Would the project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

According to the 2005 Ventura General Plan Final EIR (Figure 4.9-2), the project site is in Mineral Resource Protection Zone 1 (MRZ-1). This zone indicates that no significant aggregate resources are present. The project site includes commercial uses and does not involve any mineral mining.

#### NO IMPACT

*b)* Would the project result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?

According to the 2005 Ventura General Plan Final EIR, oil production has played in integral role in the development of the west Ventura area. As shown on Figure 4.9-1 of the Final EIR, the project site is not located in a known petroleum field. The project site includes commercial uses and does not involve any petroleum mining.

#### **Fundamentals of Noise and Vibration**

Noise level (or volume) is generally measured in decibels (dB) using the A-weighted sound pressure level (dBA). The A-weighting scale is an adjustment to the actual sound power levels to be consistent with that of human hearing response, which is most sensitive to frequencies around 4,000 Hertz (about the highest note on a piano) and less sensitive to low frequencies (below 100 Hertz).

Because of the logarithmic scale of the decibel unit, sound levels cannot be added or subtracted arithmetically. If a sound's physical intensity is doubled, the sound level increases by 3 dBA, regardless of the initial sound level. For example, 60 dBA plus 60 dBA equals 63 dBA. Where ambient noise levels are high in comparison to a new noise source, the change in noise level would be less than 3 dBA. For example, 70 dBA ambient noise levels are combined with a 60 dBA noise source the resulting noise level equals 70.4 dBA.

Noise that is experienced at any receptor can be attenuated by distance or the presence of noise barriers or intervening terrain. Sound from a single source (i.e., a point source) radiates uniformly outward as it travels away from the source in a spherical pattern. The sound level attenuates (or drops off) at a rate of 6 dBA for each doubling of distance. For acoustically

absorptive, or soft, sites (i.e., sites with an absorptive ground surface, such as soft dirt, grass, or scattered bushes and trees), an excess ground attenuation value of 1.5 dBA per doubling of distance is normally assumed. A large object or barrier in the path between a noise source and a receiver can substantially attenuate noise levels at the receiver. The amount of attenuation provided by this shielding depends on the size of the object, proximity to the noise source and receiver, surface weight, solidity, and the frequency content of the noise source. Natural terrain features (such as hills and dense woods) and human-made features (such as buildings and walls) can substantially reduce noise levels. Walls are often constructed between a source and a receiver specifically to reduce noise. A barrier that breaks the line of sight between a source and a receiver will typically result in at least 5 dBA of noise reduction.

Vibration is a unique form of noise because its energy is carried through buildings, structures, and the ground, whereas noise is simply carried through the air. Thus, vibration is generally felt rather than heard. The ground motion caused by vibration is measured as particle velocity in inches per second and is referenced as vibration decibels (VdB) in the U.S.

The vibration velocity level threshold of perception for humans is approximately 65 VdB. The vibration thresholds established by the Federal Transit Administration (FTA) are 65 VdB for buildings where low ambient vibration is essential for interior operations (such as hospitals and recording studios), 72 VdB during normal sleep hours for residences and buildings where people normally sleep, including hotels, and 75 VdB for institutional land uses with primary daytime use (such as churches and schools). The thresholds for the proposed project include 72 VdB during normal sleep hours for residences and hotels, as these are the only sensitive receptors in the vicinity of the site. In terms of ground-borne vibration impacts on structures, the FTA states that ground-borne vibration levels in excess of 100 VdB would damage fragile buildings.

The most common and primary sources of noise in the project site vicinity are motor vehicles (e.g., automobiles, buses, and trucks) traveling along Anchors Way Drive and boats idling and traveling in the Harbor. Motor vehicle noise is of concern because it is characterized by a high number of individual events, which often create a sustained noise level, and because of its proximity to noise sensitive uses.

## **Regulatory Setting**

The City of Ventura Noise Ordinance (Municipal Code § 10.650) prohibits unnecessary, excessive, or annoying noise in the City. The Ordinance does not control traffic noise on public rights-of-way, but applies to all noise sources located on private property, including traffic noise. As part of the Ordinance, properties within the City are assigned a noise zone based on their corresponding land use. "Noise-sensitive" properties are designated as Noise Zone I; residential properties are designated Noise Zone II; commercial properties are included in Noise Zone III, and industrial/agricultural districts are designated as Noise Zone IV. The Ordinance also limits the amount of noise generated by uses during normal operation that may affect surrounding areas. Table 5 shows the allowable exterior noise levels and corresponding times of day for each of the identified noise zones.

| Designated Zone |                             | Time Interval  | Exterior Noise<br>Levels (dBA) |  |
|-----------------|-----------------------------|----------------|--------------------------------|--|
| Zone I          | Noise sensitive properties  | 7 a.m.—10 p.m. | 50                             |  |
|                 |                             | 10 p.m.—7 a.m. | 45                             |  |
| Zone II         | Residential properties      | 7 a.m.—10 p.m. | 50                             |  |
|                 |                             | 10 p.m.—7 a.m. | 45                             |  |
| Zone III        | Commercial properties       | 7 a.m.—10 p.m. | 60                             |  |
|                 |                             | 10 p.m.—7 a.m. | 55                             |  |

Table 5Noise Zone Exterior Noise Limits

Source: City of Ventura Municipal Code, Section 10.650.130B

The noise standards shown in Table 5 apply to any noise-generating activity that exceeds the applicable level for a cumulative period of more than 30 minutes in any hour. For noise levels that last less than 30 minutes, the standards are as follows:

- The exterior noise levels plus 5 dB for a total period of more than 15 minutes in any consecutive 60 minutes;
- The exterior noise levels plus 10 dB for a total period of more than 5 minutes in any consecutive 60 minutes; or
- The exterior noise levels plus 15 dB for a total period of more than 1 minute in any consecutive 60 minutes; or
- The exterior noise levels plus 20 dB for any period of time.

Noise Zone II standards would apply to the noise-sensitive receptors closest to the project site, since the project site is bordered by residential uses to the northeast. Current noise standards for Zone II permit noise levels less than 50 dBA between 7:00 AM and 10:00 PM and noise levels less than 45 dBA between 10:00 PM and 7:00 AM.

*a)* Would the project result in exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

The proposed project involves expansion of and improvements to an existing marina. The proposed project does not involve new residential uses; however, the proposed project could result in the addition of live aboard residents on boats docked at the project site. The project site is not located near a major roadway, freeway, or other major noise generator. Noise levels would be comparable to existing conditions. The proposed project would not result in the exposure of persons to or generation of noise levels in excess of City of Ventura standards.

#### LESS THAN SIGNIFICANT IMPACT

*b)* Would the project result in exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?

The proposed project does not have any operational uses that generate groundborne vibration. During construction, the proposed project would involve re-paving of the existing parking area, removal of dock structures and construction of new structures, which may involve pile driving. Depending on the equipment used, construction activities may generate groundbourne vibration.

Table 6 shows typical vibration levels associated with construction equipment.

As shown in Table 6, vibration levels could reach about 75 VdB at the timeshare facility approximately 100 feet northwest of the project site and 72 VdB at the residences 150 feet northeast of the site.

As discussed above, 100 VdB is the general threshold where minor damage can occur in fragile buildings. As vibration levels would not reach 100 VdB, structural damage would not occur as a result of construction activities. Vibration levels at the timeshare facility 100 feet from the project site could exceed the groundborne velocity threshold level of 72 VdB established by the Federal Transit Administration for residences and buildings where people normally sleep. Construction is not anticipated to take place during normal sleep hours. However, as discussed under part (d), construction activities would not occur during normal sleep hours.

| Equipment               | Approximate VdB |          |     |          |  |
|-------------------------|-----------------|----------|-----|----------|--|
| Equipment               | 50 Feet         | 100 Feet | 150 | 200 Feet |  |
| Large Bulldozer         | 81              | 75       | 72  | 69       |  |
| Loaded Trucks           | 80              | 74       | 71  | 68       |  |
| Jackhammer              | 73              | 67       | 64  | 61       |  |
| Small Bulldozer         | 52              | 46       | 43  | 40       |  |
| Underwater Pile Driving | 87              | 81       | 75  | 69       |  |

| Table 6  |  |  |  |  |
|--|--|--|--|--|
| <b>Vibration Levels for Construction Equipment</b> |  |  |  |  |

Noise levels assume an attenuation rate of 6 VdB per doubling of distance. Source: Federal Transit Administration (FTA), May 2006; Federal Railroad Administration, 1998

# LESS THAN SIGNIFICANT IMPACT

*c)* Would the project result in a substantial permanent increase in ambient noise levels above levels existing without the project?

The proposed project would not involve a change in use on the project site, but would expand the dock facilities to accommodate an additional 40 boat slips (a doubling of boats) and would accommodate larger boats. Therefore, the proposed project could increase incrementally operational noise levels associated with engine idling and from boats entering and exiting the harbor and other activities at the project site. Boats entering and exiting the facility would pass in front of the Harbortown Point timeshare complex adjacent to the project site and thus may incrementally increase noise at that facility. However, project-generated boat noise would be intermittent and would constitute a small fraction of the overall boat-generated noise in the harbor, which has about 1,500 overall boat slips as well as a boat launch. The 3% increase in the overall number of boat slips in the Harbor would have a negligible effect on noise levels. Boats at the marina include and would continue to include a mix of sailboats and motor boats. Sailboats would not involve high noise levels and motorboats would travel at low speeds (with low noise levels) within the harbor. The fuel dock would be relocated to be further away from timeshare complex to the north of the project site; therefore, noise associated with boat refueling (which generates a minimal amount of noise) would be reduced for nearby receptors. The route for boats entering and exiting the marina would not change compared to current conditions. The proposed project would not result in a substantial permanent noise increase above existing conditions.

## LESS THAN SIGNIFICANT IMPACT

*d)* Would the project result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?

Construction and demolition activities associated with the project would temporarily increase noise levels in the vicinity of the project site. Construction of each project phase is expected to take about 4-6 months so the total time of construction would be 8-12 months. Typical noise levels associated with construction activities are shown in Table 7.

Noise levels at the timeshare facility 100 feet northwest of the project site may reach up to 83 dBA during paving activities. Section 10.650.150 of the City of Ventura Noise Ordinance exempts construction activities from the long-term operational standards discussed above, provided that they are conducted between 7:00 AM and 8:00 PM when people are generally less sensitive to noise. Therefore, since construction activities would be temporary and would be subject to the City's Noise Ordinance timing requirements, impacts would be less than significant.

| Equipment Onsite        | Typical Level<br>(dBA) 50 Feet<br>from the Source | Typical Level (dBA)<br>100 Feet from the<br>Source | Typical Level (dBA)<br>150 Feet from the<br>Source |  |
|-------------------------|---|--|--|--|

| Underwater Pile Driving | 88  | 82   | 79   |  |

Table 7Typical Noise Levels at Construction Sites

Noise levels assume a noise attenuation rate of 6 dBA per doubling of distance. Source: Federal Transit Administration (FTA), May 2006; Noise From Construction Equipment and Operations, EPA PB 206 717

## LESS THAN SIGNIFICANT IMPACT

*e)* For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

The project site is located approximately six miles northwest of Oxnard Airport. The proposed project is not located within the Oxnard Airport land use plan (Airport Comprehensive Land Use Plan for Ventura County, 2000).

## NO IMPACT

*f*) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise?

The project site is not within the vicinity of a private airstrip.

#### NO IMPACT

|     |  | Potentially<br>Significant<br>Impact | Potentially<br>Significant<br>Unless<br>Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No<br>Impact |
|-----|--|--------------------------------------|--|------------------------------------|--------------|
| XII | POPULATION AND HOUSING   |                                      |  |                                    |              |
|     | Would the project:   |                                      |  |                                    |              |
| a)  | Induce substantial population growth in an<br>area, either directly (for example, by<br>proposing new homes and businesses) or<br>indirectly (for example, through extension<br>of roads or other infrastructure)? |                                      |  |                                    |              |
| b)  | Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?   |                                      |  |                                    | •            |
| c)  | Displace substantial numbers of people,<br>necessitating the construction of<br>replacement housing elsewhere?   |                                      |  |                                    |              |

*a)* Would the project induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

The proposed project does not involve the construction of residential uses. However, people are allowed to live aboard docked boats. The allowed number of liveaboard residences is based on the available restroom facilities. Each toilet/shower can serve about five liveaboards. Because the proposed project would add up to four additional toilets and three additional showers, the allowed number of liveaboards could increase by 15.

The City's current population is approximately 108,387 (DOF, 2014). With the addition of up to 15 residents associated with the proposed project, the City's population would be 108,402. The Growth Forecast Appendix of SCAG's 2012-2035 Regional Transportation Plan, which was adopted in April 2012, projects that the City of Ventura's population will increase to 116,900 in 2020 and 128,800 in 2035 (SCAG, 2012). The City's 2005 General Plan Final EIR estimates the City will have a 2025 population between 126,153 and 133,160. An increase of 15 residents would be within 2025 and 2035 growth forecasts for the City. Therefore, the proposed project would be consistent with population forecasts for the City and would not generate substantial population growth.

## LESS THAN SIGNIFICANT IMPACT

*b)* Would the project displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?

Currently, there are seven live aboard residents on four boats docked on the project site. The proposed project would involve expanding the existing dock structure. During Phase 1 of construction, boats would be moved to the other side of the docks. During Phase 2, the west side of the docks would be replaced and boats would be docked on the east side. Therefore, no temporary or long-term displacement of boats would occur. In addition, the proposed project would add live aboard residential opportunities and could provide housing for up to 15 additional residents.

#### NO IMPACT

*c)* Would the project displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?

As discussed above, the phased construction would avoid any temporary displacement of liveaboards. No people would be displaced in the long term.

#### NO IMPACT

|  | Potentially<br>Significant<br>Impact | Potentially<br>Significant<br>Unless<br>Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No<br>Impact |

| XIV. PUBLIC SERVICES   |                                      |  |                                    |              |
| a) Would the project result in substantial<br>adverse physical impacts associated with<br>the provision of new or physically altered<br>governmental facilities, or the need for<br>new or physically altered governmental<br>facilities, the construction of which could<br>cause significant environmental impacts,<br>in order to maintain acceptable service<br>ratios, response times or other<br>performance objectives for any of the<br>public services: |                                      |  |                                    |              |
| i) Fire protection?  |                                      |  |                                    |              |
| ii) Police protection?   |                                      |  |                                    | •            |
| iii) Schools?  |                                      |  |                                    |              |
| iv) Parks?   |                                      |  |                                    | •            |
| v) Other public facilities?  |                                      |  |                                    |              |

*a* (*i*) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for fire protection?

The project site is served by the Ventura Harbor Patrol, which provides water fire suppression, rescue, and emergency medical services, as well as the Ventura City Fire Department (VCFD) which provides landside fire suppression and emergency medical services. The Ventura Harbor Patrol provides both land and waterside services within the Ventura Harbor and the Harbor Patrol station is located approximately 1,000 feet northwest of the project site (Ventura Harbor Patrol website, accessed February 2015). The closest VCFD station is Station #5, located at 4225 East Main Street, approximately 3.5 miles east of the project site.

The proposed project involves repaving a parking lot and expansion of an existing marina and relocation of the fuel dock. Because the proposed project involves expansion of the marina, the proposed project may incrementally increase the number of emergency calls. However, the proposed project is within existing service areas and would not create the need for new or physically altered Harbor Patrol or VCFD facilities. In addition, the proposed project involves relocating and upgrading the existing fuel dock, which would reduce the risk of fire from the fuel facilities. Further, the proposed project includes the upgrade of an existing three-inch

diameter water line to a six-inch diameter. Therefore, the proposed project would increase water pressure and water availability for the fire department. The proposed project would be required to comply with all applicable regulations regarding fire prevention, including the Ventura Harbor Ordinance (Ventura Port District, Ordinance #44, adopted 2004, amended 2008) which includes provisions for emergency access, fire access, and regulations regarding flammable materials.

## NO IMPACT

a (ii) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for police protection?

The proposed project would be served by the City of Ventura Police Department (VPD). The VPD headquarters are located at 1425 Dowell Drive approximately 4 miles east of the project site. The proposed project would involve expansion of the existing marina. The proposed project may increase the number of live aboard residents, which may incrementally increase the need for police protection services. However, the proposed project involves installation of keyless card system for docks and the facilities to provide better safety and security. The incremental increase in the number of live aboard residents would not substantially affect demands on the VPD such that new or expanded facilities would be required.

## NO IMPACT

a (iii) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for schools?

The project site is within the boundary of the Ventura Unified School District. The existing yacht yard currently houses seven live aboard residents on four boats. The proposed project involves expansion of an existing yacht yard to increase the number of boat slips and associated facilities. With the increase in the number of boat slips as a result of the proposed project, the number of live aboard residents could increase. However, the exact number of future live aboard residents with the proposed project is unknown at this time. As the proposed project involves an approximate doubling of boat slips, it is assumed for the purposes of this analysis that the number of live aboard residents would double to 15 residents. However, it is unlikely that the proposed project would house school-aged children. Nonetheless, should the number of school-aged children increase as a result of the proposed project, the increase would be incremental and would not require the need for new or physically altered schools.

## NO IMPACT

a (iv) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for parks? The proposed project involves expansion of the existing marina and may incrementally increase the population of Ventura by an estimated 15 residents. This incremental increase in the number of residents would not result in need for new or physically altered parks. (See also discussion below in Section XV, *Recreation*.)

## NO IMPACT

a (v) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for other public facilities?

The proposed project would not result in the need for any other new or physically altered government facilities.

## NO IMPACT

| xv | RECREATION   | Potentially<br>Significant<br>Impact | Potentially<br>Significant<br>Unless<br>Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No<br>Impact |
|----|--|--------------------------------------|--|------------------------------------|--------------|
| a) | Would the project increase the use of  |                                      |  |                                    |              |
|    | existing neighborhood and regional parks<br>or other recreational facilities such that<br>substantial physical deterioration of the<br>facility would occur or be accelerated? |                                      |  |                                    | -            |
| b) | Does the project include recreational facilities or require the construction or  |                                      |  |                                    |              |
|    | expansion of recreational facilities which<br>might have an adverse physical effect on<br>the environment?   |                                      |  |                                    |              |

*a)* Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? The proposed project involves expansion of the existing marina and may incrementally increase the population of Ventura by an estimated 15 residents. This incremental increase in the number of residents would not increase the use of existing parks and recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated. The proposed project would improve recreational facilities for boaters by providing additional boat slips and associated recreational boating facilities.

## NO IMPACT

*b)* Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

The proposed project involves expansion of an existing marina for recreational boaters. The environmental impacts associated with the proposed project are discussed throughout this document. No impact would occur.

#### XVI. TRANSPORTATION/TRAFFIC

- -- Would the project:
- a) Conflict with an applicable plan, ordinance or policy establishing a measure of effectiveness for the performance of the circulation system, taking into account all modes of transportation, including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways, and freeways, pedestrian and bicycle paths, and mass transit?
- b) Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?
- c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?
- d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible use (e.g., farm equipment)?
- e) Result in inadequate emergency access?
- f) Conflict with adopted policies, plans, or programs regarding public transit, bikeways, or pedestrian facilities, or otherwise substantially decrease the performance or safety of such facilities?

*a)* Would the project conflict with an applicable plan, ordinance or policy establishing a measure of effectiveness for the performance of the circulation system, taking into account all modes of

 $\square$ 

transportation, including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways, and freeways, pedestrian and bicycle paths, and mass transit?

Associated Transportation Engineers (ATE) prepared a traffic impact analysis for the proposed project (see Appendix C). The following is based on the ATE report. The project site is served by a network or arterial roads and collector streets, including:

- *Harbor Boulevard* a four -lane arterial roadway that extends north-south from the Ventura County Fairgrounds to Channel Islands Harbor in the City of Port Hueneme.
- *Schooner Drive* a four-lane collector street that extends east-west between Anchors Way Drive and Harbor Boulevard.
- *Anchors Way Drive* a two-lane roadway that extends from the northern harbor boundary to its terminus at Navigator Drive.

Access to the project site is provided via four driveway connections to Anchors Way Drive.

## Project Trip Generation

Trip generation estimates for the proposed project were developed using data published in the San Diego Association of Governments (SANDAG) trip generation report for marinas. Table 8 shows the trip generation forecasts for the proposed project. As shown, the proposed project would generate an estimated 156 average daily trips (ADT), 5 AM peak hour trips, and 11 PM peak hour trips.

| Land Llas | Size          | ADT  |       | AM Peak Hour |                | PM Peak Hour |                |
|-----------|---------------|------|-------|--------------|----------------|--------------|----------------|
| Land Use  | Size          | Rate | Trips | Rate         | Trips (in/out) | Rate         | Trips (in/out) |
| Marina    | 40 Boat Slips | 4.0  | 160   | 0.12         | 5 (2/3)        | 0.28         | 11 (7/4)       |

Table 8 Project Trip Generation

Source: ATE, 2015

#### Project Trip Distribution

Trip distribution percentages were developed for project traffic based on traffic patterns observed at the Harbor Boulevard/Schooner Drive intersection.<sup>1</sup> Table 9 presents the trip distribution pattern developed for the proposed project.

<sup>&</sup>lt;sup>1</sup> It is anticipated that only minimal traffic would access the project site via Beachmont Street because of the traffic calming devices along that residential street. Use of Beachmont Street to access the project site would be further reduced by a partial cul-de-sac planned at the terminus of Beachmont Street that would prevent vehicles on Beachmont Street from entering Anchors Way. Consequently, the analysis focuses on potential impacts at the Harbor Boulevard/Schooner Drive intersection.

| Origin/Destination | Direction | Distribution % |
|--------------------|-----------|----------------|
| Harbor Boulevard   | North     | 65%            |
| Harbor Boulevard   | South     | 35%            |

Table 9 Project Trip Generation

Source: ATE, 2015

#### Existing + Project Intersection Operations

Because traffic flow on city streets is generally most constrained at intersections, detailed traffic flow analysis focuses on intersection operations during peak travel periods. In rating intersection operations, "Level of Service" (LOS) A through F are used, with LOS A indicating free flow operations and LOS F indicating congested operations. The City of Ventura considers LOS E as the acceptable standard for freeway interchange intersections and LOS D as the acceptable standard at Principal Intersections within the City. Principal Intersections are intersections that are regularly monitored by the City as a gauge of the operation of the City's circulation system. The City does not have a level of service standard for non-Principal Intersections, except for those that are located on the CMP network, where LOS E is the acceptable standard.

Existing volumes for the Harbor Boulevard/Schooner Drive intersection were obtained from counts conducted in February 2015 (traffic counts are included as an appendix to the traffic study, Appendix C). Level of service for the study area intersections were calculated based on the "Intersection Capacity Utilization" (ICU) methodology parameters outlined in the City's 2005 Ventura General Plan EIR.

Table 10 compares the delay time and LOS between existing conditions and existing conditions plus the proposed project. As shown, project development would not significantly impact traffic operations, and would not conflict with LOS standards adopted by the City of Ventura.

| latere estiere    | Deck      | Existing |     | Existing + Project |     | Project-Added | Significant |
|-------------------|-----------|----------|-----|--------------------|-----|---------------|-------------|

#### Cumulative + Project Intersection Operations

Cumulative traffic volume forecasts for the Harbor Boulevard/Schooner Drive intersection were developed using data from the City's General Plan Traffic Model and future developments in the harbor area. Development projects in the Harbor area include the Sonderman Marina project (104 new boat slips) and the Port District G&H Dock project (loss of 20 boat slips). Table 11 compares the delay time and LOS between cumulative conditions and cumulative conditions plus the proposed project. As shown, project development would not significantly impact cumulative traffic operations, and would not conflict with LOS standards adopted by the City of Ventura.

| lutere estiere    | Deck      | Cumulative |     | Cumulative + Project |     | Project-    | Significant |
|-------------------|-----------|------------|-----|----------------------|-----|-------------|-------------|

## LESS THAN SIGNIFICANT IMPACT

*b)* Would the project conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?

The Ventura County Congestion Management Program (CMP) road network is comprised of the state highway system and principal arterials in Ventura County. Harbor Boulevard near the project site is located within the CMP network (CMP, 2009). As shown above in tables 10 and 11, the proposed project would not significant affect operations on Harbor Boulevard.

## LESS THAN SIGNIFICANT IMPACT

*c)* Would the project result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?

The airport closest to the project site is the Oxnard Airport located approximately six miles southeast of the project site. The proposed project would not affect air traffic at this airport.

## NO IMPACT

*d)* Would the project substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible use (e.g., farm equipment)?

The project does not include any design features that would increase hazards. The proposed project would not involve a change in use on the project site and would not involve the use of vehicles or equipment, such as farm equipment or tractors, that would be incompatible with the existing land uses surrounding the area.

The project would add boat slips, accommodate larger boats, and include a relocated fuel dock. It would also extend the dock farther into the main harbor channel as compared to the existing dock. However, the extended dock would be consistent with the channel limit adopted by the Port District Commission in June 2014. In addition, new facilities would be built to current design standards and would not include any features that would create hazardous conditions.

As discussed in Section VIII, *Hazards and Hazardous Materials*, the new fuel dock is expected to improve safety conditions as compared to the existing facility. The larger boats can be accommodated within the proposed new docks and would not adversely affect safety conditions in Ventura Harbor.

## LESS THAN SIGNIFICANT IMPACT

#### e) Would the project result in inadequate emergency access?

Emergency vehicles can currently access the project site by land via existing roadways and by water within the Harbor. The proposed project would not involve construction of new structures such that inadequate emergency access would occur. The project would be required to conform to safety regulations that specify adequate emergency access measures and would expand onsite parking. The site is located along an existing roadway lacking any identified significant safety hazards. The proposed project would not hinder emergency access or evacuation.

## LESS THAN SIGNIFICANT IMPACT

*f)* Would the project conflict with adopted policies, plans, or programs regarding public transit, bikeways, or pedestrian facilities, or otherwise substantially decrease the performance or safety of such facilities?

The project site includes pedestrian facilities in the form of sidewalks and ramps to the existing boat slips. Sidewalks are located along the water line and along Anchors Way Drive. No bicycle or public transit facilities are located on or near the project site.

The proposed project would improve pedestrian facilities by providing an ADA-compliant ramp on the promenade walkway, which would span the distance of the marina and connect to adjacent public walkways. The proposed project would not conflict with adopted pedestrian policies, plans or programs.

The proposed project would not affect public transit or bikeway facilities and would not conflict with adopted public transit or bikeway policies, plans, or programs.

#### Potentially Significant Potentially Unless Less than Significant Mitigation Significant No Impact Incorporated Impact Impact **XVII. UTILITIES AND SERVICE SYSTEMS** -- Would the project: a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board? Ventura Port District

| d) | Have sufficient water supplies available to<br>serve the project from existing<br>entitlements and resources, or are new or<br>expanded entitlements needed?  |                                      |  |                                    |              |
| e) | Result in a determination by the<br>wastewater treatment provider which<br>serves or may serve the project that it has<br>adequate capacity to serve the project's<br>projected demand in addition to the<br>provider's existing commitments? |                                      |  |                                    |              |
| f) | Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?   |                                      |  | -                                  |              |
| g) | Comply with federal, state, and local statutes and regulations related to solid waste?  |                                      |  | •                                  |              |

*a)* Would the project exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?

The proposed project would add up to four additional toilets and three additional showers to serve guests and residents. Therefore, the proposed project may incrementally increase wastewater generation compared to existing conditions.

The project site is within the service area of the City of Ventura's Water Department (Ventura Water), which provides water and wastewater services to most of the City. The Ventura Water Reclamation Facility, located in the Ventura Harbor area, treats most of the wastewater for the City, including the Downtown. This plant was originally designed with a capacity of 14 million gallons per day (MGD) and provides tertiary treatment, effluent filtration and chlorination/dechlorination. The effluent then discharges into the Santa Clara River Estuary. Solids handling consists of thickening, anaerobic digestion and dewatering by filter presses prior to land

application. Plant flow in 2004 averaged just under 9.0 MGD. A minimum of 5.6 MGD of the effluent is discharged to the Santa Clara Estuary as required by the City's Regional Water Quality Control Broad (RWQCB) Permit. The remaining effluent is either transferred to recycling ponds, where a portion is delivered as reclaimed water, or lost through percolation or evaporation.

Additional demands on the City's wastewater systems have been anticipated in the 2005 General Plan and the 2005 General Plan FEIR, which was reviewed by the South Coast Regional Water Quality Control Board (SCRWQCB). Liveaboards and day users of the docks could use new bathroom facilities and incrementally increase wastewater generation. However, as discussed in Section XIII, *Population and Housing*, the incremental increase in population that could be accommodated by the proposed project is within the growth forecast anticipated in the City's General Plan. Therefore, the proposed project would not generate wastewater exceeding wastewater treatment requirements of the SCRWQCB.

## LESS THAN SIGNIFICANT IMPACT

*b)* Would the project require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?

As discussed above, additional demands on the City's water and wastewater systems have been anticipated in the 2005 General Plan and the 2005 General Plan Final EIR. The incremental increase in population that could be accommodated by the proposed project is within the growth projections anticipated in the City's General Plan and General Plan Final EIR. Therefore, the proposed project would not require the construction of new water or wastewater treatment facilities.

## LESS THAN SIGNIFICANT IMPACT

*c)* Would the project require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?

As discussed in Section IX(c), *Hydrology and Water Quality*, the proposed project would not increase the amount of impervious surfaces on the project site. Therefore, the proposed project would not increase stormwater runoff compared to existing conditions. Stormwater runoff levels would be comparable to existing conditions and stormwater would continue to flow to gutter facilities and catch basins along Anchors Way Drive and via sheet flow to the Harbor. The proposed project would not require the construction of new storm water drainage facilities or expansion of existing facilities.

## LESS THAN SIGNIFICANT IMPACT

*d)* Would the project have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?

The City of Ventura's Comprehensive Water Resources Report (CWRR) identifies the City's existing (as of May 1, 2014) baseline water demand as 17,343 AFY and the existing and reliable

water supply as 19,600 AFY. The future water supply projections range from 19,535 AFY to 20,935 AFY. The future water demand for all existing development that is either under construction or approved is projected to be 17,343 AFY according to the 2014 Comprehensive Water Resources Report.

The proposed project would involve adding additional restroom facilities which may incrementally increase on-site water demand. Assuming the two additional restroom facilities would use approximately 250 gallons per day, the proposed project would increase water demand by approximately 500 gallons per day or 0.56 acre feet per year. Therefore, the demand and build out would be within the City's estimate of water supply. The proposed project's estimated annual water supply of 0.56 AFY would not cause the City's water demand to exceed the projected supply and groundwater supplies would not be depleted.

## LESS THAN SIGNIFICANT IMPACT

*e)* Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

The proposed project would add up to four additional toilets and three additional showers to serve guests and residents. Therefore, the proposed project may incrementally increase wastewater generation compared to existing conditions. Wastewater flows from the project site are treated at the City's Ventura Water Reclamation Facility in the Harbor area near the mouth of the Santa Clara River. Additional demands on the City's wastewater systems have been anticipated in the 2005 General Plan and the 2005 General Plan FEIR. As discussed in Section XIII, *Population and Housing*, the proposed project is within the growth forecast anticipated in the City's General Plan. Therefore, the proposed project would not exceed the capacity of the Ventura Water Reclamation Facility.

## LESS THAN SIGNIFICANT IMPACT

## *f)* Would the project be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?

Solid waste disposal is an issue of regional and statewide significance, especially as landfills are approaching and/or reaching their capacities. In addition, the ability to develop new landfills is complicated by numerous environmental, regulatory and political concerns. Recycling and reusing waste materials provides significant additional environmental benefits such as reducing resource and energy use, conserving water, and reducing pollution, but recycling and reusing waste materials has not eliminated the need to develop new landfills.

Assembly Bill 939, passed in 1989, required all jurisdictions in California to increase their landfill diversion to 50% by the year 2000. In addition, AB 341 passed in 2012, sets a new statewide goal of achieving 75% landfill diversion by 2020. The bill also requires businesses generating more than 4 cubic yards of solid waste to recycle and requires owners of multi-family housing with 5 or more units to provide recycling for their tenants. New development projects in Ventura are required to implement site-specific source reduction, recycling, and reuse programs to comply with AB 939 and AB 341.

Construction and demolition projects can generate large amounts of waste. Demolition would generate the following materials requiring disposal:

- 20,320 cubic feet of cement
- 20,320 cubic feet of wood
- 83 wood pilings of different sizes
- 20 12" x 12' beams
- 40 4" x 20' cross beams

Most of the waste is recyclable, including asphalt, concrete, wood, cardboard and metal. As of January 1, 2011, the new *California Green Building Standards Code* (California Code of Regulations, Title 24, Part II, available online at

http://www.bsc.ca.gov/Home/CALGreen.aspx) went into effect. Section 5.408 now requires all new construction projects to file and implement a construction and demolition Waste Management Plan (WMP). The City's Environmental Sustainability Division works in conjunction with its Building and Safety Division in reviewing and assisting applicants with their WMP plans. The WMP must be submitted and approved as part of the plan-check process before a building permit can be issued. Implementation of the WMP must result in diversion of at least 50% of the waste generated during a construction project.

Solid waste generated in the City of Ventura is typically hauled to Gold Coast Recycling and Transfer Station. Solid waste is sorted and either hauled to Toland Road Landfill (maximum permitted capacity of 1,500 tons per day day) for disposal or segregated into recyclable materials and sent off to various recycling markets.

The proposed project would also add up to 15 additional liveaboards as well as additional day users of the docks. Using the per capita solid waste generation factor of 0.0096 tons per person per day from Table 4.11-17 of the 2005 General Plan Final EIR, the new liveaboards would generate a an estimated 0.144 tons of additional solid waste per day. With a diversion rate of at least 50% in accordance with AB 939, the total net increase would be 0.072 tons per day. This incremental increase in solid waste generation would not exceed the capacity of local landfills. Solid waste associated with day users would be nominal and would not adversely affect local landfills.

## LESS THAN SIGNIFICANT IMPACT

## *g)* Would the project comply with federal, state, and local statutes and regulations related to solid waste?

As discussed under part (f), the proposed project would comply with applicable states and regulations including AB 939 and AB 341 and California Green Building Code regulations regarding construction and demolition waste.

#### LESS THAN SIGNIFICANT IMPACT

|--|--------------------------------------|--|------------------------------------|--------------|
| XVIII. MANDATORY FINDINGS OF<br>SIGNIFICANCE   |                                      |  |                                    |              |
| a) Does the project have the potential to<br>substantially reduce the habitat of a fish of<br>wildlife species, cause a fish or wildlife<br>population to drop below self- sustaining<br>levels, eliminate a plant or animal<br>community, reduce the number or restrict<br>the range of a rare or endangered plant or<br>animal or eliminate important examples of<br>the major periods of California history or<br>prehistory? |                                      | ■  |                                    |              |
| b) Does the project have impacts that are<br>individually limited, but cumulatively<br>considerable? ("Cumulatively<br>considerable" means that the incremental<br>effects of a project are considerable when<br>viewed in connection with the effects of<br>past projects, the effects of other current<br>projects, and the effects of probable future<br>projects)?   |                                      |  | •                                  |              |
| c) Does the project have environmental<br>effects which will cause substantial<br>adverse effects on human beings, either<br>directly or indirectly?   |                                      |  | •                                  |              |

*a)* Does the project have the potential to substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self- sustaining levels, eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

As noted in Section IV, *Biological Resources*, impacts to biological resources are potentially significant but incorporation of this mitigation measures BIO-1 through BIO-4 would reduce impacts to wildlife to a less than significant level. As noted under Section V, *Cultural Resources*, the proposed project would not impact known cultural or historic resources. Potential impacts to important examples of the major periods of California history or prehistory would be less than significant.

#### POTENTIALLY SIGNIFICANT UNLESS MITIGATION INCORPORATED

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

All potential environmental impacts of the project have been determined in this Initial Study to have no impact, a less than significant impact, or less than significant with mitigation incorporated. Cumulative impacts with some of the resource areas have been addressed in the individual resource sections above: Air Quality, Greenhouse Gases, Wastewater, Water Supply, and Solid Waste (see CEQA Guidelines Section 15064(h)(3).). As described in Section XVI, Transportation/Traffic, the proposed project would not contribute to any significant cumulative impacts. As noted in Section IV, Biological Resources, impacts to biological resources could be potentially significant and therefore mitigation measures BIO-1 through BIO-5 has been required to reduce potential impacts. Incorporation of these mitigation measures would reduce impacts to wildlife to a less than significant level. Development projects in the Harbor area include the Sonderman Marina project (104 new boat slips) and the Port District G&H Dock project (loss of 20 boat slips). These projects would have similar impacts to that of the proposed project with respect to traffic, hydrology and water quality, and biological resources. However, with adherence to existing regulations and implementation of standard mitigation there would be no cumulative impacts. As such, cumulative impacts would be less than significant (not cumulatively considerable).

## LESS THAN SIGNIFICANT IMPACT

*c)* Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

In general, impacts to human beings are associated with air quality, hazards and hazardous materials, traffic, and noise impacts. As detailed in the preceding sections, the proposed project would not result, either directly or indirectly, in adverse hazards related to air quality, hazards or hazardous materials, noise or traffic.

#### LESS THAN SIGNIFICANT IMPACT

# TRAFFIC IMPACT ANALYSIS FOR THE VENTURA HARBOR MARINA AND YACHT YARD EXPANSION PROJECT - VENTURA, CALIFORNIA

Associated Transportation Engineers (ATE) has prepared the following traffic impact analysis for the Ventura Harbor Marina and Yacht Yard Expansion Project. The analysis presents the trip generation estimates developed for the project and identifies potential project-specific and cumulative impacts to the surrounding street network based on the City of Ventura's impact thresholds.

#### **PROJECT DESCRIPTION**

The project site is located at 1644 Anchors Way Drive in the northern portion of the Ventura Harbor. Figure 1 (attached) presents the location of the project site within the harbor. The project is proposing to increase the number of boat slips from 40 to 79 (39 new boat slips) and relocate the existing fuel dock and bait receiver facilities. The new boat slips would be used by a mix of commercial and private vessels. Figure 2 presents the project site plan.

#### **EXISTING CONDITIONS**

#### Street Network

The project site is served by a network of arterial roads and collector streets as illustrated in Figure 1. The following text provides a brief description of the major components of the study-area street network.

Joe Power

Page 2

*Harbor Boulevard* is a four-lane arterial roadway that extends north-south from the Ventura County Fairgrounds to Channel Islands Harbor in the City of Port Heuneme.

*Schooner Drive* is a four-lane collector street that extends east-west between Anchors Way Drive and Harbor Boulevard.

Anchors Way Drive is a two-lane roadway that extends from the northern harbor boundary to its terminus at Navigator Drive. Access to the project is provided via four driveway connections to Anchors Way Drive.

#### **Existing Intersection Operations**

Because traffic flow on city streets is generally most constrained at intersections, detailed traffic flow analyses focus on intersection operations during peak travel periods. In rating intersection operations, "Levels of Service" (LOS) A through F are used, with LOS A indicating free flow operations and LOS F indicating congested operations. The City of Ventura considers LOS E as the acceptable standard at freeway interchange intersections and LOS D as the acceptable standard at the Principal Intersections within the City. Principal Intersections are intersections that are regularly monitored by the City as a gauge of the operation of the City's circulation system. The City does not have a level of service standard for non-Principal Intersections, except for those that are located on the CMP<sup>1</sup> network, where LOS E is the acceptable standard.

Existing traffic volumes for the Harbor Boulevard/Schooner Drive intersection were obtained from counts conducted for this study in February 2015 (count data attached for reference). Figure 3 present the existing traffic volumes for the study-area intersection.

Levels of service for the study-area intersection was calculated based on the "Intersection Capacity Utilization" (ICU) methodology parameters outlined in the City's <u>2005 Ventura</u> <u>General Plan EIR</u><sup>2</sup>. Table 1 presents the existing A.M. and P.M. peak hour levels of service for the study-area intersection (LOS calculation worksheets are attached for reference).

<sup>&</sup>lt;sup>1</sup> <u>2004-2005 Ventura County Congestion Management Program</u>, Ventura County Transportation Commission, 2005.

<sup>&</sup>lt;sup>2</sup> City of Ventura 2005 General Plan, Final Environmental Impact Report, City of Ventura, August 2005.

#### Page 3

March 16, 2015

#### Table 1 Existing Intersection Operations

| and the second second           | C       | A.M. Pe | eak Hour | P.M. Pe | eak Hour |
|---------------------------------|---------|---------|----------|---------|----------|
| Intersection                    | Control | ICU LOS |          | ICU     | LOS      |
| Harbor Boulevard/Schooner Drive | Signal  | 0.41    | LOS A    | 0.43    | LOS A    |

As shown in Table 1, the Harbor Boulevard/Schooner Drive intersection currently operates at LOS A during the peak hour periods. These operations are considered acceptable based on the City's operating standards.

#### PROJECT-SPECIFIC ANALYSIS

#### **Project Trip Generation**

Trip generation estimates for the proposed marina expansion were developed using data published in the San Diego Association of Governments (SANDAG) trip generation report for Marinas<sup>3</sup>. Table 2 presents the trip generation forecasts developed for the project.

| a contractory |               | A    | DT    | A.M  | I. Peak Hour   | P.M  | . Peak Hour    |
|---------------|---------------|------|-------|------|----------------|------|----------------|
| Land-Use      | Size          | Rate | Trips | Rate | Trips (In/Out) | Rate | Trips (In/Out) |
| Marina        | 39 Boat Slips | 4.0  | 156   | 0.12 | 5 (2/3)        | 0.28 | 11 (7/4)       |

#### Table 2 Project Trip Generation Estimates

The data presented in Table 2 show that the proposed marina expansion is forecast to generate 156 average daily trips (ADT), 5 A.M. peak hour trips, and 11 P.M. peak hour trips.

#### **Project Trip Distribution**

Trip distribution percentages were developed for project traffic based on traffic patterns observed at the Harbor Boulevard/Schooner Drive intersection. Table 3 presents the trip distribution pattern developed for the project. Figure 4 shows the distribution and assignment of project-generated trips to the study-area street network.

<sup>&</sup>lt;sup>3</sup> Trip Generators, San Diego County Association of Governments, April 2002.

Joe Power

#### Page 4

March 16, 2015

#### Table 3 Project Trip Distribution Percentages

| Origin/Destination                   | Direction      | Distribution % |
|--------------------------------------|----------------|----------------|
| Harbor Boulevard<br>Harbor Boulevard | North<br>South | 65%<br>35%     |
| al                                   |                | 100%           |

#### Existing + Project Intersection Operations

Levels of service were calculated for the Harbor Boulevard/Schooner Drive intersection assuming the Existing + Project traffic volumes presented on Figure 5. Tables 4 and 5 compare the Existing and Existing + Project LOS and identify impacts based on the City of Ventura's impact thresholds.

#### Table 4 Existing + Project Intersection Operations - A.M. Peak Hour

|                                 | ICL        | / LOS              | Project-    | Impact? |
|---------------------------------|------------|--------------------|-------------|---------|
| Location                        | Existing   | Existing + Project | Added Trips | Impact? |
| Harbor Boulevard/Schooner Drive | 0.41/LOS A | 0.41/LOS A         | 5           | No      |

| Table 5   |
|---|
| Existing + Project Intersection Operations - P.M. Peak Hour |

|                                 | ICL        | / LOS              | Project-    | Impact? |
|---------------------------------|------------|--------------------|-------------|---------|
| Location                        | Existing   | Existing + Project | Added Trips | Impact? |
| Harbor Boulevard/Schooner Drive | 0.43/LOS A | 0.43/LOS A         | 11          | No      |

The data presented in Tables 4 and 5 indicate that the Harbor Boulevard/Schooner Drive intersection would continue to operate at LOS A with Existing + Project traffic volumes. The proposed marina expansion would not generate significant impacts to the study-area intersection based on the City's impact thresholds.

Joe Power

Page 5

#### CUMULATIVE ANALYSIS

### **Cumulative Traffic Volumes**

Cumulative traffic volume forecasts for the Harbor Boulevard/Schooner Drive intersection were developed using data from the City's General Plan Traffic Model and future developments in the harbor area. Figure 5 presents the cumulative peak hour traffic volumes for the study-area intersection.

#### Cumulative + Project Intersection Operations

Levels of service were calculated for the Harbor Boulevard/Schooner Drive intersection assuming the Cumulative Cumulative + Project traffic volumes presented on Figure 6. Tables 6 and 7 compare the Cumulative and Cumulative + Project LOS and identify impacts based on the City of Ventura's impact thresholds.

| Table 6   |
|---|
| Cumulative + Project Intersection Operations - A.M. Peak Hour |

|                                 |            | U / LOS              | Project-    | Impact? |
|---------------------------------|------------|----------------------|-------------|---------|
| Location                        | Cumulative | Cumulative + Project | Added Trips | Impacts |
| Harbor Boulevard/Schooner Drive | 0.44/LOS A | 0.44/LOS A           | 5           | No      |

| Table 7   |
|---|
| Cumulative + Project Intersection Operations - P.M. Peak Hour |

| . 1.0.1.0.1                     | IC         | Project-             | Impact?     |         |
|---------------------------------|------------|----------------------|-------------|---------|
| Location                        | Cumulative | Cumulative + Project | Added Trips | impacts |
| Harbor Boulevard/Schooner Drive | 0.64/LOS B | 0.64/LOS B           | 11          | No      |

The data presented in Tables 6 and 7 indicate that the Harbor Boulevard/Schooner Drive intersection is forecast to operate at LOS B or better with the addition of cumulative traffic. The proposed marina expansion would not generate cumulative significant impacts to the study-area intersection based on the City's impact thresholds.

Joe Power

Page 6

March 16, 2015

This concludes our traffic impact analysis for the Ventura Harbor Marina and Yacht Yard Expansion Project.

Appendix DVentura Harbor Marina & Yacht Yard Clean Marina Plan

# CLEAN MARINA PLAN and SLIP RULES & REGULATIONS

April 2014

# ATTACHMENT 1 Ventura Harbor Marina & Yacht Yard Clean Marina Plan — 2014

#### 1 <u>EMERGENCIES</u>

- 1 <u>Emergency Action Plan:</u> VHMYY has an emergency action plan which is found In Attachment A of this document.
- 2 <u>Emergency Containment and Cleanup Materials</u>: VHMYY maintains a supply of emergency containment/clean up materials including oil absorbent pads and booms. By policy VHMYY maintains enough boom material to encircle the largest vessel and an entire Dock Area at the facility.
- 3 <u>Training</u>: All VHMYY staff receive training on proper emergency procedures. This training is provided to employees every 6 months and to all new employees. This training is to include:
  - a. Familiarization of Emergency Action Plan.
  - b. Location and use of first responder containment and cleanup materials.
  - c. Proper notifications for all types of emergencies.
  - d. Location and use of fire suppression equipment.

#### 4

Boater Education: VHMYY maintains supplies of pamphlets on:

- a. Boat Fire Extinguishers.
- b. Safe Boat Maintenance.
- c. Continuous Ventilation.

#### 1 <u>PETROLEUM CONTAINMENT:</u>

- 1 Fuel & Oil Spill Prevention and Containment Plan (FOPC): VHMYY maintains an FOPC which is found as part of Emergency Action Plan (Attachment A) of this plan.
- <u>Training</u>: VHMYY staff receive training to identify fuel/oil spills in the water, notify the Harbor Patrol, Vessel Assit and VHMYY Management, and in the proper use and location of first response containment/clean up materials. This training is provided to employees every 6 month and to all new employees.
- 3 <u>Emulsifiers</u>:

It is a violation of VHMYY Rules and Regulations to use detergents or other emulsifying agents when addressing fuel or oil spills (see Rules).

1

- 4 <u>Absorbent Bilge Materials</u>: VHMYY requires that all boats located at the facility use oil absorbent materials in their bilges to reduce the changes of illegal overboard discharges of oily bilge water. (See Rules).
- 5 <u>Clean & Green Program</u>: VHMYY participates in the Clean and Green Campaign created by the California Coastal Commission. Through this program the Marina provides oil absorbent pads to boaters and disposal of used pads. Pads are placed in bilges, or can be used to clean up oil spills in or out of the water. Information about the oil absorbent pad exchange program is available at the VHMYY office. Signs about the program are posted at the waste oil disposal units.
- 6 <u>Boater Education:</u> VHMYY maintains supplies of pamphlet on:
  - a. Filling fuel containers.
  - b. Appropriate engine maintenance.
  - c. Appropriate use of oil absorbent materials
  - d. Appropriate bilge pumping.
- <u>Used Oil Collection</u>: Waste Oil disposal is located behind VHMYY offices.
   There is a fee for this and you must contact office during work hours.
   Flyers directing boaters to the oil collection facilities are available at the VHMYY office.

#### 1 VESSEL CLEANING AND MAINTENANCE:

- 1 <u>VHMYY Rules and Regulations:</u> VHMYY maintains comprehensive rules and regulations for boaters and others at the facility. VHMYY rules and regulations are posted at the VHMYY office during work hours. <u>These rules and</u> regulations will be strictly enforced at all times.
- <u>Best Management Practices:</u> VHMYY rules and regulations include best management practices (BMPs) for environmentally sound boat maintenance practices. Boaters at the the facility should be made aware of these helpful policies. (See Attachment B).
- 3 <u>Working on Vessels</u>: VHMYY rules and regulations limit the amount and type of work which is allowed on vessels in water and in the yard. (See Rules ).
- 4 <u>Environmental Laws</u>: The VHMYY rules and regulations also contain a compilation of laws protecting the ocean environment. Boaters at the VHMYY facility should be made aware of these important laws.
- 5 <u>Training:</u> VHMYY staff is trained to report spills whenever they observe

boat owners or workers caurins a substance to be released into or on the water or in the Yard. All cases of known or suspected water pollution will be reported to the Harbor patrol and first responder, clean up will be initiated if appropiate. Confirmed cases of pollution will be reported to appropiate agencies.

- 6 <u>Boater Education</u>: The best management practices found in the VHMYY rules and regulations contain information on the following:
  - a. Limiting in slip maintenance to minor projects.
  - b. Proper recovery and disposal of sanding dust and other debris. (Rules).
  - c. Environmentally safe cleaning and painting practices (Rules).
  - d. Spill avoidance practices. (Rules).

Additional pamphlets on environmentally sounding boat maintenance practices are available at the VHMYY office.

# UNDERWATER BOAT HULL CLEANING

- 1 <u>Non toxic Hull Paints</u>: VHMYY promotes the use of non toxic and legal hull paints. (See Rules). Contact The VHMYY boatyard office for the latest information on non toxic hull paint alternatives.
- 2 <u>Hull Cleaners</u>: When looking for a diver to perform hull cleaning services, VHMY recommends that you make sure your diver is using environmentally sound hull cleaning practices. (See Rules).
- 3 <u>Training</u>. VHMYY staff is trained to report spills whenever they observe boat owners or workers causing a substance to be released into or on the water. All cases of known or suspected water pollution will be reported to the Harbor Patrol and First clean up will be initiated if appropriate. Confirmed cases of pollution will be reported to appropriate agency for administrative action.
- 4 <u>Boater Education</u>: The best management practices forum in the VHMYY rules and regulations contain information on the following:
  - a. Properly applying and maintaining hull paints (Rules).
  - b. Waiting 90 days before cleaning after application of hull paint

c. Regularly scheduled hull cleaning services using best management practices (Rules).

d. Encourage hull cleaners to use less abrasive pads and methods when possible (Rules).

1

1

# FACILITY OPERATIONS

- 1 <u>Emergency Spill Training</u>: All VHMYYstaff are to receive training on proper emergency procedures. This training is provided to employees every 6 months and for all new employees. This training is to include:
  - a. Familiarization of Emergency Action Plan.

- b. Location and use of first responder containment and cleanup Materials
- c. Proper notifications for all types of emergencies.
- d. Location and use of fire suppression equipment.
- 2 <u>Vehicles on Docks</u>: All types of motorized and non motorized vehicles are prohubited from VHMYY docks (Rules)
- 3 <u>Unattended Paints</u>: Paints, varnishes, and other boat maintenance supplies should never be left unattended on VHMYY docks. (Rules). Any such unattended items will be removed by VHMYY staff for proper disposal at owners expense
- <u>Maintenance Supplies</u>: By policy VHMYY staff will store all maintenance supplies/chemicals indoors or in covered containers.
   All spills will be cleaned up immediately using environmentally friendly methods.

# 5

Boater Education: The VHMYY office maintains information on:

- a. Proper storage and disposal of materials.
- b. Emergency spill response.
- c. Household Hazardous Waste disposal site locations.

# FACILITY DEBRIS

- <u>Landscaping & Maintenance Spills</u>: VHMYY staff and service providers will be informed that all spills must be cleaned up immediately. This includes all chemicals, pesticides, fertilizers and soils.
- 2 <u>Storage on Docks</u>: VHMYY prohibits the storage of all items on docks. This is a common source of trash and debris in the water.
- <u>Pets</u>: must leashed or controlled pets at the VHMYY facility.
   Pet owners are required to immediately clean up after their pets.
   Pet waste bags are made available.
- 4 <u>Parking Lot Cleaning</u>: By policy VHMYY parking lots are cleaned regularly and debris removed
- 5 <u>Overboard Disposal</u>: Rules prohibits any boater from throwing,

disposing or otherwise discharging anything into harbor waters.

- 6 <u>Landside Refuse</u>: VHMYY maintains outdoor trash receptacles conveniently located at the facility. Trash is removed from each receptacle of once per day and transported to facility dumpsters. Dumpsters are emptied a minimum of 3 times per week. To prevent trash from escaping into the harbor, dumpster lids are to remain closed only opened when rubbish is being deposited. Please report homeless attempts to search through trash to office.
- 7 <u>Trash Policing</u>: Each day VHMYY staff pick up all trash from facility side walks and parking lots. Docks are cleaned daily. Debris from facility landscaping services is hauled away by the service provider.
- 8 <u>Water Refuse</u>: VHMYY engages the staff to remove trash and debris from the waters surrounding the VHMYY. This is done when necessary using yard boat, nets or poles. During heavy rains additional efforts are made
- 9 Dock Repairs: VHMYY staff ensures the removal of debris created by our ongoing dock maintenance program. Tarps are used in the yard to prevent debris from going into the water and limit its dispersal on land. All boat owners work on boats on land in a manner that will create debris dispersal, such as sanding are required to tarp or tent their boats. Sanding on vessels in the water is prohibited without complete collection of debris or dust through the use of vacuum sanding devices. Material found dispersing in the water is illegal. VHMYY staff is throughly instructed on methods to prevent construction debris from entering harbor waters.VHMYY staff is trained according to facility Best Management Practices to minimize the impact of facility operations on the environment.

#### 1 SEWAGE MANAGEMENT

#### 7.1

<u>Laws Regarding Sewage Discharges</u>: A compilation of existing environmental regulations is contained at the end of VHMYY Rules and Regulations. These laws and regulations will be strictly enforced and violations will be

reported immediately to the Harbor Patrol.

7.2 <u>Pump out Facilities:</u>

Pump out facilities are located at two locations in the Harbor. Boater Education: The VHMYY office maintains information on:

- a. Proper use of marine sanitation devices.
- b. Clean boater practices.

#### SOLID WASTE

8.1 <u>Proper Disposal:</u>

By policy solid waste and debris is properly disposed of in accordance with all applicable laws and regulation.

8.2 <u>Landside Refuse:</u> VHMYY maintains outdoor trash receptacles conveniently located around Boat yard and on docks and along pedestrian areas. Trash is removed from each trash receptacle a minimum of once per day. Then transported to facility dumpsters. Dumpsters are emptied a minimum of 3 times per week.

In addition:

a. To prevent trash from escaping into the harbor, dumpster lids are to remain closed only being opened with rubbish is being deposited.

- b. The area surrounding the facility dumpster is cleaned frequently.
- c. Cleanup equipment and materials are maintained onsite.
- d. Dumpster area is inspected at least once daily.
- 3 Trash Policing:

Each day VHMYY staff pick up all trash from facility sidewalks and parking lots. Each week the docks are cleaned to prevent trash from entering the harbor waters. Debris from facility landscaping services is hauled away by the service provider and the parking lot is cleaned of leaves and debris on a weekly basis.

- 4 <u>Water Refuse:</u> VHMYY staff remove trash and debris from the waters surrounding ghe VHMYY facility. This is done when necessary utilizing tools mentioned above.
- 5 <u>Boater Education</u>: The VHMYY office maintains information on :
  - a. Laws and rules prohibiting dumping of wastes into water (Rules).
  - b. Proper disposal of garbage, recyclables, and other wastes (Rules)
  - c. Proper disposal of batteries and zinc anodes.

#### LIQUID WASTE

9.1

<u>Fuel and Oil Spill Prevention and Containment Plan (FOPC)</u>: VHMYY maintains an FOPC which is found as part of Emergency Action Plan (Attachment A) of this document.

#### 9.2

<u>Training</u>: VHMYY staff receive training to identify fuel/oil spills in the water, notify the Harbor Patrol and VHMYY Management, and in the proper use and location of first response containment/clean up materials.

#### 9.3

<u>Rules and Regulations</u>: Rules require that all refuse be disposed of in a proper manner.

#### 9.4 <u>Household Hazardous Waste:</u> The VHMYY office maintains the telephone number

for information on the VC Household Hazardous Waste disposal sites.

### 9.5 <u>Environmentally Friendly Liquids:</u>

Many of the types of cleaners and materials used in the maintenance of the VHMYY facility could be considered a hazard to the environment. By policy environmentally friendly materials will be used whenever possible.

9.6 <u>Used Oil Collection</u>: Waste oil recycling is available at the VHMYY Boat Yard office. There is a fee for the disposal of these materials. However Ventura has a number of sites availablf for free for small amounts. Please enquire at the Office

9.7 <u>Hazardous Waste Recycling.</u> The recycling station is located at Boat yard office. Please contact Office for specifics

<u>Hazardous Materials Storage</u>: VHMYY staff will minimize the amounts of hazardous materials kept onsite. Hazmats will be properly stored and disposed of.

# 9.9 <u>Boater Education</u>: TheVHMYY office maintains information on:a. Proper disposal of used oil and filters.

- b. Proper disposal of recyclable hazardous materials.
- c. Checking a bilge before pumping.
- d. Proper oil changing techniques.
- e. Spill response procedures.

#### FISH WASTE MANAGEMENT

10.1 <u>Docks</u>: Fish cleaning is prohibited on VHMYY docks. When such activity is observed, the violator is immediately advised to discontinue cleaning and remove all fish waste.

#### 2 <u>Harbor:</u>

Dumping fish waste into harbor waters is a violation of law and will be immediately reported to the Harbor Patrol.

<u>3 Boater Education</u>: The VHMYY office maintains information on:

- a. Rules and regulations that prohibit fishing on the docks
- b. Rules and regulations that prohibit fish cleaning at the docks.

#### HAZARDOUS WASTE MANAGEMENT

<u>Hazardous Materials management Plan:</u> VHMYYmaintains an oil spill response plan and has first responder containment/clean up supplies availableat the office. A copy of the oil spill response plan is found within this Clean Marina Plan.

<u>1 Designated Emergency Coordinator</u>: The VHMYY Manager is the designated emergency coordinator for the VHMYY facility. Duties include:

a. Development and implementation of emergency plan and policies.

b. Training supervision.

2 Hazardous Waste Disposal:

All hazardous waste generated at theVHMYY facility will be properly disposed of using approved hazarbous waste hauler.

3 <u>Hazmat Storage</u>: The storage of hazardous materials or refueling of vessels is prohibited on VHMYY docks. Weekly inspections of docks, for the purpose of identifying and removing hazardous waste in its various forms (liquids, spent zinc anodes, batteries, etc) are conducted by VHMYY. VHMYY staff will minimize the amounts of hazardous materials kept onsite.

Hazmats will be properly and legally stored and segrated to ensure that only hazmats are handled as such. Hazardous materials will be stored off of the ground in a covered location. Containers will be in good condition and covered.

<u>5 Emergency Spill Training</u>: All VHMYY staff are to receive training on proper emergency procedures. This training is provided to employees every 180 days and for all new employees. This training is to include:

a. Familiarization of Emergency Action Plan.

b. Location and use of first responder containment and cleanup materials.

c. Proper notifications for all types of emergencies.

d. Location and use of fire suppression equipment.

#### **1** STORM WATER PREVENTION PLAN

12.1 <u>Spill Response</u>: Spill response supplies are provided forVHMYY by the Marina Operators. These include tarps, sandbags and shovels. All spills that have the potential of polluting harbor waters shall be reported to the Nation Response Center and Office of Emergency Services. VHMYY maintains a supply of absorbent pads and booms to prevent spills from reaching storm drains. VHMYY staff are trained regularly on the location of spill materials and their use.

2 <u>Vehicles:</u> Rules prohibits the servicing or washing of vehicles at the VHMYY facility as well as using the lot for any purpose other than parking.

3 <u>Parking Lots:</u> All VHMYY parking lots are cleaned on a weekly basis.

12.4 Landscaping: All landscaping trimmings are hauled away promptly.

5 <u>Signage:</u> All storm drains are marked "No Dumping – Drains into Harbor and Ocean".

6 <u>Irrigation</u>: System is inspected weekly to reduce runoff into storm drains. Necessary repairs are done quickly. Whenever possible water conserving irrigation will be used. Soil level in planters shall be kept several inches below surrounding curbs to further minimize run off.

7 <u>Grates & Filters:</u> Have been installed on all storm drain inlets to reduce trash and debris from entering harbor water. Filters are maintained quarterly.

12.8 <u>Facility Litter</u>: Staff perform daily patrols of all landside areas for litter to prevent trash from entering storm drains.

9 <u>Storm Drain Cleanout:</u> Staff annually clean all storm drains prior to the rainy season.

# Attachment A

VHMYY Emergency Action Plans

#### Fuel & Oil Spill Prevention & Containment Plan

1.1 <u>Prevention</u>

The nearest waste oil recycling station is located at VHMYY Waste Oil Station: office. There is a charge by the Marina Operators . We provide and maintain a waste oil disposal station. The disposal unit is above ground and within secondary containment enclosures. The disposal unit is open daily between the hours of 9am and 4pm, and is inspected daily by VHMYY staff. The facility is licensed by Ventura County Fire Authority.

<u>Recycling</u>: Waste oil is recycled by a qualified Hazardous Waste Hauler. Haz Mat Manifests for each disposal are maintained on file at the VHMYY office.

Clean and Green Campaign:

This program is promoted by the California Coastal Commission and monitored by the Ventura County Health Dept. Through the program, VHMYY can provide boaters free oil absorbent pads. Information about the oil absorbent pad exchange program is available at the VHMYY office. Signs about the program are posted at all dock gates and at the waste oil disposal stations.

#### 1.2

#### Containment

<u>Storage:</u> VHMYY staff shall take all reasonable efforts to store chemicals in a manner that prevents spills.

<u>Spills:</u> VHMYY staff shall clean up all spills immediately. If unable to do so, the incident shall be reported to VHMYY manager immediately.

#### Fuel & Oil Spill Response Plan

1 Upon receiving a report of a spill, VHMYY manager shall be notified and

dispatched to assess the situation and direct clean up efforts:

a. Immediate notification of local authorities.

b. Deployment of emergency remediation supplies

c. Acquisition of additional remediation supplies and services, including proper disposal of clean up materials.

d. VHMYY staff will assist in identifying the source of the spill. Once the source of the spill is identified, vessel owner shall be immediately

notified and vessel owner information provided to the Harbor Patrol.

e. In extreme cases the vessel may be taken to the VHMYY Shipyard for emergency repairs or haul out.

f. A complete report of the incident shall be created and filed by the VHMYY manager.

#### Hazardous Materials Management Plan

<u>Oil and Fuel Spill Response Plan:</u> VHMYY maintains an oil spill response plan and has first responder containment/cleanup supplies available. A copy of the oil spill response plan is found within this Clean Marina Plan.

- 2 <u>Training:</u> VHMYY staff are trained to identify potential hazardous materials, wastes, and spills and the proper procedures for containment, cleanup and disposal.
- 3 <u>Haz Mat Storage & Disposal:</u> The storage of hazardous materials or refueling of vessels is prohibited on VHMYY docks. Weekly inspections of docks, for the purpose of identifying and removing hazardous waste in its various forms (liquids, spent zinc anodes, batteries), are conducted byVHMYY staff.
- 4 <u>Trash Removal</u>: The VHMYY trash dumpster is posted with a sign prohibiting all hazardous waste disposals. All Haz Mat that is encountered at VHMYY facility is collected by Marina Operators for proper disposal.

VHMYY Best Management Practices

# Introduction

- These Best Management Practices (BMPs) are intended for the education and training of VHMYY staff, to ensure clean and environmentally sound work practices through the following:
  - 1. Promoting good water quality, abundant sea life and a clean boating environment.
  - 1. Take active measures to protect the environment from all pollutants.
  - 1. Set a good example for boaters, contractors and the general public by using environmentally sound practices.

# <u>Contents</u>

- Litter & Trash Handling
- Hazardous Materials
- Fuel & Oil Spills
- Storm Drain Pollution Prevention
- Clean Work Practices

# Littering and Trash Handling

1 <u>Littering</u>: Every piece of litter has the potential to end up in the ocean, so VHMYY dedicates many man hours to litter pick up.

In the course of all assignments, eachVHMYY employee is asked to pick up litter as it is encountered on the premises. This is a standing assignment to all personnel.

Picking up litter reduces future littering. An individual is less likely to litter if facility is kept clean. Imagine that you toss a piece of litter and it misses the trash can. Wouldn't you be less likely to pick it up if the can is already surrounded by litter?

Docks will be checked on a weekly basis. Water areas are patrolled for litter by boat twice weekly or more often if necessary. Things you can do to reduce litter:

Report litter problems to your VHMYY office.

 $\square$  Make sure you have the proper equipment – equipment needs should be

directed to VHMYY office.

- □ Make sure that all trash & restrooms have sufficient trash receptacles and are emptied regularly.
- $\hfill\square$  Set a good example by making sure you do not litter.
- □ Pick up all litter you encounter.
- Ensure that company vehicles do not have loose litter that could blow out.
- 2 <u>Trash Handling</u>: Outdoor trash receptacles are located conveniently throughout the VHMYY facility.

Once daily all trash receptacles will be emptied, the trash taken to the facility dumpsters. Recyclables are to be kept separate and disposed of in the designated recycling dumpsters.

The local refuse hauler will haul away the trash no less than three times a week. Additional dumpsters may be provided during peak times. Additional things you can do:

- Make sure there is no loose trash I the back of company vehicles. Trash should be securely bagged.
- Make sure you have the proper equipment when assigned to trash pick up.

If you encounter hazardous wastes in the trash, report it to VHMYY

office immediately (see section on Hazardous Materials).

# Hazardous Materials

Hazardous materials pose a serious threat to the environment and safety. There are many ways you can prevent haz mat exposures:

- 4.1 <u>Work Place Hazardous Materials</u>
  - □ Whenever possible use products which are environmentally friendly.
  - □ Limit the amount of open chemicals or containers used on a project.
  - □ Most common hazardous materials are cleaning supplies, paints &

thinners, fertilizers, insecticides & herbicides, automobile batteries – B UT THERE ARE MANY OTHERS.

- □ Most hazardous materials are to be stored in the maintenance sheds.
  - Be sure to use hazardous materials/chemicals according to their instructions. If unsure, contact your dept. manager.
  - All spray bottles should be clearly marked.
  - Hazardous wastes should be reported to the VHMYY office for proper

disposal. Use proper protections such as gloves and tarps, when using hazardous materials.

- 2 <u>Boaters:</u>
  - Boaters may not discharge anything but clean water into the harbor.
    - Hazardous & flammable materials may not e stored on the dock or in the dock steps. If you discover hazardous materials on the dock contact V HMYY office.
    - Refueling at dockside is prohibited.
- The VHMYY office maintains literature on clean boating practices.
- Hazardous materials may not be disposed of in trash receptacles or

dumpsters. Signs are posted.

- If you find hazardous materials in the trash, set them aside and report them to the VHMYY office for proper disposal.
  - If you observe any individual disposing of hazardous materials improperly, report them to the VHMYY office.

3

Hazardous Material Spill Action Plan

- Upon receiving a report of a hazardous material spill, VHMYY manager shall be immediately notified and dispatched to assess the situation and direct clean up efforts including:
  - a. Immediate notification of local authorities (fire department).
  - b. Deployment of any or all emergency remediation supplies.
    - c. Acquisition of additional remediation services,
    - \* Every effort shall be made to prevent the spill from reaching storm drains or harbor waters.
  - Should a spill reach a storm drain or harbor waters, the Ventura Fire Dept.

Station 5 shall be notified immediately.

# Fuel & Oil Spills – Water

Fuel and oil spills are a common source of pollution in the harbor which is why all VHMYY staff are trained to detect spills and report them to the Harbor Patrol office.

Upon receiving a report of a spill, VHMYY manager shall be notified and dispatched to assess the situation and direct clean up efforts including:

- Immediate notification of local authorities.
- Deployment of emergency remediation supplies.
- Acquisition of additional remediation services, such as contacting marina Operators and disposal of clean up materials.
- VHMYY staff will assist the harbor patrol in identifying the source of the spill.

Once the source of the spill is identified, vessel owner shall be immediately notified and owner information shall be provided to the Harbor Patrol.

- In extreme cases, the vessel may be taken to the VHMYY yard for emergency repairs or haul out.
  - A complete report of the incident shall be created and filed by the VHMYY manager.

# Storm Drain Pollution

All storm drains at the facility empty into the harbor and are often the source of the following types of pollutants:

- Biological sewage, pet waste, decaying plant material.
- Chemical oil, fuel, thinners, insecticides, herbicides, cleaners.
- Litter & garbage.

You should never put anything into the storm drain except small amounts of clean water. To further prevent pollution we have created a storm drain pollution prevention plan.

Storm Drain Pollution Prevention Plan

- <u>Parking Lots</u>: All parking lots are swept on a weekly basis.
- Landscaping: All landscaping trimmings are hauled away.
- Irrigation: System is inspected weekly to reduce runoff into storm drains.

Necessary repairs are done quickly. When possible water conserving irrigation will be used. Soil level in planters shall be kept several inches below surrounding curbs to further minimize run off

- Facility Litter: Staff perform daily patrols of all landside areas for litter at the facility.
- SD Cleanout: Staff annually clean all storm drains prior to the rainy season.
  - Grates and Filters: Have been installed on all storm drain inlets to prevent trash and debris from entering the harbor.
- <u>Signage</u>: All storm drains are marked "No Dumping Drains into harbor &

Ocean".

- Automobile maintenance and washing is prohibited inVHMYY lots.
- VHMYY maintains a supply of absorbent pads and booms and staff are trained regularly on the location of spill materials and their use.
- Water Quality Protections are included in project specifications.

# Clean Work Practices

All employees are required to work in a clean manner and take great care to avoid polluting the environment. Here are a few clean work practices you can use:

- Use tarps or other materials and equipment to ensure nothing gets into the ocean.
- Use chemicals and materials sparingly. Use environmentally friendly chemicals whenever possible.
- Bring clean up equipment with you so you are prepared to clean up throughout each project.
- Avoid jobs on the dock or near the water unless absolutely necessary.
- Be on the lookout for all sources of pollution at VHMYY and boaters violating VHMYY Rules and Regulations.
  - Immediately report all sources of pollution and spills to VHMYY manager.

#### Ventura Harbor Marina & Yacht Yard (VHMYY) Attachment D

# RULES AND REGULATIONS

These Rules and Regulations are an attachment to and incorporated in the Slip/work Agreement. These Rules and Regulations are for the benefit of all those who maintain a boat at VHMYY docks or yard. Owners are required to notify VHMYY or Manager of any unsafe or hazardous conditions that come to their attention. A breach of any of these Rules and Regulations shall constitute a breach of the agreement and shall permit VHMYY to exercise all rights and remedies permitted at law or in equity to remedy said breach, including, but not limited to, a termination of the agreement and expulsion from facility.

1. Water/Power Lines. Water, telephone, cable or power lines shall not cross main headwalks and be in good/safe condition.

2. Safe Mooring. All boats shall be moored in a safe manner.

3. Vessel Inspections. VHMYY reserves the right to inspect all boats to determine if they are properly identified and equipped for safe operation in accordance with Coast Guard Regulations and other applicable regulations. VHMYY may, at their discretion require a current inspection by the U.S. Coast Guard.

4. Seaworthiness. All vessels must be able to actively navigate seas or open waters (seaworthy).

Non operational Houseboats and other unseaworthy vessels are prohibited in the Marina.

5. Fishing/Swimming. Fishing or swimming within Marina, including fishing from boats within the Marina shall not be permitted.

6. Bicycles/Skates, Etc. No person shall roller skate, roller blade, skateboard, ride bicycles, go-peds (or other motorized or non-motorized scooter, skateboard, mini-bike or similar type device) or motorcycles on the docks or gangways located at the Marina.

7. Projections Beyond End of Berth. The maximum distance by which any boat (including all extensions such as swim steps, booms, bait tanks, etc.) may project beyond the end of the berth into the waterway shall be 3 feet unless otherwise permitted in writing. No part of the boat shall extend over

the main headwalk. All boats shall be tied with bow toward headwalk so boarding will be done on starboard or port side. All Slips must be occupied by an appropriate size Vessel.

8. Electrical Connections. In accordance with the Ventura County Fire Code all connections made to the Marina receptacles shall be grounded and U.L. approved. Wiring must be of adequate size for the power provided. Electrical shore-power connections must be marine grade and be in good, safe condition. Electrical cords may not be affixed or secured to the docks or be allowed to hang into the harbor.

9. Children. Children under 12 years are not permitted on docks without the immediate presence of their parents or other responsible adults. (Non-swimmers or toddlers are required to wear life jackets when on the docks or boat decks.)

10. Notification of Unsafe Conditions. Owners and all other members of the Marina, their guests and invitees shall promptly notify County or VHMYY of any unsafe or hazardous condition that comes to their attention.

11. Hazardous Activities/Barbecues. All high-risk fire hazards, i.e., refueling boats at dock side, storing flammable or hazardous material in dock boxes, welding, etc. is strictly prohibited. Barbecues are strictly prohibited on all dock areas.

12. Discharges from Vessels/Disposal of Liquids. No vessel owner or guests of the VHMYY docks shall throw, discharge or deposit from any vessel, dock or premises any refuse matter, oil, spirits, inflammable liquid, oily bilges in the harbor. All such matter shall be deposited in appropriately-marked containers within the Marina. Ventura County Ordinance provides it is unlawful to throw, discharge or deposit from any vessel or float any refuse, oily bilge fluids, inflammable liquids and other contaminants into water or upon the premises. Vessels with automatic bilge pumps will be maintained in such a manner as to prevent the discharge of contaminants overboard by using oil absorbent bilge pads. Trash receptacles and recyclable receptacles are provided for

the convenience of vessel owners.

13. Use of Chlorinators. Use of boat toilets not equipped with chlorinators or storage devices approved by the Ventura County Health Department shall not be permitted within the Marina. VHMYY reserves the right to inspect all boats for installation and operation of such devices.

14. Laundry. There shall be no laundering or drying of clothes on deck or rigging at the Marina.

15. Noise. Except for entering or leaving the Slip, main engines, power-generation equipment, or other noise-making machinery shall not be operated between the hours of 8:00 p.m. and 7:00 a.m. Unnecessary operation of engines in the Slip shall not be permitted.

16. Engine Operation. Engines may not be operated in gear while boats are secured to dock.

17. Speed Limit. The maximum speed limit within Ventura Harbor shall be 5 mph (no wake permitted). The maximum speed limit within all Marina parking lots shall be 5 mph and all unsafe driving is strictly prohibited.

18. Improper Vessel Handling. Improper or unsafe boat handling shall be just cause for immediate termination of the Slip/storage Agreement. Owners shall immediately report to VHMYY any and all vessel or vehicle accidents / damage occurring at Marina or Boat yard.

19. Use of Docks/Floats. The use of docks/floats to store or place supplies, materials, accessories, or gear of any kind shall not be permitted within the Marina except in any lockers provided by VHMYY in future. Owners further agree that VHMYY in its exclusive discretion may remove, impound and/or dispose of any such improperly stored items in which case VHMYY assumes no responsibility or liability.

20. Boarding Steps. Any steps used for ingress to and egress from a Vessel shall not be wider than one-half  $\binom{1}{2}$  of the width of the finger to which the Vessel is moored, and no more than five feet in length. The steps must be of a light weight

construction and approved in advance by the Manager. The steps may not be used as a storage locker except as approved by office.

21. Vessel Repairs. Apart from work accomplished wholly below decks, no rebuilding, hull painting, sander use, spray gun use, welding, overhauls or other vessel maintenance or refurbishment efforts are permitted while in the Marina. However, minor maintenance and bright work may be permitted. The types and extent of maintenance which will be permitted are within the sole discretion of VHMYY and Owners should contact the Office with questions. Any damage caused to the premises by the boat owner shall be repaired by VHMYY, at the expense of boat owner.

22. Damage to Marina Property. Each boat owner in the Marina will be held responsible for any damage to the Marina and/or structures caused by a boat owner, his or her guests, agents and/or employees. Boat owners shall immediately notify VHMYY of of any and all damages caused to Marina/Yard property.

23. Repair of Damages Caused by Boat Owner. Any damage to the Slip, Marina or Harbor by any boat owner or his or her guests, agents and/or employees may, at VHMYY option, be repaired or corrected solely by VHMYY at the expense of said boat owner.

24. Offensive or Harmful Conduct. Disorder, depredations or indecorous conduct by any boat owner or his or her guests, agents and/or employees that might injure a person, disturb other boat owners, cause damage to the Marina or the Harbor or harm the reputation of VHMYY shall be just cause for immediate termination of this Slip/yard agreement.

25. Solicitations. It is unlawful for any unauthorized person to solicit or advertise business or offer for sale goods, wares, merchandise or services, or solicit orders for such sales on the premises of the Marina and Boat Yard, including but not limited to the docks, buildings or parking or vehicles and vessels within the Marina.

26. Signs. Unauthorized signs or banners are prohibited

aboard any boat in the Marina or upon the Marina premises. Each boat owner is authorized one Ovessel for saleO sign aboard the Vessel, no greater than 180 by 240.

27. Commercial Use of Vessel. Use of any Vessel moored at the Marina for commercial purposes is not permitted without the prior written approval of the VHMYY.

28. Small Boat Storage. A Ismall boat is defined as a boat, inflatable, dinghy, jet skis or similar vessel with a LOA of 10 feet or less, or a canoe or kayak with a LOA of 12 feet or less. A small boat may be stored on the Vessel or within the Slip water space. Dinghies and kayaks may be launched from Marina docks provided the boat owner of such vessel(s) is entitled as a party to a current and valid License AND the small boat weighs less than 100 pounds. Jet skis, personal watercraft and vessels weighing in excess of 100 pounds shall not be launched from Marina docks at any time. Vessels with an LOA greater than 10 feet or kayaks with an LOA greater than 12 feet do not qualify as a Small Boat under this rule and cannot be stored in a Slip without the prior written permission of VHMYY.

29. Amendment of Rules/Statutes/Regulations. The Harbor Ordinances, County and DPYC Rules and Regulations set forth herein and as they maybe amended from time to time and all other laws, rules, statutes and regulations established by regulatory bodies having jurisdiction, including VHMYY,Ventura County, State of California and the United States of America shall form a part of the License as though printed herein.

30. Television Antennas. Aerial television antennas are not permitted on Vessels moored in the Marina. A single satellite dish or marine television antenna (less than 300) is permitted on a Vessel moored in the Marina.

31. No Mooring at Marina Without Valid Slip Agreement. No Vessel may be moored at Marina unless a current Slip Agreement is in effect between the owner of said vessel and VHMYY. Boat owner is prohibited from storing more than one vessel in a Slip unless vessel qualifies as a  $\Box$ small boat $\Box$  under rule 28, or has obtained prior written approval of VHMYY.

Liveaboard permits shall be limited to no more than thrity-five percent (35%) of total Marina slips.

32. Use of Approved Equipment/Alterations to Docks & Premises. All equipment, used on docks by Marina boat owner (dock wheels, boarding ladders, etc.) must be approved by VHMYY. Boat owners may not install additional dock lockers, fenders, bumpers, rub rails, rollers or in any way make alterations to the dock, dock box or fingers. Boat slip liners and boat lifts are prohibited. All installations on the floats shall be installed by ManagerDs staff at the cost of the Boat owner and shall be approved by VHMYY on an individual basis.

33. Parking. No vehicle may remain on the parking lots provided for boat owners use or other parts of the Marina for a period exceeding 72 hours unless prior written approval is obtained from VHMYY. All types of trailers, RVs and vehicles longer than 230 are prohibited in the Marina parking lots without the prior written approval of VHMYY. Failure to comply with these parking rules may result in the towing of vehicles, at their owner(s) sole expense and risk. Neither VHMYY nor its respective officers, agents or employees shall be liable to Boat owner or Boat owners guests, employees, or agents for any loss of, or damage of any kind to any motor vehicles or other personal property in or on the buildings, parking lots, or other portions of the Marina. All changes to parking regulations will be posted at the VHMYY. The washing of any vehicle, vessel or apparatus is prohibited in the Marinas parking lots.

34. Maintenance of Slip and Surrounding Environs. Boat owners agrees to maintain the Slip, the walks, floats, ramps, gangways and docks in, about and surrounding the Slip in a neat, clean and unobstructed condition at all times. Should it become necessary for VHMYY to maintain the area in said condition, it will be done at Boat owners expense.

35. Disposal of Refuse: The boat owner shall not deposit into any garbage can or other receptacle located on Marina or boat yard property any of the following: (1) paint, varnish, thinner, non-edible oil or other flammable or hazardous materials; (2) vessel parts, including but not limited to engine machinery

parts, interior parts, fastenings or upholstery; or (3) any item weighing in excess of 20 pounds. For the location of household hazardous waste disposal sites, contact the Manager.

36. Pets: Ventura County Ordinance provides that all pets shall be on a leash not longer than 6 feet, at all times and under the direct control of an adult. Should any pet become a nuisance at the Marina, Manager may require said pet to be removed from the Marina. Animals are not permitted in the restrooms. Dogs without licenses will be considered a violation of this License and grounds for termination. Animal droppings are required to immediately be cleaned up.

37. Hose - Nozzles. Automatic shut-off nozzles must be attached to hoses in order to conserve water. Water hoses shall not be left running in a manner that waste water.

38. Vessel Maintenance / Contractors. Apart from minor maintenance and light work, no work involving the Vessel may be accomplished while at the dock or otherwise on Marina property. The determination of what constitutes minor maintenance and bright work will be at the sole and absolute discretion of the Manager. Prohibited work includes, but is not limited to, painting, sanding, use of paint remover, spray guns, welding or the burning of paint on the topsides or above the decks. Contractors hired by Boat owner to work on the Vessel must be registered with the Office prior to the commencement of such work, and each such contractor must maintain and provide proof of liability insurance in an amount of at least \$1 million. Boat owner further agrees to comply with all applicable rules, regulations, orders, statutes and laws of VHMYY, the State of California and/or all other governmental entities with jurisdiction over the Harbor or the Marina. Access will not be provided to un-registered contractors.

39. Flammable Materials and Use of Dock Boxes. Neither Boat owners nor anyone acting on his/her behalf shall burn paint or use flammable materials without the prior written consent of VHMYY. Boat owner agrees not to store any

flammable or hazardous materials in a dock box locker. VHMYY assumes no responsibility for the protection or safety of Boat owners possessions, including but not limited to, belongings kept by Boat owner in a dock box.

40. Fish Cleaning. No fish cleaning is permitted within the Harbor.

41. Storage in Parking Lot. The Marina's parking lot is for the use of Boat owners and authorized visitors. Boat owners shall not store in the Marina's parking lots any vehicle, trailer, camper or anything else without the prior express written approval of VHMYY.

42. Articles Left in a Storage Locker. VHMYY is not responsible for any article remaining in a Boat owners storage locker once Boat owner has moved his/her Vessel or abandoned his/her Vessel. Boat owner further agrees that VHMYY, in its exclusive discretion, may remove and dispose of any such articles left behind in which case all proceeds derived from such disposal, if any, shall become the sole property of VHMYY.

43. Noise and Conduct. Boat Owners shall not make or allow any disturbing noises on the docks or anywhere on the premises, with particular emphasis between the hours of 8:00 p.m. and 7:00 a.m., either by Boat owner or his/her family or guests, nor shall Boat owner permit such persons to engage in any conduct which will interfere with the rights, comforts or convenience of others. The activities and conduct of Boat owner and/or Boat owner's family while on Marina/Yard premises must owner assumes be reasonable at all times. Boat full responsibility for his/her guests' conduct and agrees to be held jointly and severally liable for all consequences of his/her guests actions or misconduct.

44. Storage of Equipment. Boat owner shall not store or leave any items on the floats, docks, fingers, landings or landside areas of the Marina, including plants, bicycles, dinghies and other items. Bicycles must be stored on the Vessel. Dinghies may only be stored on the Vessel or in an authorized storage space designated by VHMYY. VHMYY strongly urges Owners

secure all items, as VHMYY shall not be held liable for the loss or theft of any personal belongings.

45. Dinghy Storage. VHMYY may but is not required to provide storage for dinghies and/or kayaks.

If VHMYY elects to do so Owner is not assured he/she will be provided storage space. If dinghy storage space is provided Owners agrees to tender the then current dinghy storage fee no later than the first day of each month, together with other fees due. Dinghies with an LOA greater than 10 feet or a kayak with an LOA of 12 feet may not be stored in the Slip without the express prior approval of the Manager.

46. Halyard Noise. Halyards shall be tied off to eliminate noise. Dock lines shall be maintained in a safe, unchafed, manner and shall be of adequate size for the Vessel.

47. Transfer of Interest in Vessel. Should Boat owner sell or otherwise transfer interest in Vessel, Boat owner may upon written approval of Manager, continue renting the Slip provided Boat owner obtains a new vessel of size appropriate for the Slip within 90 days. Failure to do so will result in termination of this agreement.

48. Change of Ownership. Boat owner shall notify Manager in writing within five (5) days of any change of ownership of Vessel resulting from a gift, sale, withdrawal, addition or substitution of partners, the sale or transfer of stock or change of directors or officers in a closely held corporation owning the vessel. Boat owner must maintain a minimum of 20% interest in Vessel and an interest in Vessel equal to or greater than that of all other parties.

49. False Information. Providing false information or documentation to VHMYY or County to obtain or maintain a Slip in Marina shall be considered grounds for immediate termination of this agreement.

50. Registration and Insurance. Boat owner shall provide VHMYY office a copy of current vessel registration from the CA DMV or vessel documentation from US DOT. Registration or

documentation must list all vessel owners and Marina tenants of record. Before locating a vessel in Marina, Boat owner shall provide Marina proof of current vessel insurance for \$300,000 single limit liability. Failure to provide current vessel registration / documentation and current vessel insurance for the entire term of the license may result in termination of the agreement.

51. Taxes and Assessments. This Agreement may create a possessory interest, which is subject to the payment of taxes levied on such interest. It is understood and agreed that all taxes and assessments (including but not limited to said possessory interest tax) which become due and payable upon the Slip, shall be the full responsibility of Boat owner, and Boat owner shall cause said taxes and assessments to be paid promptly."

52. Maintenance Best Management Practices. Boat owner and boat owners contractors must adhere to the following procedures. Failure to follow these policies /procedures will result in immediate termination of the agreement:

A. Policies.

1) All contractors, independent contractors and self-employed boat workers hired by Licensee must show proof of insurance in the amount of \$1 million naming VHMYY as additional insured, and register with and receive prior approval from the Marina before beginning work on the Marina or yard premises.

2) Boat owners may undertake basic boat projects as needed to maintain their vessel safety, appearance and utility. The extent of such repairs and projects allowed in the marina shall be at the sole discretion of the Marina.

3) New or substantial work must be approved by the Marina prior to undertaking the project.

4) Minor vessel maintenance projects should be limited to work on 25% or less of the vessels surface and not to exceed 5 days.

5) All Boat owners are reminded that the Marina is a recreational area and that the boat yard is a repair facility. Boaters are reqired to protect water quality at all times

6) Boaters are encouraged to use environmentally friendly cleaning products. Products should be phosphate free and be biodegradable. Avoid cleaners that contain lye, sodium hydrochloride, chlorine, or petroleum distillates.

7) Boaters are encouraged to use non-toxic and legal paints. Use products that are low in VOCs (Volatile Organic Compounds) which are a source of air pollution.

B. Engines and Bilges.

1) Boat owners must use absorbent bilge pads to soak up oil and fuel in the bilge.

2) Do not discharge bilge water if there is a sheen to it.

3) Recycle oil and fuel products properly.

4) Dispose of absorbent pads and filters properly.

5) Do <u>not</u> dispose of any fuel, paint, oil, absorbent pads/rags, batteries, engine parts, or other contminat ed materials into the Marina trash receptacles or dumpsters.

6) Use caution when fueling to avoid spills and potential hazardous situations. Fueling at dockside is prohibited. Avoid overfilling fuel tanks.

7) Keep engines properly maintained for efficient fuel consumption and clean exhaust.

8) The use of detergents and/or emulsifiers of fuel spills in the water are prohibited.

9) Use oil absorbent pads while fueling to catch any drips or spills.

10)Routinely check engines for leaks and use drip pans or absorbent pads under engines. 11)Report all spills to the VHMYY office immediately (805)642-6755.

C. Painting and Varnishing.

1) Limit the amount of open solvents or paints on the docks to one (1) gallon at a time. Never leave open paints unattended.

- 2) Always mix paints and epoxy over a tarp.
- 3) Always use a pan or drop cloth.

4) Use up remaining bits of paint by spreading it on an old board.

5) Spray painting or spraying of varnishes is prohibited in the

marina.

6) Do <u>not</u> dispose of any paint, oil, varnish, absobent

pads/rags or other contaminated material into

the Marina trash cans or dumpsters. Paints, solvents and other hazardous materials must be disposed of legally at a household hazardous waste station or other appropriate disposal facility.

D. Surface Preparation.

1) Use biodegradable soaps, cleaners and teak cleaners approved for ocean waters.

2) Liberally use tarps to capture all scrapings, debris and drips. No material may enter the water.

3) Use vacuum power sanders, vacuum all dust and debris. No material may enter the water.

E. Sewage

1) Untreated sewage must <u>never</u> be discharged into the harbor waters.

2) Store sewage in holding tanks and dispose of sewage properly at pump-out stations.

3) <u>Never discharge Type I sewage while moored in the Marina</u>.

4) Use shore-side restrooms whenever possible, rather than toilets aboard vessels.

- F. Solid Waste Disposal.
  - 1) Dispose of all garbage in proper shore-side dumpsters.
  - 2) Let empty cans dry thoroughly before disposing of them into trash dumpsters.

3) Please recycle green, brown and clear glass, newspapers and aluminum products.

# G. Chemical Storage.

1) Purchase only the amount of chemicals/paints you need for a project.

2) Review storage of paints, varnishes, solvents, and chemicals every six months. Properly dispose of old or unnecessary products.

3) Do not store more than two gallons (total) of these products on your Vessel.

4) <u>Never</u> store any of these products in a dock locker.

H. Hull Maintenance

1) The use of non-toxic and legal hull paints is recommended.

2) Make sure that paints are applied properly and in accordance to manufacturer s recommendations.

3) Wait 90 days after painting the hull before underwater cleaning.

4) Hull bonding or painting problems should be properly repaired.

5) Schedule regular hull cleaning & maintenance to eliminate the need for hard scrubbing. Soft scrubbing reduces environmental impact and extends the life of your hull paint.6) Choose a qualified hull cleaning company using Best Management Practices.

7) Power scrubbers and pressure washers are prohibited at the Marina.

8) Waste zinc anodes should be disposed of properly.

APPLICABLE LAWS CONCERNING WATER POLUTION HARBORS, BEACHES AND PARKS DISTRICT Ventura County Harbor Sanitation

Toilets and Refuse

(a) No person shall discharge, or permit or allow any other

person on a vessel under his control or command to discharge any human or animal excreta from any head, toilet or similar facility or otherwise from a vessel into the waters of a harbor. (b) No person shall throw, discharge, deposit or leave or cause, suffer or permit to be thrown, discharged, deposited or left, either from the shore or from any pier or vessel or from any factory or elsewhere, any refuse matter of any description in the navigable waters of a harbor.

Discharge of Flammable Material

No person shall pump or discharge from any vessel or tank into the waters of a harbor, oil, spirits or flammable liquid, or deposit any rubbish, refuse matter or articles of any offensive character therein or upon any pier or street leading to such facility.

Dead animals.

No person shall throw, place or leave any dead animal or putrefying matter into or in the waters of a harbor, on or along the shore thereof.

Vessel wastes

(a) No person shall own or operate a vessel equipped with any head (toilet) or receptacle from human body wastes in the waters of a harbor unless:

(1) Said vessel is also equipped with a holding tank designed to retail all human body wastes deposited in said head or receptacle until such time as said sewage can be discharged otherwise in accordance with law; or

(2) Said head or receptacle is connected directly to a sanitary sewer system; or

(3) Said head or receptacle is connected to an on-board sewage treatment system which produces an effluent meeting such standards as may be approved by VHMYY Health Officer for discharge into the waters of a harbor.

FISH AND GAME CODE Chapter 2. Pollution. Article 1.

General.

Water Pollution; Prohibited Materials

Except as provided in subdivision (b), it is unlawful to deposit in, permit to pass into, or place where it pass into the waters of this state any of the following:

(1) Any petroleum, acid, coal or oil, lampblack, aniline, asphalt, bitumen, or residuary product of petroleum or carbonaceous material or substance.

(2) Any refuse, liquid or solid, from any refinery, gas house,

tannery, distillery, chemical works, or mill of any kind.

(3) Any sawdust, shavings, slabs or edgings.

- (4) Any factory refuse, lime, or slag.
- (5) Any cocculus indicus.
- (6) Any substance or material deleterious to fish, plant life, or bird life.

This section does not apply to the discharge or release that is expressly authorized pursuant to, and alliance with, the terms and conditions of waste discharge requirement pursuant to Section 13263 of Water Code or a waiver issued pursuant to subdivision (a) of Section 13269 of the Water Code issued

FISH AND GAME CODE

5652. Refuse Disposal into Waters: Exceptions

It is unlawful to deposit, permit to pass into, or place where it can pass into the waters of the state, or to abandon, dispose of, or throw away, within 150 feet of the high-water mark of the waters of the state, any cans, bottles, garbage, motor vehicle or parts thereof, rubbish, or the viscera or carcass of any dead mammal, or the carcass of any dead bird.

The abandonment of and motor vehicle in any matter that violates this section shall constitute a rebuttal presumption affecting the burden of producing evidence that the last registered owner of record, not having complied with Section 5900 of the Vehicle Code, is responsible for such abandonment and is thereby liable for the cost of removal and disposition of the vehicle. This

section prohibits the placement of a vehicle body on privately owned property a long a stream bank by the property owner or tenant for the purpose of preventing erosion of the stream bank.

# HARBORS AND NAVIGATION CODE

Section 133. Discharging fuel oil from vessel in harbor; definitions Except in case of emergency imperiling life or property, or unavoidable accident, collision, or stranding, or as otherwise permitted by law, it is unlawful and constitutes a misdemeanor for any person to discharge, or suffer the discharge of oil by any methods, means, or manner, into or upon the navigable waters of the State from any vessel using oil as fuel for the generation of propulsion power, or any vessel carrying or having oil in excess of that necessary for its lubricating requirements, and such as may be required under the laws and prescribed rules and regulations of the United States and this State.

As used in this section, the term **D**oil**D** means oil of any kind or in any form, including fuel oil, oil sludge, and oil refuse, and the term, **D**navigable waters of the State,**D** means all portions of the sea within the territorial jurisdiction of the State, and all inland waters navigable in fact in which the tide ebbs and flows.

 Responses to Comments on the Draft IS-MND

# RESPONSES to COMMENTS on the DRAFT IS-MND

This section includes comments received during the circulation of the Draft Initial Study and Mitigated Negative Declaration (IS-MND) prepared for the Ventura Harbor Marina and Yacht Yard Expansion.

The Draft IS-MND was circulated for a 30-day public review period that began on August 7, 2015. The Port District received seven comment letters on the Draft IS-MND. The commenters and the page number on which each commenter's letter appears are listed below.

|    | Letter No. and Commenter   | <u>Page No.</u> |
|----|--|-----------------|
| 1. | Becky Ota, Habitat Conservation Program Manager, Marine Region,<br>California Department of Fish and Wildlife          | 2               |
| 2. | Tricia Maier, Manager, Planning Programs Section, County of Ventura<br>Resource Management Agency                      | 10              |
| 3. | Alicia Stratton, Ventura County Air Pollution Control District   | 12              |
| 4. | Derrick Wilson, Staff Services Manager, Integrated Waste Management<br>Division, County of Ventura Public Works Agency | 15              |
| 5. | Transportation Department, Ventura County Public Works Agency  | 18              |
| 6. | William W. Crew  | 21              |
| 7. | Scott Morgan, Director, State Clearinghouse, State Clearinghouse and Planning Unit                                     | 23              |

The comment letters and responses follow. Each comment letter has been numbered sequentially and each separate issue raised by the commenter, if more than one, has been assigned a number. The responses to each comment identify first the number of the comment letter, and then the number assigned to each issue (Response 1.1, for example, indicates that the response is for the first issue raised in comment Letter 1).

Ms. Jessica Rauch Ventura Port District 1603 Anchors Way Drive Ventura, California 93001 jrauch@venturaharbor.com

### SUBJECT: DRAFT MITIGATED NEGATIVE DECLARATION FOR THE VENTURA HARBOR MARINA AND YACHT YARD EXPANSION

Dear Ms. Rauch:

1.1 The Department of Fish and Wildlife (Department) has reviewed the Draft Mitigated Negative Declaration (MND) received on August 6, 2015 for the proposed Ventura Harbor Marina and Yacht Yard expansion (Project). The site is located in the southern portion of Ventura Harbor in the City of Ventura. The Project would entail the following activities:

- Increase the number of boat slips from 40 to 80.
- Removal of 83 wood piles.
- Removal of the existing dock structure, concrete ramps, a portion of the existing pier, and fuel docks.
- Construction of an expanded dock structure.
- Installation of bulkheads and access ramps.
- Relocation of the fuel dock.
- Provide transient dockage in excess of 60 feet on the western walkway.
- Expand private boater slips, including some doublewide slips to potentially provide dockage for multi-hull vessels.
- Overhaul and expand the haul and launch facilities for boaters. Improvements include filling holes in the cement pier to improve safety and extending the pier by 10 feet in order to hoist larger boats.

As a trustee for the State's fish and wildlife resources under Fish and Game Code section 1802, the Department has jurisdiction over the conservation, protection, and management of fish, wildlife, and habitat necessary for biologically sustainable populations of those species. In this capacity, the Department administers the California Endangered Species Act, the Native Plant Protection Act, and other provisions of the California Fish and Game Code that afford protection to the State's fish and wildlife trust resources. Furthermore, the Department is recognized as a "Trustee Agency" under the California Environmental Quality Act (CEQA) with regard to the fish and wildlife of the state, to designated rare or endangered native plants, and to game

# Conserving California's Wildlife Since 1870

Ms. Jessica Rauch August 27, 2015 Page 2

refuges, ecological reserves, and other areas administered by the department. (CEQA guidelines §15386). As a Trustee Agency for fish and wildlife resources, the Department is responsible for providing biological expertise with respect to potentially significant impacts arising from project activities and means to mitigate or avoid such impacts.

Under the California Endangered Species Act (CESA, Fish and Game Code section 2080 et seq.), "take" of a species is that is listed as endangered or threatened is prohibited. Compliance with CEQA does not eliminate the obligation to comply with Fish and Game Code section 2080. If a Project could result in the "take" of any species listed as threatened or endangered under CESA, a Project proponent may avoid violations of Fish and Game Code section 2080 by seeking an incidental take permit (ITP) from the Department pursuant to Fish and Game Code section 2081, subdivision (b). The Department may issue an ITP if the statutory conditions are met, including the requirement that the impacts of the take are minimized and fully mitigated. (Fish & G. Code, § 2081, subd. (b)). The Department is always available for consultation to determine if Project implementation would result in unauthorized take of a State-listed species.

The Department is also responsible for marine biodiversity protection under the Marine Life Protection Act (MLPA) in coastal marine waters of California. Pursuant to our jurisdiction the Department has the following comments and recommendations regarding the Project.

#### **Additional Information Needed**

The MND does not include sufficient biological baseline information to allow an adequate assessment of the Project related impacts to fish and wildlife resources that utilize this area. A detailed project description is needed in order to determine impacts from overwater dock coverage, shading, water quality, underwater noise, and pile driving/removal impacts. The Final MND should also include any best management practices and procedures to avoid, minimize or compensate for unavoidable impacts associated with overwater structures to fish, invertebrates, seabirds and their habitats.

1.2

#### **Fish Habitat**

Shallow, subtidal habitats within marinas are considered fish habitat areas of particular concern according to the National Marine Fisheries Service (NMFS, 2015). The Department determined that Ventura Harbor may have at least one acre of eelgrass according to a 2011 southern California inventory report (Bernstein and others 2011), and that the harbor is part of the coastal pelagic species essential fish habitat area in California. Additionally, the Project area underneath proposed dock configuration may contain potential eelgrass habitat and may have invasive, non-native species such as Caulerpa taxifolia depending on the depths and other growth factors. The MND (Figure 3) indicates that the depths of new piles and dock configurations are sufficient for eelgrass growth and that the Project could have potential impacts to eelgrass if present.

Ms. Jessica Rauch August 27, 2015 Page 3

## Seabirds

Endangered, threatened or fully protected sea bird species such as the California least tern (*Sterna antillarum brown*) forage in Ventura Harbor (Chris Dellith, United States Fish and Wildlife Service, pers. comm. 2015). The California least tern nesting site is within two miles (Figure 10 of draft MND), which is within their preferred foraging habitat of sheltered, shallow subtidal waters. Overwater dock coverage of the surface waters in Ventura Harbor would permanently reduce the foraging area for this species during breeding and nesting season. There may also be temporary foraging impacts due to underwater noise and turbidity plumes during pile construction, which may divert forage fish out of the marina.

### Recommendations

The following items should be fully addressed in the Final MND:

- Eelgrass and *Caulerpa taxifolia* surveys should be conducted according to the California Eelgrass Mitigation Policy and the California Caulerpa taxifolia Survey and Mitigation Guidelines. If eelgrass is found, the Department would require a detailed eelgrass impact assessment report with proposed pre- and postconstruction monitoring and mitigation measures. All surveys, mitigation and monitoring plans should be completed prior to any in water activities associated with the Project.
- Include a detailed description of the existing and additional piles and overwater 1.6 structures for the following:
  - o Pile materials
  - o Pile diameter
  - o Total additional area of pile fill of soft bottom habitat.
  - o Number of additional piles needed for expansion.
  - Proposed additional dock area for the dock expansion (approximately 15,000 square feet) should be precisely calculated.

1.7

1.8

The Department also recommends that the Project include dock configuration and design that would facilitate reductions to fish and wildlife impacts to the maximum extent feasible. Pile removal and pile driving impacts to fish and wildlife and their habitats should be assessed and avoidance and minimization measures detailed in the Final MND. The in-water construction phases of the Project should be completed outside of the California least tern nesting season which falls between April 1 and September 15.

As always, Department personnel are available to discuss our comments, and recommendations in greater detail. To arrange a discussion, please contact Ms. Loni Adams, Environmental Scientist, Marine Region, 3883 Ruffin Rd., San Diego, CA 92123, telephone (858) 627-3985, or Loni.Adams@Wildlife.ca.gov.

**DATE:** August 27, 2015

#### Response 1.1

The commenter describes the project and the role of the Department of Fish and Wildlife. No response is necessary.

#### Response 1.2

The commenter states that a detailed project description is needed and indicates that the Final MND should include best management practices to avoid impacts to biological resources. The Draft IS-MND includes a detailed list of project components. The specific additional items requested by the commenter are addressed in Response 1.6. The Draft MND includes mitigation measures involving pre-construction surveys and, as necessary, avoidance of species in order to mitigate potential impacts. In addition, as discussed on page 50 of the Draft MND, the applicant would be required to implement a range of best management practices to minimize pollution and sedimentation in accordance with Section 10 of the federal Clean Water Act.

#### Response 1.3

The commenter suggests that eelgrass could potentially be present in the vicinity of the proposed piles and docks, and that the project could adversely affect this species. Eelgrass is discussed in the Draft MND. As noted on page 29, surveys and assessments for the presence of eelgrass (Zostera sp.) and other essential fish habitat requirements in the Ventura Harbor were conducted in support of the Ventura Harbor Village Revetment Repair Project and the Ventura Harbor Public Launch Ramp Replacement Project in 2011 and 2012. The findings of these surveys were negative. In addition, a February 2015 survey conducted by Pi Environmental at the adjacent launch ramp did not identify eelgrass, nor did a February 2015 pre-dredging survey also conducted by Pi Environmental. Based on the results of these surveys within the harbor and the fact that conditions at the project site are similar, eelgrass is not expected to occur within the project area and no impact to eelgrass is anticipated. Nevertheless, in response to this concern and to confirm that eelgrass still is not present at the time of potential disturbance, the following measure has been added to the Final MND:

**BIO-3 Pre-Construction Eelgrass and Caulerpa Survey, Avoidance, and Removal.** Prior to removal of existing piles and docks, the applicant shall conduct an underwater survey to determine whether or not eelgrass and/or caulerpa is present. The results of the survey shall be submitted to the Port District prior to initiating any offshore activity. If eelgrass is found to be present within the area of disturbance, the applicant must develop a mitigation plan to achieve no net loss in eelgrass function. Potential mitigation options would be coordinated with the National Marine Fisheries Service (NMFS) and may include: (1) in-kind compensatory mitigation involving the creation, restoration, or enhancement of habitat to mitigate for adverse impacts to the same type of habitat (such mitigation would need to achieve a final mitigation ratio of 1.2:1 across all areas of the state, independent of starting mitigation ratios); (2) contribution to a mitigation bank or in-lieu-fee program established by NMFS or another agency; or (3) out-of-kind compensatory mitigation involving the creation, restoration, or enhancement of another habitat type. In most cases, out-of-kind mitigation is discouraged, because eelgrass is a rare, special-status habitat in California. There may be some scenarios, however, where out-of-kind mitigation for eelgrass impacts is ecologically desirable or when in-kind mitigation is not feasible. If caulerpa is found to be present, it shall be removed entirely in coordination with NMFS and/or CDFW prior to installation of new docks or piles.

#### Response 1.4

The commenter suggests that various sea bird species forage in the harbor and that the project would have temporary and permanent reductions in the forage area for such species.

The Draft MND addresses impacts to various sea bird species, including the California least tern. The Draft MND states that the project site provides low quality foraging habitat for sensitive species such as California least tern (page 29). However, although this species may occasionally forage in the open waters of Ventura Harbor from its nesting colonies at the Santa Clara Rivermouth, it is not expected to nest or roost in the area due to the current level of disturbance at or near the Ventura Harbor Boat Launch Ramp (pp. 29-30).

Dock and pile replacement would result in temporary disturbance of potential foraging and perching at the project site. However, sea birds can easily avoid direct impacts and the area of disturbance constitutes only a minute fraction of the overall harbor. It is estimated that the expanded docks would permanently increase water coverage by about 15,000 square feet, or about 0.3 acres. This would constitute an approximately 0.3% increase in overall water coverage within the 110-acre Ventura Harbor. This incremental increase is not expected to have any permanent adverse effect on foraging activity within the harbor.

#### Response 1.5

The commenter suggests that eelgrass and caulerpa surveys should be conducted and that monitoring and mitigation should be provided if these species are found. Please see Response 1.3.

#### Response 1.6

The commenter request several specific pieces of information related to the new docks and piles. The following is provided in response to this request:

| Pile materials                                    | Cement (replaces a mix of wood and   |
|---|--------------------------------------|
|   | cement piles)                        |
| Pile diameter                                     | Ranges from about 14" to 20"         |
| Total additional area of pile fill of soft bottom | Approximately 25,000 square feet     |
| habitat   | (assumes 60 new 14" piles and 60 new |
|   | 20" piles, and assumes that existing |
|   | piles are round and 12" in diameter) |

| Number of additional piles needed for expansion      | Approximate increase of 20 piles (about<br>120 piles for the new dock and about<br>100 existing piles)              |
|--|---|
| Proposed additional dock area for the dock expansion | Approximately 15,000 square feet (this includes the entire footprint of the expanded facility, including open water |
|  | between individual docks)   |

#### Response 1.7

The commenter states that the project design should minimize impacts, that the Final MND should include discussion of pile removal and installation impacts, and that in-water construction should be conducted outside the California least tern nesting season.

The project has been designed in a manner intended to minimize impacts. For example, the current mix of concrete and wood piles would be replaced with all concrete piles. This would minimize potential water quality impacts. In addition, the fueling dock would be upgraded to minimize the risk of upset associated with boat fueling. The Draft MND analyzes both temporary impacts related to construction activity (including pile removal and installation) and long-term impacts related to project operation. The Draft MND does not prohibit in-water construction activity during the California least tern nesting season (April 1 – September 15), but Mitigation Measure BIO-2 requires a survey of areas suitable for nesting for MBTAprotected bird species, including raptors (such as barn owls), waterbirds, and songbirds if construction of the project begins during the bird-breeding season (February 15- September 15). The survey is to be conducted a maximum of seven days prior to the project start date by a Port-approved biologist. If a nest of a species afforded protection under the CFG Code or MBTA is found to be active, a Port-approved biologist will determine an appropriate avoidance non-disturbance buffer that would be adequate to avoid take. The buffer zone area would not be encroached into by construction work until such time as the biologist determines that nesting is complete and the young have fledged and are no longer dependent upon the nest site area. This measure would provide adequate protection for California least tern

#### Response 1.8

The commenter indicates that CDFW personnel are available to discuss their comments and recommendations. The Draft MND preparers have had multiple conversations with CDFW staff about the project. If additional questions arise, the Port District will contact CDFW.

Subject: Comments on the MND and Intial Study for the Ventura Harbor Marina and Yacht Yard Expansion

Dear Ms. Rauch:

Thank you for the opportunity to review and comment on the subject document. Attached are the comments that we have received resulting from intra-county review of the subject document. Additional comments may have been sent directly to you by other County agencies.

Your proposed responses to these comments should be sent directly to the commenter, with a copy to Laura Hocking, Ventura County Planning Division, L#1740, 800 S. Victoria Avenue, Ventura, CA 93009.

If you have any questions regarding any of the comments, please contact the appropriate respondent. Overall questions may be directed to Laura Hocking at (805) 654-2443.

Sincerely,

Tricia Maier. Manager

#### VENTURA COUNTY AIR POLLUTION CONTROL DISTRICT Memorandum

TO: Laura Hocking, Planning

DATE: August 31, 2015

3.1

FROM: Alicia Stratton

SUBJECT: Request for Review of Mitigated Negative Declaration for the Ventura Harbor Marina and Yacht Yard Expansion, Ventura Port District (Reference No. 15-018)

Air Pollution Control District staff has reviewed the subject mitigated negative declaration, which is a request for an expansion of and making improvements to the existing Ventura Harbor Marina and Yacht Yard to increase the number of boat slips from 40 to 80. The project location is in the northern portion of the Ventura Harbor in the City of Ventura.

Project Description: The proposed expansion involves removing the existing dock structure, concrete ramps, a portion of the existing pier, and fuel docks; construction of an expanded dock structure; relocation of the fuel dock; onshore parking improvements; and other related facility improvements. The expanded dock would extend further into the main channel of Ventura Harbor as compared to the existing dock, but would be consistent with the channel limit considered by the Ventura Port District Commission. The fuel dock would also be improved and would include improvements to feeder lines and new digital fuel pumps that would provide a higher pump capacity, extended hose length on retractable rollers to enable docked commercial boats in that section of the dock to be fueled at their slips; spill resistant nozzles build to current code requirements; easy access kill switches; new gauges and a stable, and new docking area. Other proposed improvements include a new ADA compliant ramp, new restroom/shower facilities; an increase in the number of bait receivers; transient dockage in excess of 60-ft.; expanded private boater slips; expanded haul and launch facilities; increase capacity for electrical power hookups, raise piling highest an additional five feet; install keyless card system; reconfigure and repave parking lot to allow additional 5-17 parking spaces; upgrade storm drain inlets with sand filters and upgrade existing water pipe to comply with current Code requirements. Materials to be removed as part of the demolition would include 20,320 cu. ft. of cement, 20,320 cu. ft. of wood, 83 wood pilings, 20 12" by 12' beams, and 40 4: by 20' cross beams. The facility currently has 120 day sail/dry storage slips and the number of slips would not change with the proposed project. The proposed project may generate a minor increase in boating activity as the number of slips would increase. However, the amount of increase cannot be predicted at this time. The number of boats fueled at the existing fuel dock can range from 2-6 Monday through Thursday and 15-30 on weekends. Use of the fuel pumps may incrementally increase with the proposed project due to the increase in the number of boat slips. The amount of increase cannot be predicted at this time and would be minimal relative to the overall number of

boasts that use the fuel pumps (there are currently about 1,500 total boat slips in Ventura Harbor so the 40 new slips would represent an overall increase of less than 3%). In addition, the relocation of the fuel dock would allow some commercial boats to be fueled in their slips would decrease activity to and from the fuel pumps. Relocation of the fuel dock would allow easier navigation to the dock. Construction of the new dock would occur in two phases with each phase taking 4-6 months.

Section III of the mitigated negative declaration addresses air quality issues. We concur with the findings of this discussion that significant air quality impacts would not result from the project. Both short-term, construction air impacts and long-term, operational air impacts are evaluated. Table 1, Project Construction Emissions, indicates that both ROG and NOx emissions from construction would be less than 25 lbs/day (2.8 lbs/day and 24.7/lbs. day, respectively). Long-term, operational emissions are presented in Table 2, and indicate that 1.0 lb/day of ROG and 0.6 lbs/day of NOx would be generated by the project. No air quality mitigation is required, however we recommend the following measures be followed during demolition, site preparation and construction:

#### APCD Rules and Regulations for Project Demolition/Grading and Construction

**Purpose:** To ensure that fugitive dust and particulate matter that may result from site preparation, construction activities, and activities on the site are minimized.

3.2

**Requirement:** The Permittee shall comply with the provisions of applicable VCAPCD Rules and Regulations, which include but are not limited to, Rule 50 (Opacity), Rule 51 (Nuisance), and Rule 55 (Fugitive Dust).

**Documentation:** The Lead Agency shall ensure compliance with the following provisions:

- I. All trucks shall cover their loads as required by California Vehicle Code §23114.
- **II.** Fugitive dust throughout the construction site shall be controlled by the use of watering unpaved and active portions of the construction site. Environmentally-safe dust control agents may be used in lieu of watering.
- **III.** Signs shall be posted onsite limiting traffic to 15 miles per hour or less.
- **IV.** All clearing, grading, earth moving, or excavation activities shall cease during periods of high winds (i.e., wind speed sufficient to cause fugitive dust to impact adjacent properties). During periods of high winds, all clearing, grading, earth moving, and excavation operations shall be curtailed to the degree necessary to prevent fugitive dust created by onsite activities and operations from being a nuisance or hazard, either offsite or onsite.
- **V.** Signs displaying the APCD Complaint Line Telephone number for public complaints shall be posted in a prominent location visible off the site: (805) 645-1400 during business hours and (805) 654-2797 after hours.

If you have any questions, please call me at (805) 645-1426.

**COMMENTER:** Alicia Stratton, Ventura County Air Pollution Control District

**DATE:** August 31, 2015

Response 3.1

The commenter describes the project components. No response is necessary.

#### Response 3.2

The commenter states concurrence with the findings of the Draft MND and recommends inclusion of VCAPC rules and regulations as mitigation.

The concurrence with the MND findings is noted. The project applicant would be required to adhere to applicable VCAPCD rules throughout construction, including rules 50, 51, and 55. Because VCAPCD rules are standard requirements they do not need to be included as mitigation measures, which are additional techniques above and beyond standard requirements to address potentially significant impacts. As discussed in the Draft MND, project-related construction emissions would not be significant; therefore, mitigation beyond standard requirements is not necessary.

# County of Ventura Public Works Agency Integrated Waste Management Division MEMORANDUM

Date: August 26, 2015

To: Oscar Pena

Lead Agency: Ventura Port District

- From: Derrick Wilson, Staff Services Manager Integrated Waste Management Division
- Subject: Notice of Intent to Adopt the Mitigated Negative Declaration and Initial Study for the Ventura Harbor Marina and Yacht Yard Expansion project. RMA Reference No: <u>15-018</u>.

The Integrated Waste Management Division (IWMD) has reviewed the materials circulated by the Ventura County Resource Management Agency (RMA) for this project on August 10, 2015, and appreciates this opportunity to provide our comments.

The IWMD requests that the Ventura Port District comply, to the extent feasible, with the general requirements of Ventura County Ordinances #4445 (solid waste handling, disposal, waste reduction, and waste diversion) and #4421 (requirements for the diversion of construction and demolition debris from landfills by recycling, reuse, and salvage) to assist the County's efforts to meet the requirements of Assembly Bill 939 (AB 939). AB 939 mandates all cities and counties in California to divert a minimum of 50% of their jurisdiction's solid waste from landfill disposal. Ordinances 4445 and 4421 may be reviewed in their entirety at <u>www.vcpublicworks.org/ord4445</u> and <u>www.vcpublicworks./ord4421</u>.

Pursuant to IWMD review and responsibilities, the following contract specifications shall apply to this project:

#### **Recyclable Construction Materials**

Contract specifications for this project shall include a requirement that recyclable construction materials (e.g., metal, concrete, asphalt, rebar, wood) generated by the project, but not reused on-site, must be recycled at a permitted recycling facility. For a comprehensive list of permitted recyclers, haulers, and solid waste & recycling facilities in Ventura County, see: www.vcpublicworks.org/C&D.

### Soil - Recycling & Reuse

Contract specifications for this project shall include a requirement that soil not reused on-site during construction must be transported to a permitted facility for recycling or reuse. Illegal disposal or landfilling of soil is prohibited. For a comprehensive list of permitted recyclers, haulers, and solid waste & recycling facilities in Ventura County, see: www.vcpublicworks.org/C&D.

1

#### Green Materials - Recycling & Reuse

The Contract Specifications for this project shall include a requirement that wood waste and vegetation generated during the construction phase of this project must be diverted from the landfill. This can be accomplished by on-site chipping/grinding and land-application at various project sites, or by transporting the materials to a permitted greenwaste facility in Ventura County. A complete list of permitted greenwaste facilities is located at: www.vcpublicworks.org/greenwaste.

# Report Quantifying Materials Diverted from Landfill Disposal by On-Site Reuse or Off-site Recycling

The contract specifications for this project shall include a requirement that all contractors working on the proposed project submit a *Summary Table* to the IWMD at the conclusion of their work. The *Summary Table* must include the contractor's full name, address, phone number, the project's name, the types of recyclable materials generated during the project (e.g., metal, concrete, asphalt, rebar, wood, soil, greenwaste) and the *approximate* weight of recyclable materials that were:

- Reused on-site, and/or
- <u>Transported to permitted facilities for recycling and/or reuse</u>.

Contractors must include the name, address, and phone number of the permitted facilities where recyclable materials were transported for recycling or reuse in their *Summary Table*. Receipts and/or documentation are required for <u>each entry</u> in the *Summary Table* to verify recycling and/or reuse occurred, and that recyclable materials generated by the project were not disposed in a landfill.

Should you have any questions regarding this memo, please contact Pandee Leachman at 805/658-4315.

| COMMENTER: | Derrick Wilson, Staff Services Manager, Integrated Waste Management |
|------------|---|
|            | Division, County of Ventura Public Works Agency                     |

**DATE:** August 26, 2015

The commenter requests that the Port District comply, to the extent feasible, with Ventura County solid waste diversion and disposal requirements. The project applicant would comply with applicable requirements related to the recycling and disposal of construction waste. To the maximum practical extent, demolition debris (including, but not limited to, existing docks and piles) would be diverted from landfills and reused or recycled.

PUBLIC WORKS AGENCY TRANSPORTATION DEPARTMENT Traffic, Advance Planning & Permits Division <u>M E M O R A N D U M</u>

**DATE:** August 24, 2015

TO: RMA – Planning Division Attention: Laura Hocking

FROM: Transportation Department Bm

SUBJECT: REVIEW OF DOCUMENT 15-018 Notice of Intent (NOI) to adopt Mitigated Negative Declaration and Initial Study (MND/IS) Project: Ventura Harbor Marina and Yacht Yard Expansion Expansion and improvements for Ventura Harbor Marina and Yacht Yard (VHMYY) in northerly portion of Ventura Harbor accessed via Anchors Way in City of Ventura. Lead Agency: Ventura Port District (District)

Pursuant to your request, the Public Works Agency Transportation Department has completed its review of the MND/IS for the Ventura Harbor Marina and Yacht Yard Expansion Project (Project).

This project is an expansion and improvement project for the Ventura Harbor Marina and Yacht Yard (VHMYY) accessed via Anchors Way Drive and Spinnaker Drive in the City of Ventura. The project site is located in the northern portion of the 274-acre Ventura Harbor opened for use in 1963, of which the District has jurisdiction over 152 acres of land and 122 acres of surface water. The project site (Parcel 20) has a restaurant, yacht yard, sport fishing business/structure, real estate office, fuel dock, and convenience store.

The project involves: increasing the number boat slips from 40 to 80 total boat slips; removing the existing dock structure, concrete ramps, part of an existing pier, and fuel docks; and construction of an expanded and relocated fuel dock structure, and onshore parking improvements. Other improvements include the following: ADA ramps and walkways; new restroom/toilet facilities (four toilets and three showers); five new bait receiver units; wider private boat slips (for double-wide or multi-hull vessels); extension of launch pier by ten feet and increase height five feet to 17 feet above mean lower low water elevation for improved tsunami protection; increased electrical power to 100 amperes for larger boats; keyless entry system; upgrade of drainage inlets with sand/trash filters; and increase of water pipe size from three to six inches in diameter. The increase in 40 boat slips represents three percent (3 %) of the total 1,500 boat slips in the harbor. The120 day sail/dry storage slips in the VHMYY will remain at 120. The four- to six-month project would occur in two phases for the east and west sides of the dock structure. The new boat slips and restroom/toilet facilities could generate up to 15 "liveaboards" or residents who live at the marina.

We offer the following comment:

 The cumulative impacts of the development of this project, when considered with the cumulative impact of all other approved (or anticipated) development projects in the County, will be potentially significant. To address the cumulative adverse impacts of traffic on the County Regional Road Network, the appropriate Traffic Impact Mitigation Fee (TIMF) should be paid to the County when development occurs. Based on the information provided in the MND for the Ventura Harbor Marina and Yacht Yard Expansion, and the reciprocal agreement between the City of Ventura and the County of Ventura, the fee due to the County would be:

\$5,389.80 = 156 ADT\*\* x \$34.55 / ADT\*\*\*

Notes

- 1. \*\* 156 ADT per Table 2 of Traffic Study by ATE dated March 16, 2015.
- 2. \*\*\* TIMF for Ventura Traffic District #10.
- 3. The project is located in the City of Ventura; therefore, the City of Ventura should collect the TIMF on behalf of the County of Ventura.

The above-estimated fee may be subject to adjustment at the time of deposit, due to provisions in the TIMF Ordinance allowing the fee to be adjusted for inflation based on the Engineering News Record Construction Cost Index. The above is an estimate only, based on information provided in the MND.

2. Please send us the final MND when it is available for our review and comment.

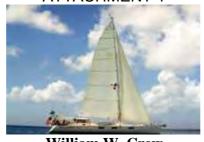

Our review is limited to the impacts this project may have on the County's Regional Road Network.

T:\Planning\Land Development\Non\_County\15-018 (VTA Port).doc

**COMMENTER:** Transportation Department, Ventura County Public Works Agency

**DATE:** August 24, 2015

The commenter summarizes the project and notes that the project applicant would be required to pay the applicable County Traffic Impact Mitigation Fee (TIMF) to address the project's contribution to cumulative impacts to the County road network. The applicant would pay the applicable TIMF at the time of issuance of a building or occupancy permit.

William W. Crew 1755 Spinnaker Dr. Ventura, Ca. 93001

September 1, 2015

**To: Ventura Port District Commissioners** 

**Ref: Ventura Harbor and Boat Yard Draft Initial Study-Mitigated Negative Declaration -- Comment Filling** 

Figure 8 shows the marina plan, adjacent slips and fairway for all traffic going to the south and south east part of the harbor.

1. The area of the proposed slips as shown reduces by more than 50% area that is used by recreational sailboats to take down their main sails. For nearly every recreational sailboat taking down the main sail should not be done outside the harbor as strong winds and heavy seas will put them in danger as they cross the bar at the harbor entrance. Therefore they go into the main basin near the fuel dock and head into the prevailing wind toward the entrance channel to luff the main sail and take it down. In the case of my boat I get the task completed at the National Park Service docks. The north basin doesn't have enough distance into the prevailing westerly wind.

2. This same area is used by all varieties of PWC vessels so that they can stay out of the traffic that is transiting to/from the southerly areas of the harbor. 75% of these users of the harbor have little or no experience or knowledge of rules of the road and right of way and often just turn into oncoming traffic. The harbor has approved entitlements on the Sondermann Ring project to encourage/provide more access to PWC vessels. This is good but open water area is needed for their activities.

The Draft EIR does not address the needs/requirements for water area required by a significant portion of the users the the Ventura Port District is committed to serving in the Public Access and Recreation paragraphs on page 56. In addition commercial vessel traffic will be put further at risk by forcing PWC craft into the narrow fairway.

As the EIR states "Article 3 of the California Coastal Act includes a number of policies designed to protect and enhance coastal-related activities and facilities..." but the EIR <u>fails</u> to say that the project will also put the public users of the harbor at greater risk to injury and unsafe operation of their vessels. And provide mitigation.

William W Crew

6.3

6.1

6.2

**COMMENTER:** William W. Crew

DATE: September 1, 2015

#### Response 6.1

The commenter notes that Draft MND Figure 8 shows the marina plan for traffic going to the south and southeast part of the harbor. No response is necessary.

#### Response 6.2

The commenter suggests that the area of the proposed slips would reduce the area used by recreational sailors to take down main sails by 50% and notes that the north basin does not have enough distance into the prevailing westerly wind.

The expanded docks would increase water coverage by about 15,000 square feet, or about 0.3 acres. This increased waster coverage would constitute approximately 0.3% of the overall water area within the 110-acre Ventura Harbor. As the commenter notes, the expanded slips would reduce the area within the main channel, which is used by recreational sailors to take down their main sails. However, as discussed on page 72 of the Draft MND, the extended dock would be consistent with the channel limit adopted by the Port District Commission in June 2014. This limit was adopted in consideration of the space needs of both recreational and commercial boaters using Ventura Harbor and, based on the analysis conducted to determine the channel limits, would provide adequate space to accommodate the needs of recreational sailors. The new fuel dock is expected to improve safety conditions as compared to the existing facility by providing newer fueling equipment and the opportunity for boats to fuel in their docks. Therefore, it is not anticipated that the proposed new docks would significantly affect safety conditions in Ventura Harbor.

#### Response 6.3

The commenter suggests that the project would put public users of the harbor at greater risk and that mitigation is needed.

As discussed in Response 6.2, the proposed expanded dock is consistent with the channel limit adopted by the Port District Commission. Although the expanded docks would reduce the amount of open water through the main channel, the channel limit approved by the Port Commission was adopted in consideration of safety concerns for boaters. The analysis in the Draft MND considers planned and pending developments in and around the harbor, but does not identify any significant safety impacts associated with cumulative development.

The commenter acknowledges receipt for the Draft MND and states that the Port District has complied with State Clearinghouse review requirements for draft environmental documents. No response is necessary.

Appendix F Mitigation Monitoring and Reporting Program

# MITIGATION MONITORING AND REPORTING PROGRAM

CEQA requires adoption of mitigation monitoring and reporting program (MMRP) for the measures necessary to mitigate or avoid significant effects on the environment (Public Resources Code 21081.6). The mitigation monitoring and reporting program is designed to ensure compliance with adopted mitigation measures during project implementation. For each mitigation measure included in the Ventura Harbor Marina and Yacht Yard Expansion Initial Study - Mitigated Negative Declaration (IS-MND), specifications are made herein that identify the action required and the monitoring that must occur. In addition, a responsible agency is identified for verifying compliance with measures contained in the MMRP.

To implement this MMRP, the Ventura Port District will designate a Project Mitigation Monitoring and Reporting Coordinator ("Coordinator"). The coordinator will be responsible for ensuring compliance with the mitigation measures incorporated into the project during project implementation.

The following table will be used as the Coordinator's checklist to determine compliance with required mitigation measures.

|  | Implementation   | Timing  | Frequency  | Monitoring<br>Department | Funding   | Compliance Verification |      |          |
|--|--|---|--|--------------------------|-----------|-------------------------|------|----------|
| Mitigation Measure   | Requirement  |   |  |                          |           | Initial                 | Date | Comments |
| <b>BIO-1</b> Wildlife Clearance Survey.<br>Docks and other structures provide resting<br>and roosting habitat for special status<br>species. A general wildlife clearance<br>survey shall be conducted prior to<br>demolition of structures to ensure any<br>special status wildlife species have left the<br>area. California brown pelicans or harbor<br>seals could enter the project area. If<br>California brown pelicans or harbor seals<br>are observed, construction activates that<br>could impact these species shall be halted<br>until the animals leave the area. If other<br>special status species are observed during<br>the clearance survey, a Port-approved<br>biologist shall determine an appropriate<br>avoidance buffer and will be present during<br>construction activities to determine if<br>construction activities are impacting the<br>species. Minimization measures, including<br>buffers, for non-nesting MBTA special<br>status species will be implemented under<br>the direction of a Port-approved biologist. | Verify that the<br>required survey<br>has been<br>conducted. If<br>minimization<br>measures are<br>required, verify<br>that they are<br>implemented<br>during<br>construction. | Survey<br>verification prior<br>to issuance of<br>grading/<br>building<br>permits;<br>verification of<br>minimization<br>measure<br>implementation<br>throughout<br>construction. | Once for<br>survey; if<br>minimization<br>measures<br>needed,<br>periodically<br>throughout<br>construction. | Port District            | Applicant |                         |      |          |
| <b>BIO-2</b> Nesting Bird Survey. Palm trees,<br>ornamental vegetation and structures<br>suitable for nesting for MBTA-protected<br>species, including raptors (such as barn<br>owls), waterbirds, and songbirds occur<br>within and adjacent to the project site.<br>Direct and indirect impacts could occur to<br>any nests, if present, from project activities.<br>Therefore, if construction of the project<br>begins during the bird-breeding season<br>(February 15- September 15), a nesting<br>bird survey of potentially suitable nesting<br>habitat shall be conducted a maximum of<br>seven days prior to the project start date by<br>a Port-approved biologist (a person with a<br>biology degree and/or established skills in<br>bird recognition). If the project begins<br>outside of the bird-breeding season and<br>continues through the bird-breeding   | Verify that the<br>required survey<br>has been<br>conducted. If<br>buffers are<br>required, verify<br>that they are<br>implemented<br>during<br>construction.                  | Survey<br>verification prior<br>to issuance of<br>grading/<br>building<br>permits;<br>verification of<br>buffer<br>implementation<br>throughout<br>construction.                  | Once for<br>survey; if<br>buffers<br>needed,<br>periodically<br>throughout<br>construction.                  | Port District            | Applicant |                         |      |          |

| Mitigation Measure                              | Implementation   | Timing             | Frequency     | Monitoring    | Funding   | Compliance Verification |      |          |  |
