

VENTURA HARBOR MARINA COMMERCIAL DOCK IMPROVEMENT PROJECT CONSTRUCTION PROJECT UPDATE

May 2, 2019: The anticipated Ventura Harbor Village Dock Improvement Project is in the works commencing mid-May with completion in September 2019. The Dock Improvement Project aligns with the Port District goals to position the Ventura Harbor Marina as a world-class working commercial harbor. Project focus includes utilities and the infrastructure of the dock systems, including fire suppression. The majority of the project is on the water but there will be some landside improvements.

- In an effort to mitigate valuable parking space during the Dock Improvement Project period, a fenced off portion of the lawn area near the Village will be used to stage equipment.
- The landside work pursuant to the project will cause some disruption at Harbor Village on the waterfront Promenade in 2 locations:
 - A section of the Promenade in between the new retailer Top This Chocolate and the front patio section of Fratelli's will commence on May 6 with no access from the Promenade to the 1559 Building from the Promenade during this time. (completed by Memorial Day Weekend) Re-directional signs will be in place when work is in progress for pedestrians. Every effort will be made to provide temporary solutions for Promenade access on weekends if safe to do so.
 - A section of the Promenade walking north almost to Island Packers from Harbor Village will also have landside construction. Pedestrians again will be redirected safely, with every effort made to provide temporary solutions for Promenade pedestrian access.
- The Ventura Port District is committed to working closely with our tenants and making the Dock Improvement Project construction period (estimated for a total of 4 months) the least disruptive as possible.
- For visitor/customer information or inquiries, the Ventura Boat Rentals operation will be re-located in June to sections of "C" Dock (closer to Andria's Seafood Restaurant & Market) during the Dock Improvement Project.
